LETTER OF TRANSMISSION.

I have the honor to submit herewith a portion of the history of the MEDICAL DEPARTMENT OF THE UNITED STATES ARMY IN THE WORLD WAR. The portion submitted is entitled "*Medical and Casualty Statistics*," and is Part Two of Volume XV, on the subject of STATISTICS.

The various parts of this history, irrespective of sequence in volume numbers, will be published from time to time in such order as material becomes available.

M. W. IRELAND,
Major General, The Surgeon General.

The SECRETARY OF WAR.

[a] The highest rank held during the World War has been used in the case of each officer.

[b] On August 8, 1924, Col. Charles Lynch ceased to function as editor in chief of the history by reason of his retirement from the service, and became a member of the advisory editorial board.

PREFACE.

Publication of this part of the volume on statistics, containing the medical and casualty statistics for the United States Army during the World War, completes the war statistical work of the Surgeon General's Office, with the exception of such special statistical matter as may find place in the professional volumes.

This work really began with the reorganization of the medical records section of that office in October, 1917. It has been carried out through various administrative changes, all of which are described in Volume I of this history. The final change was the authorization of the Statistical Division in the Surgeon General's Office, effected by Office Order No. 5, Office of the Surgeon General, W. D., February 15, 1921. This division is responsible for the compilation of the statistics included in the present volume.

As a result of the war statistical work of the Surgeon General's Office three statistical studies have already been prepared and published. The first, "Physical Examinations of the First Million Draft Recruits; Methods and Results," was published, in 1919, as Bulletin No. 11 of the Surgeon General's Office. This was a study of the physical examinations of the first million draft recruits who were sent to military camps. The second, "Defects Found in Drafted Men," published by the War Department, at the Government Printing Office, in 1920, was a study of the physical examinations of all selective service men of the first and second registrations who were rejected by the local boards as physically or mentally unfit for all military service; and of approximately 2,000,000 selective service men sent to military camps. The third, "Army Anthropology," was published as Part I, of this volume.

Medical and casualty statistics have also been published from year to year in the reports of the Surgeon General for 1918, 1919, and 1920. These contain such statistics for the calendar years of 1917, 1918, and 1919, respectively. Many data contained in these reports, with some additional data, will be found in the following pages. Comparison of the tables in the Surgeon General's annual reports for the years mentioned with those in the present volume will reveal some differences. In all such cases the figures which appear here should be given preference.

Later, The Adjutant General proposes to publish final casualty statistics which will be based on a careful study of the complete records of all the individuals concerned. These figures also will vary to some extent from those which appear here, due mainly to the fact that they were prepared solely for military purposes while those of the Medical Department had other purposes in mind as well.

During the war approximately 12,000,000 individual medical records were received in the Surgeon General's Office, all of which have been utilized for the

statistics which appear in the present volume. For the statistical tables in the Annual Reports of the Surgeon General for 1917, 1918, and 1919, and for the present volume, approximately 5,000,000 perforated statistical cards were prepared.

The assistance of Maj. Charles B. Davenport, S. C., is gratefully acknowledged. While this officer was not so intimately or directly concerned in the preparation of the present statistics as with that of the other statistical compilations which have been mentioned above, he performed most valuable services in connection with the compilation of statistics for the 1918 report of the Surgeon General, which have been largely made of use here.

Maj. Robert Delafield, S. C., who served as assistant in the medical records section during its early days, also performed a valuable service to this volume in that his painstaking work at that time is reflected in the present tables.

At the maximum, approximately 350 clerks were employed at one time in the medical records section. Practically all of them performed their duties intelligently, thoroughly, and conscientiously. All of those who so served in the section played his or her part in the preparation of the present volume. Only a few clerks, comparatively speaking, have remained, however, and have worked directly in getting the matter ready for the press. It is a special pleasure to acknowledge the assistance of those most directly concerned by name:

Mr. William H. Deggs, principal clerk of the medical records section, since retired; Mr. Huntt P. Larcombe, now principal clerk of the division; Mr. Silas Berryman; Miss Helen R. Markley; Miss Loretta O'Donnell; Miss Viola N. Rose; Miss Anna T. Buckley; Miss Bertha Shipley; Miss Elizabeth Holland; Mrs. Harriett Rogers; Mr. Myer Lipshitch; Miss Mary C. Saunders; Miss Bew Patten; Miss Nellie Albee; Mrs. Katheryn Kavanagh; Miss Inez Tyler; Mrs. Blanche E. Moore; Miss Elsa M. Hansen; Mrs. Ella F. Miner; Mrs. Mary Roberts; Miss Ruth W. Harris; Miss Annie E. Bray.

91. Admissions, by camps of occurrence, and by States of occurrence (excluding troops in specified camps), colored enlisted men in the United States, April 1, 1917, to December 31, 1919, inclusive; ratios per 1,000 858
92. Deaths, by camps of occurrence, and by States of occurrence (excluding troops in specified camps), colored enlisted men in the United States, April 1, 1917, to December 31, 1919, inclusive; absolute numbers 882
93. Deaths, by camps of occurrence, and by States of occurrence (excluding troops in specified camps), colored enlisted men in the United States, April 1, 1917, to December 31, 1919, inclusive; ratios per 1,000 894
94. Discharges for disability, by camps of occurrence, and by States of occurrence (excluding troops in specified camps), colored enlisted men in the United States, April 1, 1917, to December 31, 1919, inclusive; absolute numbers 906
95. Discharges for disability, by camps of occurrence, and by States of occurrence (excluding troops in specified camps), colored enlisted men in the United States, April 1, 1917, to December 31, 1919, inclusive; ratios per 1,000 930
96. Admissions for diseases (all), by camps, by months, total enlisted men, United States, October 1, 1917, to December 31, 1919, inclusive; absolute numbers 954
97. Deaths, for diseases (all), by camps, by months, total enlisted men, United States, October 1, 1917, to December 31, 1919, inclusive; absolute numbers 956
98. Discharges for disability, for diseases (all), by camps, by months, total enlisted men, United States, October 1, 1917, to December 31, 1919, inclusive; absolute numbers 958
99. Days lost, for diseases (all), by camps, by months, total enlisted men, United States, January 1, 1918, to December 31, 1919, inclusive; absolute numbers 960
100. Admissions, influenza and common respiratory diseases, measles, and the pneumonias, by camps of occurrence, by months, white enlisted men, United States, October 1, 1917, to December 31, 1919, inclusive 962
101. Deaths, influenza and common respiratory diseases, measles, and the pneumonias, by camps of occurrence, by months, white enlisted men, United States, October 1, 1917, to December 31, 1919, inclusive 978
102. Admissions, influenza and common respiratory diseases, measles, and the pneumonias, by camps of occurrence, by months, colored enlisted men, United States, October 1, 1917, to December 31, 1919, inclusive 994
103. Deaths, influenza and common respiratory diseases, measles, and the pneumonias, by camps of occurrence, by months, colored enlisted men, United States, October 1, 1917, to December 31, 1919, inclusive 1007
104. Admissions and deaths, nonbattle injuries, total Army, April 1917, to December, 1919, inclusive. Absolute numbers, ratios per 1,000 strength, rate per 1,000 of nonbattle injuries, and case fatality rates 1015
105. Admissions, battle injuries, officers and enlisted men, 1917–18; absolute numbers and ratios per 1,000 1017
106. Deaths, battle injuries, officers and enlisted men, 1917–18; absolute numbers and ratios per 1,000 1017
107. Discharges for disability, battle injuries, officers and enlisted men, 1917–18; absolute numbers and ratios per 1,000 1018
108. Days lost in hospital, battle injuries, officers and enlisted men, 1917–18; absolute numbers and ratios per 1,000 1018
109. Admissions, battle injuries, by military agents, officers and enlisted men, 1917–18; absolute numbers and ratios per 1,000 1019
110. Deaths, battle injuries, by military agents, officers and enlisted men, 1917–18; absolute numbers and ratios per 1,000 1021
111. Discharges for disability, battle injuries, by military agents, officers and enlisted men, 1917–18; absolute numbers and ratios per 1,000 1022
112. Days lost in hospital, battle injuries, by military agents, officers and enlisted men, 1917–18; absolute numbers and ratios per 1,000 1023
113. Admissions, deaths, and case fatality rates, battle injuries, by poisonous gases, officers and enlisted men, 1917–18; absolute numbers and percentage rates 1023

Table. Page.
114. Admissions, deaths, and case fatality rates, battle injuries, by gunshot missiles, officers and enlisted men, 1917–18; absolute numbers and percentage rates 1023
115. Admissions, deaths, and case fatality rates, battle injuries, by region and by military agent (poisonous gases excepted), single and multiple wounds, officers and enlisted men, 1917–18 1024
116. Admissions, battle injuries, by arms of service, by months, total officers and enlisted men, 1917–18; absolute numbers, ratios per 1,000 1025
117. Deaths in hospital, battle injuries, by arms of service, by months, total officers and enlisted men, 1917–18; absolute numbers, ratios per 1,000 1026
118. Killed in action, by arms of service, by months, total officers and enlisted men, 1917–18; absolute numbers, and ratios per 1,000 1027
119. Admissions and deaths, battle injuries, and killed in action, by arms of service, total officers and enlisted men, 1917–18; absolute numbers, ratios per 1,000, and case fatality rates 1028
120. Wounds by gas and by gunshot missiles, and killed in action, Infantry, Artillery, Machine Gun Battalions, and Engineers, by month and by day, January 1 to November 11, 1918, inclusive 1029
121. Deaths, and wounded American Expeditionary Forces, North Russia and Siberia, August, 1918, to March, 1920, inclusive; absolute numbers 1179
122. Admissions, deaths, discharges for disability and days lost, including killed in action, total army, excluding North Russia and Siberia; absolute numbers, ratios per 1,000, and percentages, April 1, 1917, to December 31, 1919, inclusive 1180

III. Sick and wounded forms (Figures 1 to 16 inclusive) 1202

SECTION I.

METHODS OF COLLECTING AND COMPILING VITAL STATISTICS.

As it proved, during the World War, it was necessary to utilize for medical and casualty statistics not only reports made to the Surgeon General but, to a considerable extent, certain of those made to The Adjutant General and to the Provost Marshal General.

It is not necessary here to describe the forms of special interest to the Medical Department which were used by the offices of The Adjutant General and the Provost Marshal General. The contrary is believed to be the case respecting Medical Department forms. Those of particular interest from the statistical standpoint are reproduced in Appendix III. Moreover, in other appendices may be found the orders in force regarding registration and reports of sick and wounded.

Vital statistics were compiled for our entire Army, wherever serving, including troops in our tropical possessions and in China. Discussion of the subject here will be carried on under three heads, viz: (1) Strength data and estimates; (2) sick and wounded data; (3) methods of assembling data in the Surgeon General's Office. Then comes an explanation of the terms and methods used. The various tables follow.

STRENGTH DATA AND ESTIMATES.

It was highly desirable, of course, that the strength of the Army day by day be determined in order that its medical and casualty statistics might be evaluated. This proved by no means a simple or a wholly practicable task. As World War methods were based on, though not identical with, peace time methods, it will be best to describe the latter first.

In peace times, before the war, the senior medical officer with each command obtained from the commanding officer the troop strength day by day, and reported the average daily strength for the month at the end of each month. This report was made to the Surgeon General on Medical Department Form No. 51. The form in question, as will be seen later, was a part of the monthly sick and wounded report to the Surgeon General, rendered by the senior medical officer for every command. The data on Form 51 were sufficient to enable the Surgeon General's Office to compile total strengths and strengths in detail in peace save for the fact that then certain officers and men are always detached from their commands and, in consequence, are not included in the strength reports of medical officers. The Adjutant General, however, is in a position to know the total strength of the Army from monthly reports made to him by individuals detached, as well as by all commands. To illustrate how this actually worked out in peace, for the year 1915, the officer strength as obtained from the reports of sick and wounded to the Surgeon General was 4,394; as

reported to The Adjutant General, it was 4,783. The mean enlisted strength of the Army for the same year (American troops, white and colored) by sick and wounded reports was 93,262, and on the returns of The Adjutant General's Office, 94,729. Vital statistics in peace times are figured on the Surgeon General's strength, The Adjutant General's figures being utilized only incidentally. It is also important to remember that the latter figures are not a daily strength but the strength at the end of each month, and consequently could not be used without error in peace; in war, their use would prove even more misleading, especially during periods characterized by great and rapid gains or losses in strength. Certain losses of individuals, viz, killed in action, deaths not at military stations, discharges for disability and retirements, are reported only to The Adjutant General, and these must be taken into account in checking peacetime, as well as war-time, vital statistics.

During the World War the detached list was relatively small, so small that no material error due to this cause resulted. Every effort was made to secure the monthly sick and wounded reports, mentioned above, from home troops, and in the main this was very successfully accomplished. When reports of this character were not received they were demanded by letter or often by telegram from the Surgeon General's Office. The principal difficulty encountered at home was due to the necessity for secrecy, the departure of organizations for service overseas frequently not being learned by the Surgeon General's Office for weeks. When finally learned, however, it was possible to straighten out matters satisfactorily. At home, The Adjutant General's strength figures also were used, but only as checks and for rather minor details. Like methods were in successful operation for troops in our tropical commands. During the demobilization period, at home, as will be seen later, some further use had to be made of The Adjutant General's figures.

From the present point of view, strength data were by no means so satisfactory for the American Expeditionary Forces,[a] nor, as it proved, were strength figures always obtainable thence through the same reports, i. e., identical forms. In the early part of the war, May, 1917, to December, 1917, since Form 51, as part of monthly reports of sick and wounded, was rendered the Surgeon General's Office from the American Expeditionary Forces, this form was utilized for strength data in the same way as like reports at home were used. Through the greater liability to error in reports from a force in campaign, with a constantly changing strength, it was found much more necessary, in the Surgeon General's Office, to check the strength for troops overseas, as given on Form 51 with The Adjutant General's strength at the end of each month, than was the case for troops at home. When Form 53 replaced Form 51, as was sometimes the case, The Adjutant General's strength figures were used. It was found practicable to use Form 51 exclusively for the month of December, 1919, the last month covered by these statistics. In the meantime, from January, 1918, to November, 1919, inclusive, another plan had to be followed for the American Expeditionary Forces. This was due to the fact that for this period strength was not obtainable from reports made to the Surgeon General. While Form 51 was not abolished in the American Expeditionary Forces until the middle of 1918, it was so often not received in the Surgeon General's Office

[a] This term as used here applies to our forces in Europe, excluding North Russia and Siberia.

for the earlier months of 1918 that it could not be relied upon for strength. On June 15, 1918, Form 51 was done away with in the American Expeditionary Forces; thenceforth the form rendered gave no strength figures. The Adjutant General's figures, therefore, had to be relied upon for the American Expeditionary Forces from January 1, 1918, to November 30, 1919, the strength taken being that of the last day of the month. The error (strength at the end of month instead of daily strength) was constant, of course, for the period in question.

Transports afforded the poorest figures of all for strength, and those utilized here are only estimates, based on the best sources of information available. These estimates were made in the following manner: From May, 1917, through November, 1918, from reports of organizations leaving the various posts and camps of the United States, supplemented by the meager reports received from transports; from December, 1918, to November, 1919, inclusive, from reports to the sanitation division of the Surgeon General's Office of the demobilization of troops in the United States, supplemented by reports of organizations serving in the United States and in countries other than Europe, and by the very meager reports of troops traveling on transports.

Strength for troops in Siberia was obtained from monthly reports of sick and wounded (Form 51) sent to the Surgeon General; for troops in Russia, from The Adjutant General's reports, the strength being that of the last day of the month. While strength figures were better than sick and wounded figures, as will be seen later, vital statistics for these two commands were very poor on account of incomplete reports.

STRENGTH OF TOTAL ARMY.

For this, as well as for all other strengths, the reader is referred to the tables covering the subject. It will be found, in the main, that these tables, with their footnotes, are self-explanatory. This renders extended detailed explanation superfluous. On the other hand, on account of the complicated nature of the subject, it has been deemed best, even at the risk of repetition, to discuss here all details which might possibly not be understood solely from study of the tables.

The strength of total Army by months, all countries, for officers and enlisted men, white, colored, and native, is found in Table 1. It is apparent from this table that the increase in strength of officers was coincident with that for white enlisted men, but the great increase in negro troops did not begin until the late spring and the summer of 1918. The demobilization decline was more rapid for negroes than it was for either white enlisted men or for officers. In other words, the negro troops on an average came in later and were demobilized earlier, and consequently were in the military service, on the average, for a shorter period of time.

STRENGTH OF ARMY, UNITED STATES AND EUROPE.

This is shown in Table 2. As stated, the strength on the last day of each month was used for a long period in Europe. This resulted in lowering the sick rates for the period during which the troops were going to Europe, since the

monthly strength used then (end of month) was above the average for the month in question. On the other hand, it resulted in raising the sick rates for the period during which troops were returning to the United States, for then the strength at the end of the month was below the average for the month. For the entire period, while no one month was exactly correct, the monthly excesses probably were equalized more or less by the monthly deficits.

Separate strengths for white and colored troops were not furnished in Europe. It is obvious that, for vital statistics, white and colored should be considered separately. During the calendar year, 1917–18, it was possible to obtain a very fair estimate of the number of colored troops in Europe from month to month, from the estimated number of departures of these troops from posts, camps, etc., in the United States, as shown by their monthly sick and wounded reports, with such additional information as could be obtained from the unsatisfactory reports furnished from transports. When these troops were returning to the United States from Europe, it was impossible to obtain the same data as bases for estimating the separate strengths for white and colored troops remaining in Europe. The estimate then was based on total colored strength, the strength of colored other than in Europe, and on reports of demobilization.

While the white and colored strengths in Europe are believed to be fairly close approximations they must be accepted only as close estimates, and, since much more accurate strengths were obtained in the United States for white and colored troops separately, deductions based on the United States figures would probably be much more significant than for white and colored in Europe.

STRENGTH BY COUNTRIES.

Strength by countries for total Army is given in Table 1. The same information for enlisted men—white, colored, and native—is given in much more detail in Tables 3, 4, and 5. Attention has already been invited, in discussing Table 1, to the differences in the times of mobilization and demobilization of the various classes of troops; Tables 3, 4, and 5 also show this. During the spring and summer of 1918, while the strength of the total Army rose rapidly, there was comparatively little increase in the United States, since troops were then being sent to Europe, where the rise was rapid in consequence. Meanwhile, the strength of the camps in the United States, while not increasing, was being maintained by recruits sent to them who were then trained and sent abroad as the emergency required. Porto Rican troops increased from a strength of 1,444 in April, 1917, to a maximum of 16,664 in November, 1918; Filipino troops from 5,430 in April, 1917, to a maximum of 7,837 in October, 1918 (monthly mean); and Hawaiian troops, which were organized during the war, which attained to a monthly mean strength of 7,058 for December, 1918. Native troops served only in their own country, save Porto Ricans, who served also in Panama, as shown by Table 5.

STRENGTH BY AGE.

The basic information for strength by age was obtained from Army Anthropology (Vol. XV, Statistics, Part One, Table 2, p. 64). This information was obtained originally from the records of the Bureau of War Risk Insurance,

which had the ages given by 3,673,133 applicants for War Risk Insurance, including officers as well as enlisted men.

It should be noted that the age given is usually that of entry into the service, and that the figures apply only to the applicants above mentioned.

STRENGTH OF OFFICERS AND ENLISTED MEN IN THE UNITED STATES BY SPECIFIED CAMPS AND BY STATES (OTHER CAMPS AND POSTS).

The strength of special large camps, and of officers and men not stationed in these large camps but elsewhere in the United States, is shown in Table 7. Officers and men not stationed in these large camps were classified by individual State where stationed, no account being taken of the individual stations within the particular State concerned. While, as mentioned elsewhere, the strength of the large camps was taken from monthly reports of sick and wounded made by senior medical officers to the Surgeon General, at certain camps during the period of rapid demobilization in 1919 it was found by the Surgeon General's Office that some officers and enlisted men were not being so reported from the camps in question; strength figures for these camps, therefore, were increased in the Surgeon General's Office, for the time being, by estimates based on demobilization figures.

The tables which follow Table 7, and the accompanying graphs, go in detail into the matter of strengths by location in the United States.

STRENGTH BY ARMS OF SERVICE AND BY MONTHS, TOTAL OFFICERS AND ENLISTED MEN, AMERICAN EXPEDITIONARY FORCES, 1918.

Strength by arms of service, American Expeditionary Forces (Table 44), has been calculated only for the year 1918. As will be seen later, this strength was used to figure casualties by arms of service. As practically no battle casualties occurred in the American Expeditionary Forces save for the year 1918, no statistics of this character have been computed for the only other year involved, 1917, the very few casualties (60 wounded and 15 killed in action) for that year being arbitrarily carried forward into 1918.

STRENGTH, RUSSIA AND SIBERIA, 1918–1919.

As will be apparent when the tables giving vital statistics for troops in these two commands are consulted, the figures are of little value; however, in the interests of completeness strength Table No. 45 has been made.

SICK AND WOUNDED DATA.

During the World War preparation of individual records of sick and wounded was, as it still is, solely a function of the Medical Department. The forms used for this purpose when we entered the war were originally authorized to be effective January, 1905. They were the report cards (Form 52, Medical Department), report sheet for report of sick and wounded (Form 51, Medical Department), and the nominal check list (Forms 51*a* and 51*b*, Medical Department). Taken together, these constituted a monthly report of sick and wounded made to the Surgeon General.

The method of reporting sick and wounded in vogue when we entered the World War, as prescribed in the Manual for the Medical Department, and as

carried out at home (and practically everywhere else save in the American Expeditionary Forces), throughout the war, is described in Appendix I.

No forms other than those which have been mentioned were used for reporting sick and wounded in peace and they were to be retained in war, save under circumstances which will now be explained.

For war, the Manual for the Medical Department prescribed two additional forms: (1) Diagnosis tags; (2) List of sick and wounded (Form 53).

Diagnosis tags were used in our service for many years before the World War. The Manual for the Medical Department (see Appendix I, pars. 567 and 575, inclusive) prescribed that mobile troops or commands in the theater of operations in time of war should use diagnosis tags, when first aid was given, and should attach them to the bodies of killed in action, examined by the Medical Department personnel. These tags, originals and duplicates (retained in a book from which the originals were torn), were to be collected and forwarded to the Surgeon General's Office, through the chief surgeon. They were of material importance in checking Form 52 and the field medical card (adopted June 15, 1918).

A list of sick and wounded (Form 53, Medical Department) authorized on February 18, 1916, was provided, but only for the use of mobile troops or commands in the theater of operations in time of war, and in lieu thereof the regular peace report of sick and wounded. This form corresponded in size and ruling to "The returns of casualties" (Form 1490, Adjutant General's Office, edition of August 25, 1917). No space was provided on Form 53 for recording the age, nativity, and color of the patient, nor were provisions made for recording the strength of the organization reported upon, or for the movement of (changes in) the command during the month.

The prescribed method of reporting sick and wounded as outlined above was thought to be inadequate for use in the American Expeditionary Forces, and a board of medical officers serving overseas was appointed to consider a revision of the method then in force. This board recommended that the prescribed method be modified for the American Expeditionary Forces. The recommendation received the approval of the commanding general and was published as regulations for "Sick and Wounded Reports for the American Expeditionary Forces," to become effective June 15, 1918. (See Appendix II.)

The principal differences in the method thus adopted from the one previously prescribed follow:

(*a*) The daily report of casualties and changes (Form 22, A. G. O., A. E. F.; Figs. 7 and 8), on June 15, 1918, replaced the list of sick and wounded (Form 53). The former was not used by the Surgeon General's Office. Report sheets (Form 51) and field reports, Forms 83, 84, 85, 211, were discarded. The latter, while Medical Department forms, had no reference to sick and wounded, and will not be referred to again.

(*b*) A field medical card then adopted was a report and a transfer card, made for each patient at the first dressing station or hospital and sent with him in a paper envelope when transferred, preferably attached to his clothing. Appropriate notes showing operations, complications, and other data were recorded on this form at each hospital he entered. The diagnosis tag was required to be placed in the envelope containing this card. The field medical

card remained with the patient until his final disposition in Europe, or, in case of transfer to the United States, until he arrived at the hospital designated for his treatment there.

(*c*) Form 52 was still used, but in the American Expeditionary Forces only hospital cases were so reported. Furthermore, the use of Form 52 was confined to one hospital, the last one in which the patient was treated in Europe prior to transfer to the United States, or to any other disposition, as death, or duty. For every case finally so disposed of in Europe, a report card (Form 52, A. E. F.) and a field medical card were forwarded to the Surgeon General through the chief surgeon, American Expeditionary Forces, at the end of the month; but for every case transferred to the United States, a report card only was forwarded to the Surgeon General, the field medical card being sent with the patient to his hospital. As a matter of fact, many of the latter were lost in transit from the American Expeditionary Forces.

(*d*) No cases treated in quarters or in infirmaries were reported, nor was any case reported which was carded for record only.

One further difficulty occurred abroad. In Europe (exclusive of North Russia), in North Russia, and in Siberia some of the American sick and wounded were treated not by our own medical officers but in the allied hospitals. Efforts were made by the medical authorities to secure from these hospitals accurate records of all such cases. A central office was established in Paris, and many such records were collected and forwarded to the Surgeon General's Office. Judging, however, by the incomplete character of some of the records received, it is probable that for a part of the admissions to these hospitals, and for some of the deaths which resulted, no records were received.

The greatest difficulty encountered was in obtaining accurate records from troops traveling on transports. This was due to the fact that Army medical officers were not generally in medical charge on transports, and no arrangements were made with the Navy, or with civilian transport surgeons, for medical reports for sick Army personnel en route. As a result the reports of the sick and wounded obtained from transports were practically worthless. The inadequacy of these transport reports during the influenza epidemic in September and October, 1918, probably accounts in great part for a discrepancy (amounting to 1,649) in the number of deaths from disease reported by The Adjutant General and by the Surgeon General as having occurred in the American Expeditionary Forces and on transports. It is only fair to say, however, that a part of the discrepancy is probably attributable to the inability of our medical authorities to obtain records of all deaths which occurred among our men in the hospitals of our allies.

METHODS OF ASSEMBLING STATISTICAL DATA IN THE SURGEON GENERAL'S OFFICE.

METHOD OF ASSEMBLING STRENGTH DATA.

All pertinent data with reference to strength were collected from The Adjutant General's Office and from the Provost Marshal General's Office, in the medical record section of the Surgeon General's Office; there they were carefully studied by experienced clerks under the direct supervision of the officer in charge. As explained elsewhere, their figures were utilized for strength

tables in so far as the Surgeon General's better figures for vital statistical purposes were not available. When the Surgeon General's figures covered strength, it was a matter of very simple mathematics to obtain from them strengths in gross and in detail. Certain estimates of strength were also made in this branch of the medical record section.

METHOD OF ASSEMBLING SICK AND WOUNDED DATA.

From what has been said it will be understood that for each Army patient there was made a report card or cards covering his sicknesses or wounds, and that these cards were sent monthly to the Surgeon General's Office. Compiling statistics from such cards then consisted merely in assembling and counting the cases in gross and in detail, though this process might and actually did prove very complicated. Before the war the report cards were first filed by post or organization. After the disease numbers (International Classification) had been entered on the individual report cards, each case was assembled by following it through all report cards made for it. Great statistical sheets were then utilized for transcribing the case records numerically from the individual report cards, and thus were compiled the vital statistics to be finally published in the Surgeon General's annual reports. Counting was done by hand.

The method of filing the report cards in the Surgeon General's Office was changed in October, 1917. Subsequent to that time all report cards received from any source in the Army were arranged in one general alphabetical file, in dictionary order, by surnames. Surnames were subdivided by Christian names, and similar Christian names by age, nativity, etc. All of the cards, or at least a large percentage, for a given case were brought together before any attempt was made to utilize their data. Inasmuch as it was necessary to prepare the statistical tables for the Surgeon General's annual reports from each year's material, it was not possible to assemble all the record cards for the war in one file before attempting to compile the statistics. Consequently this work was done by card groups for three or four months as the cards were assembled and alphabetized. An effort was made at the beginning of the work to use only the cards for completed cases, taking out all cards for incomplete cases, and placing them in a file to be worked later. This plan, however, involved so much additional labor in rearranging the cards that it had to be discontinued. Subsequently all report cards in every file were used, the disposition being shown as incomplete when necessary.

By regulations a report card (Form 52) was furnished for every case completed in hospital or in quarters, or carded for record only, during the current month, and for all patients remaining on sick report at the end of the month in which admitted, a second report card being required for the month in which the case was completed when more than one month was involved. For the purposes of the annual reports, on December 31 of each year a report card was required also for every patient remaining on sick report on that date. Very frequently, however, several cards in addition to those mentioned were ultimately received for cases of chronic character admitted to sick report several times, and especially for such cases originating in the field or overseas, for whom many transfers were involved. As the space on Form 52 is necessarily

limited, frequently nearly all of it was used for entering the case record, very little being available for other purposes. Moreover, these cards are permanent War Department records, to be used for obtaining information needed in adjusting claims against the Government for disabilities resulting from disease contracted or injuries occurring while in the military service. Aside from other reasons, this alone was sufficient to prevent the medical record section of the Surgeon General's Office from placing any confusing or disfiguring marks, such as code numbers, on the report cards.

It was apparent also that while directly transcribing the information on the report cards to great statistical sheets by hand, as had been the practice in peace, was fairly satisfactory for the statistics of a small army, this system was entirely too time consuming for such a large force as it was certain the country would soon have.

Steps were immediately taken, therefore, to change the system in vogue when, in October, 1917, the medical record section was organized.

With the radical change in system made at that time, the report cards remained the source of all information for individual records of disease and injury which, taken together, still constituted the basis for the vital statistics of our Army. But between the report cards and completed statistics an elaborate machinery was installed and operated. For this a code book, statistical perforated cards, and the Hollerith equipment were adopted.

A code was prepared which was so comprehensive that, after the data on the report cards had been coded, vital statistical information of practically any character could be obtained. Competent medical officers, and especially the distinguished representatives of practically every branch of medical science, who at the time were stationed in the Surgeon General's Office, assisted materially in the preparation of this code. The code book used in the Bureau of Medicine and Surgery, United States Navy, was also freely consulted. A medical officer recently returned from France brought with him samples of the statistical perforated card recently adopted by France; also the outline of the coding system which the French proposed to use. These were also used freely. The result was an elaborate coding book for diseases and traumatisms.

The code having been adopted—and this suffered but slight change during the war—the next step was to prepare a code card adapted for use with the Hollerith equipment. The code cards used were not exactly the same throughout the war. At the beginning, or for the nine months of 1917, both statistical code and perforated cards were used, one of each being employed for each medical and for each surgical case. What these were will be apparent by consulting Figures 14 and 15. Thereafter no statistical code card intervened between report card, Form 52, and perforated card. Limitation of space on the perforated cards still made it necessary to have one such card for medical cases and one for surgical cases (See Fig. 16). The life history and military status were of course the same for both these cards.

The card finally adopted had 45 columns of figures arranged to correspond with the subdivisions of the report card, Form 52. In the further discussion of the mechanics of preparing the statistics only the final statistical perforated card will receive consideration.

The actual steps in the plan finally adopted were as follows:

(1) Penciling the code numbers from the code book on the statistical perforated card in accordance with the entries on the report card which was consulted for the purpose. (It will be noted that in the illustration given, Fig 16, these numbers have been typewritten; this was not the practice, however. They were actually entered by pencil.) The clerks engaged in so entering the code numbers were known as "coders," and were of two, or rather three, classes; nonprofessional and so-called professional coders, the latter being subdivided into medical and traumatism coders, depending on whether they coded medical or surgical data. The so-called professional coders were not physicians, but older and more experienced clerks.

(2) The perforation of the code card by clerks, known as "punchers," was the next step.

The coders, in addition to transferring the information on Form 52 to the statistical perforated card, placed on the latter the Army serial number of the patient concerned. This was made the practice as soon as the War Department adopted serial numbers for Army personnel, which was early in 1918. This acted as a cross reference, so that no difficulty was subsequently experienced in connecting the original report card with the statistical perforated card in case of suspected error, readmission, etc. Much difficulty in this respect had previously been experienced.

Reference has been made above to a multiplicity of cards arriving at the Surgeon General's Office covering a case that had run a very long course. To keep track of these cases a space was provided on the statistical perforated card for cases remaining in hospital. Also provision was made on this card for a readmission record so that all subsequent records of a given case if returned to hospital for further treatment could be linked up with the original disease or injury. Statistical perforated cards were made for men killed in action from nominal lists furnished by The Adjutant General's Office.

Still another form used in the Surgeon General's Office remains to be described. This was the transcript card. In a way this form assumed the place of Form 52. That is to say, it was used, when Form 52 was not made, to transcribe data of individual cases from the list of sick and wounded, Form 53.

EXPLANATION OF TERMS AND METHODS USED.

(1) *White* is synonymous with Caucasian, but all are classed as whites save negroes, and natives enlisted or inducted outside of the United States.

(2) *Negro* is used interchangeably with colored.

(3) *American* troops include both white and negro troops, no distinction being made for Indians, Chinese, Filipinos, etc., inducted or enlisted in the United States.

(4) *Troops* is used as synonymous with enlisted men.

(5) *Strength* means the military population. Thus, if the annual strength of a camp is shown as 1,000, the interpretation is that there was an average of 1,000 men in the camp for every day of the year. Strength as used in this volume is reduced to a mean annual or a mean monthly basis.

(6) *Mean monthly strength* is the daily average strength for the month.

(7) *Mean annual strength* is the total of the monthly strengths divided by 12. This was generally satisfactory for purposes of comparison, but one false result of using mean annual strengths for comparing one camp with another must be pointed out. In camps occupied only or largely during epidemic periods, converting their strengths to mean annual strengths and then comparing them with camps occupied throughout the year gives a very incorrect result. Comparison by period of epidemic is of course the correct method.

(8) *Total of mean annual strengths.*—Ratios are figured throughout on total of mean annual strengths, April, 1917, to December 31, 1919, inclusive.

(9) *Cases, admissions, readmissions, and concurrent diseases, complications and sequelæ.*—The main tables in the present volume are based on records of admissions and not on those of cases. That is to say, while it is true, all admissions represent cases, on the other hand they do not give the total case incidence as it did not prove practical to record in them cases which coexisted at the time of admission or which occurred while a patient was on sick report. These coexisting affections and the subsequent affections in the course of a patient's stay on sick report might or might not have had any relation to the primary cause of admission. At all events, as already explained, they were not made of record in the main tables. A supplementary table has been prepared, however, entitled "Concurrent diseases, complications and sequelæ," which gives for each disease recorded as a primary cause of admission for enlisted men in the United States and Europe, such affections as coexisted and as occurred while men were on sick report.

The term admissions refers to admissions by original cause of admission. It includes: (*a*) All patients reported as treated in hospital; (*b*) all patients reported as treated in quarters and excused from military duty, when still attached to a combat organization, staff detachment, development battalion, or convalescent camp; (*c*) all patients reported as carded for record only when treated and not excused from duty, but whose disease or injury was of such character as to have a probable bearing upon their future physical fitness for military service; (*d*) all deaths; (*e*) all discharges for disability for enlisted men or retirements for disability for officers. Only one cause of admission was made of record as such. Furthermore, if a soldier with influenza subsequently developed lobar pneumonia, then purulent pleurisy, and finally tuberculosis, only one was counted, the cause of the primary admission. This plan was followed on the ground that the purpose of this statistical study was primarily to determine the number of men excused from military duty by original cause of disease, and not the number of cases of the various diseases treated.

The statistics, naturally, include only admissions and cases for which report cards were made and sent to the Surgeon General. A large number of men, not excused from military duty, were treated in military hospitals and dispensaries and were not so reported upon. These were mainly men treated for minor illnesses and injuries, for errors of refraction or other eye conditions, and for minor diseases of the ear, nose, and throat.

Readmissions were not counted as admissions. Thus, if a man admitted to hospital with measles was returned to duty and was subsequently readmitted within a very few days on account of otitis media considered to have resulted from the attack of measles, the second admission was charged to the measles,

the otitis media being shown as the complication. And only in Table 82 the final disposition, whether the man was returned to duty, died, or was discharged for disability, and the time lost, was charged to measles. Or, if a case of gonorrhea was detected and reported, the man not being excused from duty but receiving treatment while doing full duty, and the man subsequently developed a complicating epididymitis for which he was admitted to hospital, the entire time lost and the disposition was charged to the original admission for gonorrhea, the epididymitis being shown as the complication and only in Table 82.

(10) *Days lost and noneffective rate.*—Attention is invited to the fact that the days lost were credited to the original cause of admission. Noneffective rate shows the average number of men absent from duty for each day of the year. Thus, the noneffective rate, expressed as 25 per 1,000, means that for each day of the year there was an average of 25 men absent from duty on account of sickness out of each 1,000 strength; in other words, 2.5 per cent were unfit for duty.

(11) *Deaths and discharges for disability.*—For the vital statistics for the Surgeon General's reports, as published for the years 1909 to 1916, inclusive, the absolute numbers of deaths and discharges for disability for troops in the United States had been given in two columns. The first included all deaths or discharges for disability which occurred in the United States; the second included only deaths or disability discharges which were the result of cases that originally developed or became apparent in troops serving in the United States. In the same way, two columns were shown for American troops serving outside of the continental limits of the United States. The first column showed the number of deaths and discharges for disability which actually occurred in each country concerned, and the second column included cases which had been invalided to the United States, and in which deaths or discharges ultimately occurred there. At this time, in all instances, however, the ultimate disposition was charged to the month and the year in which it actually occurred. The place ratios, which were shown, were based on the second column of the absolute numbers.

This plan of double columns was abandoned during the war, and in handling the vital statistics of the war every effort was made to charge all discharges for disability, deaths, and time lost, to the original causes, places, and times of occurrence of primary admissions. This was done and tables were made, not only for all troops for the entire war period but for white and colored troops separately, in the United States and Europe, by months of original admission, and for those in the United States by definite camp or State location. The only exception made to this practice was due to the fact that sometimes it was not found possible to charge all suppurative pleurisies (empyema) and other very long-continued cases back to original cause of admission; of necessity these were charged to final condition.

This method of charging deaths to times and places of occurrence of the original admissions renders it difficult to compare the death rates so compiled with those of the Army in previous wars and with those of civil life, in which deaths and discharges are charged to the actual times and places of occurrence.

The epidemiological advantages of the system, however, were believed to outweigh the disadvantages.

It should also be noted here that deaths from operations done for removal of defects have been charged to the defects and not to the operations.

(12) *Rates* used are annual *ratios per thousand*, with the exception of the case fatality rates, which are expressed in percentages.

(13) *Injuries.*—Nonbattle injuries are included in the general tables. This is not the case with battle injuries, which are tabulated separately.

(14) *Classification.*—The diagnostic terms used and the numbers therefor are those of the International Classification of the Causes of Death, with terms for morbidity in addition. The grouping of this classification has been changed, but its numbers have been retained. For the classification of joint causes of death, it being practicable to specify only one cause, though two or more conditions actually existed and might have been responsible for the death, the international rules were used as a guide.

SECTION II.

TABLES.

TABLE 1.—*Strength of total Army, by months, all countries, officers and enlisted men, including white, colored, and native troops, Apr. 1, 1917, to Dec. 31, 1919, inclusive.*[a]

Year and month.	Officers.				Enlisted men.			Total.		
	In United States.	In Europe.	In all other countries.[b]	Total.	White American troops.	Colored American troops.	Total American troops.	Enlisted native troops.	Officers and enlisted men, American troops.	Officers and enlisted men, including native troops.

[a] Daily average strength for each month. Source of information: Monthly reports of sick and wounded to the Office of the Surgeon General.

[b] Source of information: From May to December, 1917, and for December, 1919, from the monthly reports of sick and wounded to the Office of the Surgeon General, with corrections made by comparison with the strength for the last day of the month as furnished by the Office of The Adjutant General. From Jan. 1, 1918, to Nov. 30, 1919, inclusive, from the office of The Adjutant General, the strength being that as of the last day of the month. Separate strengths for the white and colored enlisted men from Jan. 1, 1918, to Nov. 30, 1919, estimated, the estimation being based, for 1918, on the reports of organizations leaving the United States, supplemented by such meager reports as were received from troops traveling on transports; for 1919, on reports of the demobilization of troops, furnished to the Sanitation Division of the Surgeon General's Office, supplemented by a consideration of the strength of the colored troops serving in the United States and in all countries other than Europe.

a Daily average strength for troops in the United States, Philippine Islands, Panama, and Hawaiian Islands. Source of information: Monthly reports of sick and wounded to the Office of the Surgeon General.

For data concerning the strength for white troops in Europe, see footnote (*b*), Table 2.

The strength for the troops traveling on transports was estimated, the estimation being based, from May, 1917, through November, 1918, from reports of organizations from the various posts and camps in the United States, supplemented by the meager reports received from transports; from December, 1918, to November, 1919, inclusive, on reports furnished to the Sanitation Division of the demobilization of troops in the United States, supplemented by reports of organizations serving in the United States and in countries other than in Europe, and by the very meager reports of troops traveling on transports.

Strength for troops in Russia and Siberia obtained, for troops in Siberia, from monthly reports of sick and wounded to the Office of the Surgeon General; for troops in North Russia, Archangel district, from The Adjutant General of the Army, through the office of the Chief of Staff, the strength being as of the last day of the month.

b Includes China. (These troops were part of the Philippine command.)

c Includes "Country not stated."

[a] Strength for the United States, Philippine Islands, and Hawaiian Islands is the mean average daily strength. Source of information: Monthly reports of sick and wounded to the Office of the Surgeon General. For source of information of strength of troops in Europe and on transports, see footnote, [b], Table 2, and footnote [a], Table 3.

[b] Includes China. (These troops were part of the Philippine command).

[c] Includes "Country not stated."

[a] Daily average strength for each month. Source of information: Monthly report of sick and wounded to the Office of the Surgeon General.

[b] Strength for months in 1919, during demobilization period, increased by estimates based on demobilization figures.

[c] Includes entire State of Oklahoma, Sept. 1, 1917, to Dec. 31, 1918, inclusive.

[d] Includes entire State of Kansas, Sept. 1, 1917, to Dec. 31, 1918, inclusive.

TABLE 8.—*Strength of specified camps, total enlisted men, by months, Sept. 1, 1917, to Dec. 31, 1919, inclusive*—Continued.

Total	1,406,345	1,684,264	1,850,489	1,910,934	1,816,180

[a] Includes Field Artillery, Heavy Artillery, and Corps Artillery.
[b] Includes Transportation Corps, light, railroads and roads, construction and forestry, engineers and trains, engineers special service, and engineers service battalions.
[c] Includes pioneer Infantry, machine-gun battalions.
[d] Includes ammunition trains, quartermaster labor, Motor Transport Corps, stevedores, supply trains, and Quartermaster Corps.
[e] Excludes Air Service.
[f] Includes division headquarters and headquarters troops, train headquarters and military police, staffs, executive services, Army Service Corps, anti-aircraft machine gun, and arm of service unknown.

Source of information: Monthly returns of the strength of the American Expeditionary Forces from the adjutant general of the American Expeditionary Forces to The Adjutant General of the Army.

It will be noted that these figures do not exactly accord with those given for total strengths in Europe. The error is not material for the purposes of the present table.

Aviation and Signal Corps were not reported upon separately for the first five months of the year. During these months, while figures for the two taken together are correct, they are probably not exactly so for each.

[a] Deaths which occurred as the result of operations done for the removal of defects are charged to the defects. In some instances deaths have been wrongly charged to troops or localities for which no admissions or too few admissions are shown in other tables. This was due to clerical error which it is not now practicable to correct, and applies also to detailed tables which appear later. The number of deaths so involved is only 19. The total number of deaths is not affected by the error in question.

[b] Includes total strength for "Other countries and not stated."

Source of information: Medical reports to the Surgeon General's Office.

[a] Includes 9,710 men in the United States discharged from draft after a few days observation in camp. In some instances discharges for disability have been wrongly charged to troops or localities for which no admissions or too few admissions are shown in other tables. This was due to clerical error which it is not now practicable to correct, and applies also to detailed tables which appear later. The number of discharges for disability so involved is 1,406, nearly all of which (1,362) are in "Other countries and not stated." The total number of discharges for disability is not affected by the error in question.

[b] Includes total strength for "Other countries and not stated."

Source of information: Medical reports sent to the Surgeon General's Office.

white, colored, Filipino, Porto Rican, and Hawaiian, Apr. 1, 1917, to Dec. 31, 1919, inclusive.

[a] In some instances days lost have been wrongly charged to troops or localities for which no admissions or too few admissions are sho other tables. This was due to clerical error which it is not now practicable to correct. The number of days lost so involved is 5,995 distri throughout the table in small numbers. The total number of days lost is not affected by the error in question.

[b] Includes total strength for "Other countries and not stated."

TABLE 52.—*Days lost, by countries, including transports, officers and enlisted men, white, colored*

ABSOLUTE NUMBERS.

International classification No.	Cause.	Officers, other countries.	American troops in othe						
			Philippine Islands.			Hawaii.			Panama
			White.	Colored.	Total.	White.	Colored.	Total.	White.
	VIII. *Ear, diseases of.*								
76a	Otitis media	323	1,943	748	2,691	876	84	960	2,588
76b	Mastoiditis		65		65	49	25	74	205
76c	Otitis externa	48	503	14	517	43	1	44	421
76d	Defective hearing (cause not stated)					109		109	70
76e	Ear, other diseases of	8	31	150	181	129	1	130	4
	IX. *Nasal fossæ, diseases of.*								
86a	Adenoids	4	21	39	60	261		261	2
86b	Deviation of nasal septum, and spurs	224	180	56	236	560	21	581	1,218
86c	Nose, external deformity of					36		36	3
86d	Turbinate hypertrophy	60	118		118	753	101	854	146
86e	Sinusitis (all)	409	477	47	524	472	31	503	307
86f	Polypus, nasal	12	4		4	18	1	19	48
86g	Perforated nasal septum								
86h	Rhinitis (cause not stated)	258	547	204	751	361	79	440	564
86i	Nasal fossæ, other diseases of	13	47	14	61	26	8	34	11
	X. *Throat, diseases of.*								
87a	Laryngitis, acute catarrhal	127	110	22	132	294	20	314	84
87b	Larynx, other diseases of								4
100a	Tonsillitis, acute	977	3,381	853	4,234	3,638	468	4,106	3,499
100b	Tonsillitis, chronic	267	1,034	169	1,203	1,491	173	1,664	872
100c	Tonsils, focal infection from								
100d	Pharyngitis, acute catarrhal	449	859	125	984	815	156	971	393
100e	Pharynx, other diseases of	123	491	53	544	107	4	111	42
	XI. *Circulatory system, diseases of.*								
77	Pericarditis		126		126				
78	Endocarditis, acute		10		10				
79a	Valvular diseases of the heart	583	1,616	86	1,702	2,286	150	2,436	508
79a	(1) Aortic insufficiency		147	37	184	182	110	292	168
79a	(2) Aortic stenosis		113		113				
79a	(3) Mitral insufficiency	467	1,094	49	1,143	1,632	40	1,672	141
79a	(4) Mitral stenosis	60	170		170	270		270	107
79a	(5) Combined lesions, mitral aortic		19		19	148		148	90
79a	(6) Pulmonic lesions					54		54	
79a	(7) Tricuspid lesions								2
79a	(8) Valvular lesions, unclassified	56	73		73				
79b	Cardiac hypertrophy		5	22	27	157		157	29
79c	Cardiac dilatation	18	25		25	24	1	25	12
79d	Myocarditis and myocardial insufficiency	295	303	312	615	175		175	12
79e	Heart, other organic diseases of		417	74	491	94		94	
80	Angina pectoris	2	9		9				
81a	Aneurysms					7	8	15	
81b	Arteriosclerosis and hypertension	40	15		15	270		270	55
81c	Aortitis								
81d	Arteries, other diseases of	33				94		94	
82	Embolism and thrombosis	18	9		9				
83a	Hemorrhoids	512	1,868	650	2,518	1,154	193	1,347	1,563
83b	Varicocele	151	1,667	135	1,802	664	26	690	2,224
83c	Varicose veins	994	461		461	1,461		1,461	620
83d	Phlebitis		58		58	160	127	287	68
84a	Status lymphaticus								
84b	Lymphatic system, other diseases of	211	2,616	874	3,490	2,120	379	2,499	7,710
85a	Cardiac arrhythmias	60	270	29	299	86		86	11
85b	Cardiac murmurs, not organic	127				9		9	31
85c	Cardiac disorders, functional	13	420	5	425	254	18	272	169
85d	Bradycardia		13	6	19				
85e	Heart-block								
85f	Tachycardia	297	321	66	387	530		530	155
85g	Hemorrhage	32	27	2	29	6		6	8
85h	Circulatory system, other diseases of	5	79		79	42		42	
	XII. *Respiratory system, diseases of.*								
89–90	Bronchitis	3,101	7,089	559	7,648	6,934	818	7,752	5,739
91	Pneumonia, broncho-	617	404	109	513	251	117	368	166
92a	Pneumonia, lobar	685	1,408	185	1,593	1,529	329	1,858	133
93a	Pleurisy, suppurative	13		527	527	201		201	
93b	Pleurisy, serofibrinous	13	554	172	726	253	56	309	253
93c	Pleura, other diseases of	174	1,137	121	1,258	504	9	513	415
95	Gangrene of lungs								
96	Asthma	373	341	240	581	1,575	182	1,757	73
97	Pulmonary emphysema	13	60		60	66		66	87

TABLE 55.—*Admissions, by months, white enlisted men in the*

ANNUAL RATIOS PER 1,000.

International classification No.	Cause.	Year, 1917.					
		April.	May.	June.	July.	August.	September.
	X. *Throat, diseases of.*						
87a	Laryngitis, acute catarrhal	8.95	11.00	5.43	1.75	1.73	1.72
87b	Larynx, other diseases of				.03		
100a	Tonsillitis, acute	93.98	87.60	70.79	43.57	41.35	33.46
100b	Tonsillitis, chronic	2.55	2.44	1.98	2.25	4.18	3.26
100c	Tonsils, focal infection from						
100d	Pharyngitis, acute catarrhal	17.63	15.20	11.37	6.20	5.01	4.95
100e	Pharynx, other diseases of	.26	.59	.31	.21	.32	.51
	XI. *Circulatory system, diseases of.*						
77	Pericarditis	.07	.10	.04	.10	.02	.08
78	Endocarditis, acute	.26	.05	.16	.08	.13	.11
79a	Valvular diseases of the heart	1.37	1.37	2.02	1.44	1.73	3.15
79a	(1) Aortic insufficiency	.26		.27	.18	.17	.37
79a	(2) Aortic stenosis	.07		.12		.06	.09
79a	(3) Mitral insufficiency	.98	1.32	1.51	1.12	1.39	2.16
79a	(4) Mitral stenosis	.07	.05	.12	.08	.11	.46
79a	(5) Combined lesions, mitral aortic						.02
79a	(6) Pulmonic lesions				.03		
79a	(7) Tricuspid lesions						.03
79a	(8) Valvular lesions, unclassified				.03		.02
79b	Cardiac hypertrophy	.13	.10	.12	.10	.21	.37
79c	Cardiac dilatation	.07	.10	.23	.16	.15	.12
79d	Myocarditis and myocardial insufficency	.52	.39	.47	.52	.49	.70
79e	Heart, other organic diseases of	.46	.54	.19	.18	.38	.66
80	Angina pectoris	.07	.20	.04	.18	.15	.19
81a	Aneurysms		.10		.03	.02	.03
81b	Arteriosclerosis and hypertension			.04	.08	.06	.15
81c	Aortitis						
81d	Arteries, other diseases of					.02	.02
82	Embolism and thrombosis	.07	.10	.12		.02	.05
83a	Hemorrhoids	4.64	4.94	5.82	6.07	6.40	6.88
83b	Varicocele	1.83	1.91	3.26	3.22	3.50	3.62
83c	Varicose veins	1.04	.59	.82	1.10	1.26	1.55
83d	Phlebitis	.13	.20	.08	.10	.17	.29
84a	Status lymphaticus						
84b	Lymphatic system, other diseases of	5.16	4.94	5.32	4.94	4.27	3.70
85a	Cardiac arrhythmias	.07	.05		.03		.06
85b	Cardiac murmurs, not organic			.04	.03		
85c	Cardiac disorders, functional	.07	.10	.23	.05	.15	.09
85d	Bradycardia	.07		.04		.11	.09
85e	Heart-block						
85f	Tachycardia	.91	.24	.50	.73	.62	.7
85g	Hemorrhage	.20	.10	.16	.08	.04	.0
85h	Circulatory system, other diseases of	.07	.10	.08		.06	.0
	XII. *Respiratory system, diseases of.*						
89–90	Bronchitis	71.64	55.87	33.26	19.25	27.77	33.7
91	Pneumonia, broncho- [a]	2.61	1.66	.85	.39	.66	.9
92a	Pneumonia, lobar	11.69	8.46	4.42	2.69	2.52	3.3
93a	Pleurisy, suppurative	.46	.20	.31	.18	.21	.1
93b	Pleurisy, serofibrinous	.98	.54	.89	.42	.62	.
93c	Pleura, other diseases of	4.05	3.42	2.91	1.67	3.11	3.
95	Gangrene of lungs			.04		.02	
96	Asthma	.65	.39	.62	.47	1.24	2.
97	Pulmonary emphysema				.03		.
98	Lungs, other diseases of	.33	.15	.39	.10	.32	.
	XIII. *Digestive system, diseases of.*						
99a	Pyorrhea alveolaris	.39	.24	.19	.42	.32	.
99b	Abscess, periapical, focal infection from						.
99c	Mouth and annexa, other diseases of	3.53	4.11	2.79	2.93	3.18	3.
101	Esophagus, diseases of						.
102a	Ulcer of the stomach	.33	.05	.08	.42	.41	.
102b	Gastroenteroptosis	.07		.04	.03	.06	.
102c	Stomach, other diseases of	8.23	9.87	11.68	12.00	15.67	14.
105a	Duodenal ulcer	.13	.05	.16	.16	.15	.
105b	Diarrhea	2.09	2.49	4.70	5.44	6.21	6.
105c	Enteritis and colitis	17.63	17.11	23.75	26.88	43.36	32.
106	Ankylostomiasis (uncinariasis, hookworm)	.46	.68	.35	.39	.75	.
107a	Ascaris lumbricoides		.10			.02	
107b	Cestodes	.39	.39	.16	.34	.30	.
107c	Intestinal parasites (others)	.07	.10	.12	.03	.04	.
108	Appendicitis	8.62	9.97	9.47	10.25	11.37	10.
109a	Hernia	6.01	5.28	5.86	7.24	6.55	9.
109b	Intestinal obstruction	.33	.20	.19	.16	.15	.
110a	Fistula in ano	.33	.73	.27	.60	.47	.
110b	Intestines, other diseases of	29.78	44.39	43.90	36.20	43.55	30.

[a] Includes pneumonia, unclassified.

United States, Apr. 1, 1917, to Dec. 31, 1919, inclusive—Continued.

ABSOLUTE NUMBERS.

International classification No.	Cause.	Year, 1919. January.	February.	March.	April.
	V. *Nervous system, diseases of (all).*				
60	Encephalitis				
61	Meningitis, simple	3	4	1	
62	Locomotor ataxia		1		
63b	Spinal cord, diseases of (others)		1	1	
64	Apoplexy				
66a	Facial paralysis	2	3	1	
66b	Paraplegia				
66c	Paralysis without specified cause (others)			3	
69	Epilepsy	16	8	12	1
74a	Jacksonian epilepsy				
74b	Neurasthenia	4	2	3	
74c	Enuresis	2	4	5	
74d	Neurosis	1			
74e	Neuro-circulatory asthenia (disordered action of the heart)	11	17	29	2
74f	Shell-shock (cause not given)				
73a	Hysteria and results (psychoses excepted)	6	11	9	1
73b	Neuralgia	12	8	5	
73c	Neuritis	5	7	13	1
74g	Nervous system, other diseases of	4	5	9	
	VI. *Mental alienation.*				
67	General paralysis of the insane	1	2	1	
68a	Constitutional psychopathic states	2	2	1	
68b	Mental deficiency	19	14	14	1
68c	Malingering				
68d	Dementia præcox	4	6	3	
68e	Psychasthenia			1	
68f	Psychoneurosis	4	2		
68g	Psychosis, alcoholic				
68h	Psychosis, manic-depressive	4	3	4	
68i	Psychoses (others)	13	13	23	
	VII. *Eyes and their annexa, diseases of.*				
75a	Refractive errors (all)	9	5	11	
75a	(1) Astigmatism	4	1	4	
75a	(2) Hyperopia	4	2	2	
75a	(3) Myopia	1	2	5	
75a	(4) Defective vision (cause not stated)				
75b	Strabismus				
75c	Leucoma		2	1	
75d	Cataract		1	2	
75e	Trachoma	1			
75f	Conjunctivitis (others)	44	20	26	
75g	Pterygium	3	1	5	
75h	Amblyopia			3	
75i	Amaurosis			2	
75j	Choroiditis	3	1	2	
75k	Iritis	2	4	7	
75l	Keratitis	9	17	24	
75m	Retinitis	1	1		
75n	Nystagmus				
75o	Glaucoma				
75p	Eyelids, diseases of	2	3	1	
75q	Color-blindness				
75r	Eyes and annexa, other diseases of	16	3	14	
	VIII. *Ear, diseases of.*				
76a	Otitis media	63	49	35	
76b	Mastoiditis	5	7	5	
76c	Otitis externa	2	1		
76d	Defective hearing (cause not stated)			1	
76e	Ear, other diseases of	5	2	1	
	IX. *Nasal fossæ, diseases of.*				
86a	Adenoids	1			
86b	Deviation of nasal septum, and spurs		2	2	
86d	Turbinate hypertrophy	1		2	
86e	Sinusitis (all)	23	31	24	
86f	Polypus, nasal		2		
86h	Rhinitis (cause not stated)	21	30	62	
86i	Nasal fossæ, other diseases of	5	5	4

[a] Statistics for North Russia and Siberia are so incomplete that it has been thought best not to include them.

Tables 45, page 86 and 121, page 1179 give all data available on this subject.

Source of information: Medical reports to the Surgeon General's Office.

APPENDIX

I. EXTRACTS FROM THE MANUAL FOR THE MEDICAL DEPARTMENT.[a]

(1916, corrected to June 15, 1918.)

REGISTER AND REPORT OF SICK AND WOUNDED.

THE REGISTER.

427. A full record of the sick and wounded of every military post or station and separate command which is attended by a medical officer or private physician will be made on register cards, Form 52; but this requirement will not be applicable in time of war to troops or commands in the theater of operations, except camp hospitals (or field hospitals acting as such), evacuation hospitals, base hospitals, and other immobile sanitary formations on the line of communications. (See pars. 575 to 582.) These cards collectively constitute the register of patients, and a case carded on them is said to be on the register.

(*a*) The commanding officer will provide the surgeon with any information the latter may not have which is necessary for preparing and completing the register.

428. A register card will be made:

(*a*) For every person admitted to the hospital for treatment.

(*b*) For every officer, enlisted man, Army field clerk, field clerk, Quartermaster Corps, and member of the Nurse Corps with the command, including retired officers and soldiers under assignment to active duty, who, though not admitted to the hospital, is excused on account of sickness or injury from the performance of his military duty, or some part of it, such as attendance on certain calls, drills, target practice, mounted duty, etc.

(*c*) For every officer, enlisted man, Army field clerk, field clerk, Quartermaster Corps, and member of the Nurse Corps with the command who, though not excused from duty, is prescribed for or treated, or placed under observation with a view to treatment or, in the case of an enlisted man, to discharge on account of disability, if his disability is of such a character as to have a probable bearing on his subsequent medical history: *Provided*, That a case once carded for record only under this provision will not again be carded for record only on the same register except when necessary to comply with the provisions of sections (*d*), (*e*), (*f*), and (*h*) of this paragraph. For example, every case of venereal disease or insanity, or suspected venereal disease or insanity, which comes under observation or treatment, will, unless previously on the register or otherwise required to be registered, be carded for record only under this provision. (C. M. M. D. No. 6, Feb. 14, 1918.)

(*d*) For every officer, enlisted man, Army field clerk, field clerk, Quartermaster Corps, and member of the Nurse Corps with the command, not currently on the register, who is retired or discharged for disability or dies.

(*e*) For every officer, enlisted man, Army field clerk, field clerk, Quartermaster Corps, and member of the Nurse Corps with the command, not currently on the register, who is sent to another station or command for observation or treatment: *Provided*, That this regulation shall not apply to commands which have no hospitals and which habitually send their hospital cases to a hospital in the near vicinity. (See par. 217½.)

(*f*) For every officer, Army field clerk, field clerk, Quartermaster Corps, and member of the Nurse Corps with the command, not currently on the register, who departs from the command on sick leave.

(*g*) For every officer, enlisted man, Army field clerk, field clerk, Quartermaster Corps, and member of the Nurse Corps with the command whose case is received by transfer conformably to the provisions of paragraphs 214 to 217.

(*h*) For every retired officer, retired soldier, former officer, former soldier, former Army field clerk, former field clerk, Quartermaster Corps, or former member of the Nurse Corps with the command but not in the hospital, who dies. (C. M. M. D. No. 8, June 15,1918.)

429. Except as required by paragraph 428 a case prescribed for but not admitted to hospital or excused from duty will not be registered.

[a] Material changes made during the war are given in detail. No special account is taken of minor changes save that in each such case the date and authority for the change appears in brackets at the end of the changed paragraph. Except for original paragraphs which are so important that it has been thought best to include them, the text represents that in effect at the end of the war.

430. Cases under treatment by the dentist will be entered on the register of sick and wounded only when such entry is required by the provisions of paragraph 428.

431. When an officer or soldier sick in hospital is retired from active service, wholly retired from service, dismissed, or discharged, his case as an officer or soldier will be closed (par. 450) and a new card made for it covering his continuance in hospital under his new status.

(*a*) If an applicant for enlistment sick in hospital is sworn in as a soldier, his case as a civilian will be closed and a new card made for his case as a soldier.

(*b*) Appropriate cross references from the old to the new cards, and vice versa, will be made in these cases.

432. The register cards will be made day by day as the cases are taken up. (See pars. 208*a* and 209.) They will be kept in two files, the current file and the permanent file.

(*a*) The current file will consist of the register cards of uncompleted cases arranged in dictionary order according to the surnames of the patients. It constitutes a ready index to all cases currently on the register. Cards will be transferred from the current file to the permanent file immediately upon their completion and the preparation of their report cards.

(*b*) The permanent file will comprise all the register cards of completed cases. The cards therein will be filed in the serial order of their register numbers.

(*c*) A card index to the register will be kept on Form 52*a*, one index card for each individual patient whose name appears in the register. When a register card is started and its number determined the index will be searched for previous admissions of the patient. If an index card for the patient is found, the new number will be entered thereon, and the number of the last previous admission will be noted on the new register card (par. 443). If no index card for the patient is found, one will be at once prepared. The index cards will be filed alphabetically in dictionary order according to the surnames of the patients.

433. Cases taken up on register cards should be borne thereon until finally disposed of. (See par. 450.)

434. The cards will be legibly written in indelible black ink, using the typewriter when practicable.

(*a*) Entries must not be crowded. When the space provided on the front of the card under any heading is not sufficient to complete an entry thereunder, the record thereof will be continued on the back of the card, or, if still more space is required, upon an extension slip. The extension slip must be of the same size as the card, and be pasted to the lower margin of the back of the card, using about one-half an inch for the seam; this will place the seam at the top of the card when the latter is filed. When an entry is continued its two parts should be connected by cross references, using a small letter in parentheses, thus, (*a*), so that the record can be readily followed.

435. The senior medical officer is responsible for the correctness and safe-keeping of the register. He will sign or initial all register cards completed during the period of his responsibility; but at general hospitals, or brigade posts, or when specially authorized by the Surgeon General, he may designate one or more junior medical officers to sign or initial them, preferably in each case the officer in attendance thereon.

(*a*) When, in the absence of a medical officer, the command is attended by a civilian physician, he will sign the cards for the cases completed under his care.

436. Alterations and additions when necessary to correct or complete the record may be made in the register cards of uncompleted cases at the discretion of the senior medical officer of the command for the time being. A change of diagnosis will be indicated in the space "complication, seq., etc.," giving the date of the change, and the original entry under "cause of admission" will not be disturbed.

(*a*) Alterations of and additions to the register card of a completed case may be made in like manner by the medical officer who was responsible for the card at the time it was completed if he is still the senior medical officer of the command. If he has been superseded the card will not be changed, but a successor who concludes, upon information received, that the card is erroneous in any particular, may file a supplemental card therewith of the same size as the register card, indicating thereon such conclusion and the information or reasons upon which it is based. The supplemental card will be headed "Supplemental card, No. ———," inserting the register number of the register card, and will be dated and signed by the officer filing it. A cross reference to the supplemental card identifying it by its date may appear upon the register card, but it will be a reference only, thus, "See supplemental card dated ———," and contain none of the matter recorded on the supplement. (See pars. 463 and 464.) (C. M. M. D., No. 6. Feb. 14, 1918.)

DIRECTIONS FOR PREPARING REGISTER CARDS.

(See pars. 208 to 213.)

437. *Name.*—Name should be correctly and legibly written. Initial letters or abbreviations may be used for middle names only.

438. *Rank, company, and regiment or staff corps.*—The usual abbreviations may be employed.

(*a*) Changes in the patient's rank, company, and regiment or corps while his case is current on the register will be recorded in this space, giving dates of changes.

(*b*) If the patients are discharged soldiers, applicants for enlistment, Army field clerks, field clerks, Quartermaster Corps, members of the Nurse Corps, or members of the Organized Militia, those facts, respectively, will be set forth on their cards under this heading, giving in the case of former soldiers the organization to which they last belonged, and in the case of militiamen their militia organization. Other civilians should be designated simply as civilians. (C. M. M. D., No. 8, June 15, 1918.)

439. *Age, years.*—The age at birthday nearest to date admitted is required.

440. *Race.*—Use "W.," "C.," "F.," "P. R.," "I.," meaning "white," "colored," "Filipino," "Porto Rican," or "Indian."

441. *Nativity.*—Place of birth; give State, if a native; country, if foreign. Usual abbreviations.

442. *Service, years.*—Give length of service to date of admission, in years and fractions thereof, whether continuous or not.

443. *Register No.*—Every card will have a number for convenience of reference. These numbers will be consecutive and will be carried forward indefinitely. In order that the medical history of a patient may be more readily traced, his last previous register number, if he has previously had a register card at the post, should be entered immediately before his current number.

(*a*) So long as a field command, attended by a medical officer or private physician, is unattached to a permanent station, or its hospital or infirmary is not discontinued by consolidation with that of another command, its register cards should be numbered continuously without regard to the various changes of its location.

444. *Date of admission.*—Under date of admission give the day, month, and year the case is taken up. Figures should not be used to designate the month.

445. *Source of admission.*—Indicate in this space the source from which the patient was directly received. Officers and enlisted men of the command are generally admitted "From command"; but may be "From desertion," etc. In the case of a casual, the name of his proper station should be given, in addition to the place from which he was directly received, thus, e. g.: "Casual from command, proper station, Fort A"; or "Casual from S. S. *Southland*, from Norfolk, Va., proper station, Fort B." In the case of an original admission from a passing or other command which is unaccompanied by a medical officer the fact should be recorded, thus, e. g.: "Detachment, Twelfth Infantry, en route A to B, unaccompanied by a medical officer."

(*a*) In the case of a patient received by formal transfer from another hospital or command (pars. 214 to 217) the name of such hospital or command will be given, with the date of the original entry of the case and its register number on the register thereof, if known. In the case of a patient received by informal transfer under the conditions recited in paragraph 217½ the name of his command only will be given, with the words "informal transfer" added.

(*b*) The following additional notations will be made in parentheses in this space:

1. In cases taken up under section (*c*), paragraph 428—(Carded for record only; under treatment [or observation] but not excused from duty).

2. In cases taken up under section (*d*)—(Carded for record only; not currently on the register).

3. In cases taken up under section (*e*)—(Carded for transfer only; on full duty while with command).

4. In cases taken up under section (*f*)—(Carded for record of sick leave only; on full duty while with command). (C. M. M. D., No. 6. Feb. 14, 1918.)

446. *Cause of admission.*—Give the name of the disease and its location if it is localized; or in case of injury, its cause, location, character, and severity, with the attending circumstances, date of occurrence, and nature of missile, weapon, or other producing agent. When the patient has two or more diseases or injuries at the time of admission, each of them will be recorded under this head. Should the original disability, or, if there is more than one, should any of them, be cured before the final disposition of the patient, the fact and date of such cure will also be stated

in this space. In the case of a patient received by transfer the diagnosis made at the receiving hospital will be recorded. If this diagnosis differs from that on the transfer card, the additional entry will be made, "Diagnosis on transfer card not concurred in." (See pars. 455 and 456.)

(*a*) In entering causes of admission distinction should be made between the primary or remote cause and the exciting or proximate cause, the latter being regarded as the cause of admission within the meaning of this paragraph. For example, cycloplegia produced for the purpose of measuring a refractive error should be recorded as the cause of admission, rather than the refractive error itself, which should be mentioned in brackets. So also, in a case admitted for operation to cure or correct a congenital or other defect, as, for example, hammer-toe or phimosis, no pathological condition being present which would of itself require admission, the purpose to operate is the cause of admission and should be so recorded by the words, "For operation," indicating the defect in brackets. It is necessary to observe this distinction with care, to assure proper determination of the question whether the actual cause of admission shall be recorded as in the line of duty or not. (See par. 448.)

447. The place of treatment, quarters or hospital, and the dates of changes from the one to the other, will be indicated in the cause-of-admission space.

448. *In line of duty.*—Herein will be recorded, in the case of every officer or enlisted man on the active list, of every Army field clerk and field clerk, Quartermaster Corps, of every member of the Nurse Corps, and of every officer and enlisted man on the retired list who is for the time being serving under an assignment to active duty, the opinion of the medical officer, based on a full consideration of all the facts, as to whether the cause of admission was incurred in the line of duty, it being understood that the entry relates to the immediate cause of admission as defined in paragraph 446*a*, and not to the remote cause. If the patient has two or more diseases or injuries at the time of admission, an opinion as to line of duty will be separately recorded for each. In forming and recording his opinion on this point the medical officer will be guided by the following instructions:

(*a*) [a] [An officer, Army field clerk, or field clerk, Quartermaster Corps, who has been passed as fit for service on physical examination upon entrance into the service, or a soldier or member of the Nurse Corps who has been accepted on his or her first physical examination after arrival at a military station as fit for service, shall be considered to have contracted in the line of duty any subsequently determined physical disability, unless such disability can be shown to be the result of the patient's own carelessness, misconduct, or vicious habits, or to have been contracted while absent from duty without permission, or unless the history of the case shows unmistakably that the disability existed prior to entrance into the service.] When the admission is for an operation or procedure which is designed to improve the patient's physical fitness or efficiency for the military service, such operation or procedure will be recorded as in the line of duty, without reference to the fact whether the condition to be remedied originated in the line of duty or not, provided that the primary cause is not the result of the patient's own misconduct.

(*b*) When an officer, enlisted man, Army field clerk, field clerk, Quartermaster Corps, or member of the Nurse Corps, is disabled while absent with leave, the question of line of duty must be determined by the circumstances attending the incurrence of the disability, but the fact of being so absent should be stated.

(*c*) When a medical officer expresses the opinion that an injury occurring during athletic sports, properly indulged in, was received in the line of duty, the opinion is accepted by the Surgeon General as satisfactory and final.

(*d*) In all cases in which the opinion is expressed by "no," and in cases of venereal diseases by "yes," the circumstances attending the incidence of the disability, and on which the opinion is based, should be stated under the diagnosis. (C. M. M. D., No. 8, June 15, 1918.)

449. *Complications, seq., etc.*—Herein will be recorded complications and intercurrent diseases appearing subsequent to admission, surgical operations, and changes of diagnosis. The date will be given in each instance.

(*a*) When the intercurrent disability subsequently appearing is in no way dependent on the primary affection, the medical officer will record in this space his opinion as to whether it originated

[a] Previous reading of sentence in brackets: All diseases or injuries from which an officer or enlisted man suffers while in the military service of the United States may be assumed to have occurred in line of duty unless the surgeon knows: First, that the disease or injury existed before entering the service; second, that it was contracted while absent from duty without permission: or third, that it occurred in consequence of willful neglect or immoral conduct of the man himself.

in the line of duty, with such explanatory remarks as may be necessary. Should it be cured before the final disposition of the patient, the fact and date of cure will also be recorded here.

(*b*) Upon recording a change of diagnosis the medical officer will also record in this space his opinion whether the disability as diagnosed by him originated in the line of duty, with appropriate explanatory remarks when necessary.

(*c*) In recording a surgical operation its character will be briefly described, giving the commonly accepted name for it. The word "operation" alone is not sufficient. In every case note should be made of the anesthetic used and of the time intervening between the onset of the disease or the receipt of the injury and the performance of the operation. (C. M. M. D., No. 6, Feb. 14, 1918.)

450. *Disposition.*—Herein record the completion of the case by entry specifying the method of its completion. Return to duty is always a completion of the case, including cases registered under the provisions of paragraph 428*c*. Transfer to another hospital (par. 214) completes the case on the medical records of the transferring hospital or command. Cases of officers, soldiers, Army field clerks, field clerks, Quartermaster Corps, and members of the Nurse Corps are completed by capture or any change in their military status which separates them from the active list of the Army, such as death, desertion, retirement, resignation, dismissal, or discharge from the service. (See par. 431.) (C. M. M. D., No. 8, June 15, 1918.) Cases of officers and enlisted men on the retired lists and of civilians registered upon their admission to hospital conformably to the provisions of paragraph 428*a* are completed, so far as the register is concerned, by their departure from hospital.

(*a*) When a patient departs from the command or hospital on ordinary or sick leave or furlough, his card will be completed by appropriate record of such departure, with a statement as to whether the cure was complete or not. Should he resume the status of sick upon his return from leave or furlough, his case will be registered anew.

(*b*) Register cards made for record only under paragraph 428*c*, the patient not having been excused from duty, should be completed at once, regardless of the continuance of treatment or observation, by entering "Doing full duty" under this head and repeating the date in the date-of-disposition space. Should the provisions of sections (*a*), (*b*), (*d*), (*e*), (*f*), or (*h*), paragraph 428 become applicable during continued treatment or observation, or subsequently, the case will again be registered in conformity therewith.

(*c*) Cases of death, and of retirement or discharge for disability, carded under the provisions of paragraph 428*d*, will be completed at once by entry in this space specifying the nature of the casualty.

(*d*) In case of death, the fact of death, and the result of the autopsy, if one was held, will be recorded in this space; also, if the death was not due to the cause of admission, the general, determining, and all contributing causes thereof, and a statement whether the cause originated in the service and in the line of duty, with an explanation of the circumstances upon which the opinion, if negative, is based. Should the cause of death in any case be unknown, a brief note of such circumstances as may throw light upon it will be entered. In case of suicide the cause or causes which led to the act will be stated.

(*e*) In case of retirement or discharge on account of wound or disease, the fact of retirement or discharge on such account, and the degree of disability, will be recorded under this head; also, if the wound or disease for which retired or discharged was not the cause of admission, the same will be fully described and statement recorded whether it originated in the line of duty. When the opinion expressed is "no," the circumstances attending the incidence of the wound or disease on which the negative opinion is based will be recorded. (C. M. M. D., Feb. 14, 1918.)

(*f*) The cases of patients who are retired from active service, or wholly retired or discharged from the service, by order, sentence, operation of law, or expiration of term should be completed by entry specifying such fact; and a statement should be made of the degree of disability due to the complaint for which the individual was under treatment at the time of his separation from the service, unless it was unquestionably not received in the line of duty.

(*g*) The cases of officer patients who depart from the hospital or command in obedience to orders to proceed to their homes and await retirement will be completed upon such departure by recording the fact thereof and its date.

(*h*) When the disease or injury causing death or discharge has been aggravated by the willful and persistent refusal of the patient to submit to such reasonable restrictions, methods of treatment, or surgical operations as would, in the opinion of the medical officer, have conduced to the cure or to the lessening of the disability, the fact should be noted.

(*i*) When a patient is returned to duty the entry "duty" will suffice, the cure being assumed to be complete unless a statement to the contrary is entered.

(*j*) In case of transfer to another hospital or command, the specific destination of the patient should be stated.

(*k*) Desertion is final disposition of the case and the card should be completed accordingly. Should the deserter come again under military control and resume the status of sick, a new card will be made for him as for a new case, conformably to the general rule. (C. M. M. D., Nos. 6 and 8.)

451. *Date of disposition.*—Give day, month, and year of disposition. Figures should not be used to designate months. In all cases of discharge on certificate of disability the date of discharge as given in the letter of notification from the adjutant will be recorded.

452. *Name of hospital, etc.*—Enter in this space on every register card the designation of the hospital, establishment, or organization to which the register pertains, and its location or locations during the period covered by the card. Spaces 19 and 20 ("Sent with report of S. & W. for the month of ——" and "from") need not be filled out on the register card.

453[a]. *Classifications.*—Spaces 22, 23, 24, and 25 at the bottom of the face of the card are for the use of the Surgeon General's Office only, and will not be filled out on the register or report cards.

454. [Space 26]. [b] "Days of treatment in current case," on back of card, will be filled out month by month on the register card extending the table as may be necessary for cases remaining from one year to another. The day of admission will be counted as a day of treatment in every case. The day of return to duty will not be counted as a day of treatment. The day of disposition for all other cases under treatment will be counted as a day of treatment, except for patients transferred to a station or hospital in the near vicinity, who should arrive at such station or hospital on the same day.

* * * * * * *

456. The following special requirements will be observed:

(*a*) Pathological lesions should be recorded rather than their symptoms.

(*b*) In all cases in which the cause of admission is a local manifestation of a general affection the character and locality of the one and the nature of the other should be stated.

(*c*) The organ or part affected should be specified when the name of the morbid condition fails to indicate it, as in paralysis, aneurism, ulcer, herpes, etc.; also in inflammations, as adenitis, osteitis, arthritis, synovitis, etc., and in local injuries, as abrasions, burns, contusions, dislocations, etc.

(*d*) Inflammations should be reported as acute or chronic, and the grade of the inflammatory condition of the mucous membranes, whether catarrhal or suppurative, should be stated.

(*e*) The term "heart disease" should not be recorded when the special affection can be determined.

(*f*) In pulmonary affections the lobe or lobes involved should be designated; also, in the case of diseases that are not always bilateral, whether the disease is confined to the right or left or extends to both lungs. The complications of pleurisy should be particularly noted.

(*g*) Deviations from the normal in cases of impairment of vision or hearing should be ascertained and noted.

(*h*) In case of injury, its character, location, and severity should be stated, the date of its occurrence should be given, its cause should be noted, the nature of the missile, weapon, or other producing agent shown, and the circumstances attending its origin indicated. If it was accidental, that fact should appear. If it was intentional, the record should show whether it was judicial, homicidal, suicidal, self-inflicted, or otherwise, as the case may be. In gunshot wounds the points of entrance and exit of the missile and the parts indicated should be recorded.

(*i*) Fractures should be designated as simple, comminuted, compound, or complicated, the character of the complications being stated.

(*j*) The exact location, variety, and cause of hernia should be given, and, when strangulated, the condition and the means employed for relief.

(*k*) Diseases due to venereal contagion, to the abuse of stimulants or narcotics, or to immoral practices should be so recorded.

(*l*) Distinction should be made between inflammations of venereal origin and those of nonvenereal origin, as in cases of balanitis, orchitis, bubo, etc., specifying the nature of the venereal cause and the causation in the nonvenereal cases.

---

[a] Rescinded, C. M. M. D. No. 9, Oct. 10, 1918.

[b] Words in brackets omitted by same circular.

(*m*) Distinction should also be made between the venereal ulcer known as chancroid and the hard chancre of primary syphilis.

(*n*) The terms "venereal warts," "venereal bubo," etc., are indefinite and should not be used. The lesion should be recorded and its specific cause stated.

(*o*) When the case is an old disease or injury that fact will be recorded by the word "old" in parentheses in the causes of admission space, followed by the diagnosis, showing the original disease or injury, and its condition at the date of current admission. If there is no record in the register of the original disease or injury record will also be made under this head of its origin (date, place, cause, attending circumstances, etc., as may be appropriate); but if the record of origin appears in the register for a previous admission the same need not be repeated, but may be referred to as follows: "For original disease or injury, see Reg. No. ——."

(*p*) In all cases of poisoning the name of the poison should be given.

(*q*) Special notes should be made of cases of malingering or feigned diseases and of the means employed for their detection.

(*r*) When no diagnosis can be reached, the fact should be stated, together with the conditions which prevent the recognition of the disease or injury. (C. M. M. D., No. 6. Feb. 14, 1918.)

REPORT OF SICK AND WOUNDED.

457. The report of sick and wounded comprises, (1) the report sheet (Form 51), which provides for general information and numerical tabulations concerning the command and the civilians therewith; (2) the nominal check list (Forms 51*a* and 51*b*) for a chronological list of cases registered; (3) the report cards (Form 52) for details of the several cases.

458. Subject to exceptions similar to those indicated in paragraph 427, this report is required monthly from every military post and separate command which is attended by a medical officer or civilian physician. It will be rendered separately for regular and volunteer troops, that of regulars to embrace all data pertaining to civilians. It will be forwarded before the fifth day of the next succeeding month as follows: From a general hospital or other independent post or command direct to the Surgeon General, unless otherwise ordered by him; from a transoceanic Army transport to the medical superintendent of the transport service at the transport's home port, for transmittal to the Surgeon General; and from any other organization or hospital to the department surgeon for like transmittal.

(*a*) When a hospital is closed or a command is discontinued a report covering the unreported period of service, giving the beginning and the end thereof, will in like manner be forwarded within five days thereafter.

(*b*) If there has been no case on sick report, either remaining from last report or admitted during the month, Form 51 will nevertheless be forwarded. It will give the name and strength of the command, etc., with such remarks as may be deemed of interest to the department surgeon or the Surgeon General.

459. All births and marriages occurring at the post or with the command and all deaths among the civilians with the command will be recorded on the report of sick and wounded under the heading "Births, marriages, and deaths."

460. A report card is required for every case registered during the month, and if the case is not completed until a subsequent month a second report card will be forwarded with the report for the month during which it is completed. With the report for December, report cards will be forwarded also for all cases remaining December 31 which were registered previous to December.

(*a*) A duplicate of the report sheet and of the nominal list will be retained with the medical records of the post or command. At a permanent post the duplicate report sheets will be filed in and form a part of its medical history. (See par. 412.)

(*b*) The senior medical officer will fill in and sign the certificate at the foot of the first page of the report sheet. (See par. 400.) The report cards will be initialed as provided in paragraph 435 for register cards. If there is neither medical officer nor civilian physician with the command when the report is to be made, the officer in charge of the property of the hospital will make the report over his own signature and initial the cards. (C. M. M. D., No. 6. Feb. 14, 1918.)

461. Reports of sick and wounded received by a department surgeon will be promptly subjected to a critical examination, and such memoranda taken therefrom as he may need for the purposes of his office. Should he find the papers correct, he will forward them at once by informal indorsement, e. g., dating stamp on the report sheet, to the Surgeon General. Should he find any errors therein, he will immediately by letter to the responsible surgeon call attention to the same and

direct the necessary action for their correction. He will not, however, detain the papers in his office awaiting correction, but will as in the other event forward them at once to the Surgeon General in like manner with a copy of his letter in the premises. The surgeon should reply to the department surgeon's letter by indorsement thereon. (See also pars. 462, 463, and 464.) After the reply has been noted by the department surgeon it will be forwarded without delay to the Surgeon General.

CORRECTIONS OF AND ADDITIONS TO REPORT CARDS AFTER THEIR RENDITION.

462. Rescinded. (C. M. M. D., No. 6.)

463. When the diagnosis is changed, or a complication or intercurrent disability is noted, or other corrections or alterations are made on the register card of a remaining case before its completion (par. 436) and after the first report card of the case has been forwarded, a new card, signed by the senior medical officer, marked "Correction card" in the upper margin of the front of the card, indicating plainly what the changes, corrections, or alterations are, will be forwarded with the next ensuing monthly report: *Provided*, That when the case is completed upon the next ensuing monthly report the card required upon the completion of the case under paragraph 460 will be sufficient, and a separate correction card will not be forwarded, but every variance from the first report card of the case will be explained by the term "corrected entry" noted on the back with proper reference for connecting the record as indicated in paragraph 434*a*. (C. M. M. D., No. 6.)

464. When the register card of a completed case is altered under paragraph 436*a* after its final report card has been rendered, a correction card similarly marked and signed by the senior medical officer, showing plainly all the alterations, will be immediately forwarded to the Surgeon General through the usual channel. When a supplemental card is filed with the register card of a completed case conformably to paragraph 436*a*, a full and exact copy thereof marked "Transcript of supplemental card" in the upper margin on the front of the card will be at once forwarded likewise. (C. M. M. D., No. 6. Feb. 14, 1918.)

* * * * * * *

RECORDS OF SICK AND WOUNDED.

567. During and after an engagement diagnosis tags will be attached to all wounded and dead as soon as practicable. They will be made out in duplicate.

568. In the case of wounded the primary purpose of the tag is to advise the medical officers under whose observation the wounded successively come of the treatment previously given at the several points of relief on the field or on the way to the rear.

569. The tag will be made out by the first medical officer or member of the Hospital Corps who treats the man previous to admission to a hospital on the line of communications. (It is unnecessary to tag a patient who is admitted to a hospital on the line of communications without having been previously tagged.) If the patient is badly hurt, the identification tag may be utilized to obtain the necessary information concerning his name, rank, etc. The original diagnosis tag will be attached to the patient's clothing.

570. The dead found on the field will be tagged in each case by the Medical Department troops who first reach the body, in order that other medical personnel may not lose time examining it. The tag will be attached to the clothing of the deceased.

571. The duplicates of the diagnosis tags will be disposed of as follows:

(*a*) Those made out by the sanitary personnel of an organization for the officers and soldiers of their own command will be retained by the surgeon until disposed of as provided in paragraph 574.

(*b*) Those made out for officers and soldiers of other commands will be transmitted as soon as possible after the close of each day of an engagement to the division surgeon, accompanied by the check list directed to be sent to that officer by paragraph 579.

572. The original tags will be disposed of as follows:

(*a*) Those of wounded who are returned from aid stations to the firing line without going farther to the rear will be removed and retained by the regimental surgeon.

(*b*) Those of wounded who are returned to their organizations direct from dressing stations (par. 682) or from the station for slightly wounded (par. 714*a*) will be removed upon their reporting for duty and be turned over to the surgeons of their several organizations, respectively.

(*c*) Those of wounded who are admitted to a field hospital and retained there for definitive treatment will be removed and forwarded to the division surgeon. If the patients are subsequently

Paragraphs 465 to 566, inclusive, deal with subjects other than records of sick and wounded.

transferred to the line of communications, they will not be retagged, but will be accompanied by transfer lists in regular form (par. 583).

(*d*) Those of wounded who are being evacuated from the zone of the advance will not be disturbed until the patients are admitted to hospital on the line of communications, when the tags will be removed, stamped with the name of the admitting hospital, and the date of receipt of the patient, and forwarded immediately to the division surgeon of the division to which the wounded belong.

(*e*) Those of wounded who die while in transit from the field to hospital (the death in each case being noted on the tag as required by the printed instructions in the tag book), and the tags attached to the dead found on the field, will be removed when the bodies are prepared for interment or equivalent disposal, and will be sent likewise to the division surgeon.

573. The division surgeon will cause the tags received by him in compliance with paragraphs 571 and 572 to be distributed without delay to the senior medical officers of the commands to which the men tagged belong, so that they may be available in accounting for officers or soldiers who would otherwise be carried as missing on the returns of their organizations.

574. Having served their purpose in completing the records of the organizations, all the tags, both originals and duplicates, will be forwarded with the next periodical lists of sick and wounded therefrom.

575. The register of patients prescribed by paragraph 427 and the monthly report of sick and wounded by paragraph 458 are not required from mobile troops or commands in the theater of operations. In lieu thereof a record or list of the sick and wounded with every mobile command in the theater of operations which is accompanied by a medical officer will be kept day by day by such officer on Form 53, as directed in the following paragraphs and in the instructions printed on the form. Field hospitals immobilized and acting as camp hospitals, evacuation hospitals, base hospitals, supply depots, contagious-disease hospitals, field laboratories, and other similar sanitary formations will not be regarded as mobile units within the meaning of this paragraph, but will keep the register of patients and render monthly reports of sick and wounded in accordance with the regular rule.

576. The list of sick and wounded will contain a record of the following cases:

(*a*) Every officer, soldier, Army field clerk, field clerk, Quartermaster Corps, or member of the Nurse Corps with the command who is excused from duty on account of sickness or injury, or who receives a wound of any character in action whether it involves excuse from duty or not.

(*b*) Every officer, soldier, Army field clerk, field clerk, Quartermaster Corps, or member of the Nurse Corps with the command, not currently on the list, who is sent to another command or place for observation or treatment.

(*c*) Every officer, Army field clerk, field clerk, Quartermaster Corps, or member of the Nurse Corps not currently on the list who departs from the command on sick leave.

(*d*) Every officer, soldier, Army field clerk, field clerk, Quartermaster Corps, or member of the Nurse Corps with the command, not currently on the list, who is retired, or discharged for disability, or dies; and every civilian with the command who dies. (C. M. M. D. No. 8.)

577. In determining the cases to be entered on the list of sick and wounded under the provisions of paragraph 576, officers, soldiers, Army field clerks, field clerks, Quartermaster Corps, and members of the Nurse Corps who are killed or wounded in action will be considered as with the command by whose sanitary personnel they are tagged. The names of such persons will therefore not necessarily appear on the list of sick and wounded of their own organization. (See par. 579*a*.) (C. M. M. D. No. 8.)

578. Except as provided in paragraph 580, the list of sick and wounded will be made in duplicate, and at the end of the month covered by it the original thereof will be forwarded through medical channels to the Surgeon General. The duplicate will be retained.

579. After the close of each day of an engagement the casualties resulting from the action will be entered on the monthly list of sick and wounded in two groups, first those suffered by the personnel of the organization making the list, second those occurring among the personnel of other organizations. An extra carbon copy of that portion of the list containing entries of the first group will be made and sent immediately to the organization commander to enable him to prepare his return of casualties (Form 149, A. G. O.) or, if preferred, the extra carbon copy for the organization commander may be made on Form 149 direct, as the size and ruling of the two forms are similar. An extra carbon copy of that portion of the list containing entries of the second group will be made in like manner and immediately sent to the division surgeon in order that there may be at the

headquarters of the division a check upon the names of men reported as missing in the casualty returns of the organizations to which they belong.

(*a*) In entering on the list of sick and wounded the casualties resulting from an engagement there should be included only those cases which have not been previously tagged by members of other organizations and in the case of field hospitals those retained for definitive treatment (par. 572*c*), except that all cases transferred to the line of communications should be recorded by the organization transferring them in order that there may be a record within the division of the final disposition of such cases. (See par. 577.)

580. Stations for slightly wounded will make a single copy of the list of sick and wounded. At the end of each day and when the station is closed the list will be sent at once to the division surgeon.

581. Evacuation ambulance companies should include in their list of sick and wounded only such cases as pertain to their own personnel and such cases as may, under exceptional circumstances, fall into their hands without having been previously tagged by other sanitary formations.

582. Hospital trains and hospital ships make complete lists in regular monthly form only of cases occurring among their own personnel and, in the case of a hospital ship, of cases admitted thereto for definitive treatment.

583. Where patients are transferred from mobile organizations at the front to the line of communications a nominal list of them should if practicable be prepared in duplicate by the transferring officer, the original of which should be receipted and returned to him by the receiving officer. Extra carbon copies of so much as may be pertinent of the transferring officer's regular list on Form 53 may be made for this purpose. Transfers from camp hospitals in the zone of the advance, should there be any such, will be accomplished by regular transfer cards (par. 575).

(*a*) The duplicates of the nominal lists mentioned, or the transfer cards as the case may be, furnished as above to an evacuation ambulance company, will be turned over to the evacuation hospital or other sanitary formation to which it delivers the patients. Similar disposition will be made by a hospital train or hospital ship of the nominal lists or transfer cards received by it.

584. Should a hospital train or hospital ship receive patients unaccompanied by nominal lists or transfer cards, the commanding officer of the train or ship will as soon as practicable prepare a nominal list of such patients on Form 53 (separate and apart from his regular monthly list of sick and wounded) for disposition as above provided. Should the preparation of such a list be impracticable, he will list the patients who seem to be in danger of death so as to be able, if death occurs, to report the necessary details.

(*a*) Should any of the cases be lost en route by death, capture, etc., he will without delay report the cases so lost, giving the date and nature of the loss, to the surgeon, base group, or if the movement of the sick and wounded is under the immediate direction of the Surgeon General, direct to him, forwarding with such report the transfer cards (if any have been received) of the patients so lost.

(*b*) In the case of sick and wounded necessarily left at a hospital other than the one designated to receive them, their transfer cards, or a nominal list, as the case may be, will be left with the commanding officer of such hospital, and a similar report of the patients so disposed of will be made at once.

II. SICK AND WOUNDED REPORTS FOR THE AMERICAN EXPEDITIONARY FORCES.

Effective June 15, 1918.

(Prepared under the direction of the Chief Surgeon, A. E. F.)

[G. H. Q. American Expeditionary Forces.

The following reports and returns of sick and wounded and methods of preparing the same are prescribed for the American Expeditionary Forces. All paragraphs of the Manual for the Medical Department dealing with the heretofore existing methods of reporting sick and wounded in conflict with these instructions are suspended.

By command of General Pershing:

JAMES G. HARBORD, *Chief of Staff.*

Official:

BENJ. ALVORD, *Adjutant General.*

I. FORMS.

(*a*) Diagnosis tag.

(*b*) Daily report of casualties and changes (Form No. 4, A. G. O., S. D., A. E. F.).

(*c*) Daily report of casualties and changes of patients in hospital (Form No. 22, A. G. O., S. D., A. E. F.).

(*d*) Field medical card and envelope (Form No. 1, M. D., A. E. F.).

(*e*) Register card (Form No. 52, M. D., U. S. A.), to be used as a combination index record card and as a report for completed cases only.

II. DIAGNOSIS TAG.

1. Diagnosis tag will be used by the medical personnel in the trenches, at battalion aid stations, regimental aid stations, and regimental infirmaries, also by attending surgeons and others without hospitalization facilities (ambulance companies and hospital trains).

2. In the trenches the tag will be attached, as soon as practicable, to the clothing of all wounded and dead. If the patient is seriously wounded the metal identification tag may be utilized to obtain the necessary information as to name, rank, etc.

3. The dead found on the field will be tagged in each case by the medical officer or member of the Hospital Corps who first reaches the body, in order that other medical personnel may not waste time examining them. For the information of the Graves Registration Service, Q. M. C., the original tags will remain on the body.

4. When used by regimental infirmaries, attending surgeons, surgeons of ambulance companies, and others without hospital facilities, the original tag corresponds to a transfer card and will be attached to all patients who are transferred to hospitals for further treatment.

5. The duplicate tag will be used as an aid to the regimental surgeon in making up his daily report of casualties (Form No. 4, A. G. O., S. D., A. E. F.). They must not be torn from the book. Book containing duplicates will be forwarded direct to the Chief Surgeon's Office, A. E. F., as soon as the last tag is used.

6. The original tag will be removed, when the field medical card is started, and placed in the field medical card envelope, constituting a part of the soldier's sick record.

7. If the soldier is returned to duty from the regimental aid station, battalion aid station, dressing station, without admission to a hospital, the original tag is of no further value and should be destroyed.

8. If the patient dies en route from the trenches to a regimental or battalion aid station, dressing station, or hospital, the time and place of death and the hospital where the patient was delivered will be entered on the back of the tag under the heading, "Supplemental Record." If the

body is otherwise disposed of, the proper entry will be made in this space. The tag will be delivered promptly to the formation to which the patient was destined, and the responsible medical officer of that formation will forward it to the Chief Surgeon, A. E. F.

9. For all deaths not occurring in action, in hospitals, or en route to hospitals a written report to the Chief Surgeon's Office will be made promptly by the medical officer under whose observation the case comes.

III. INSTRUCTIONS FOR FILLING IN DIAGNOSIS TAG.

1. *Diagnosis.*—Under "diagnosis" note essential facts concerning the character of the disease. The general term "pyodermia" may be used to include furuncle, carbuncle, abscess of skin, dermatitis, ecthyma, impetigo, paronychia, and ulcer.

2. In case of wounds or injuries, the terms "battle casualty," "willfully self-inflicted," or "accidental" will be used, according to the circumstances.

3. The general term "gunshot wound" may be used for all wounds or injuries caused by flying missiles propelled by an explosive gas, such as shell fragments, shrapnel, bomb, etc.

4. For bayonet, lance, or sword wounds, or burns, the agent will be specified.

5. The location of wounds will be stated, using the following regional nomenclature: Abdomen, chest, back, buttock, thigh, leg, foot, toe, shoulder, arm, forearm, hand, finger, face, scalp, head, neck, spine, perineum, genital organs. Side affected will be specified in each case. Where several wounds exist the general term "multiple" may be used instead of itemizing the regions.

6. For local injuries, such as burns, bruises, contusions, or dislocations, the organ or part affected will be specified when the name of the morbid condition fails to indicate it.

7. In gas cases specify the gas, and state whether the casualty was caused by inhalation of gas, use of food or water which has been poisoned by gas, or by surface contact.

8. For all other traumatisms the location, nature, and causative agent will be given.

9. Whenever fracture, serious hemorrhage, or surgical shock are complications the fact will be stated. Fractures will be designated as simple, compound, or comminuted.

10. "Slight" or "severe" will be stated according to circumstances. Sample diagnosis: "G. S. W., battle, severe, right thigh, fracture, comminuted, right femur."

11. In cases of death the words "killed in action," if applicable, must be used. If death was suicidal, accidental, homicidal, or judicial, the fact will be entered in addition to the cause of death.

12. "In action" may be construed to mean all wounds or deaths resulting through direct acts of the enemy or occurring in actions in which hostile forces, regardless of their numbers, are engaged in physical combat with each other.

The term includes aerial and submarine attacks, wherever they occur, and cases of soldiers wounded or killed in their own barrage. No wounds or deaths occurring in training camps will be considered "in action."

13. *Treatment.*—Under "treatment" note the dose and time of administration of morphine and antitetanic serum.

14. When a splint or tourniquet has been applied that fact should be stated.

15. Time and date of application of tourniquet should be specified.

16. If subsequent operation or treatment is urgent, the word "URGENT" will be added in large letters.

IV. DAILY REPORT OF CASUALTIES AND CHANGES (FORM NO. 4, A. G. O., S. D., A. E. F.).

1. All surgeons required to use diagnosis tags will also keep a Form No. 4, A. G. O., S. D., A. E. F., entries on which will be made daily.

2. This daily report of casualties and changes will contain name, rank, organization, and a brief diagnosis, which data are to be taken from the duplicate diagnosis tags.

3. Hospitals will keep a daily report of casualties and changes among their personnel only.

4. The daily report of casualties and changes will be used as an aid in tracing the sick and wounded and to aid the statistical officer in completing his reports.

5. In determining the cases to be entered, officers and soldiers who are killed in action will be considered as with the command by whose sanitary personnel they were tagged. The names of such officers or soldiers will, therefore, not necessarily appear on the daily report of casualties and changes of their own organization.

6. In entering on the daily report of casualties and changes the casualties resulting from an engagement, there should be included only cases which have not been previously tagged by members of other organizations.

7. The daily report of casualties and changes will be retained by the surgeon making it out and no copy is required to be forwarded to the Chief Surgeon's office.

V. DAILY REPORT OF CASUALTIES AND CHANGES OF PATIENTS IN HOSPITAL (FORM NO. 22, A. G. O., S. D., A. E. F.).

1. At all hospitals five copies of the daily report of casualties and changes of patients in hospital (Form No. 22, A. G. O., S. D., A. E. F.) will be made. One copy will be retained, two copies forwarded to statistical officer attached to headquarters to which reports are made, and two sent to the Chief Surgeon, A. E. F.

2. The following directions for preparing daily casualty roll will govern:

(*a*) All information to be grouped in the following order, writing the proper heading across the page:

First heading: *Admissions.*—Give "source from which received, line of duty, own misconduct." (Ambulance or hospital trains will not be considered as source of admissions.)

Second heading: *Change of diagnosis.*—Important changes only. "From ..... To ....."

Third heading: *Death.*—State whether from wounds in action, line of duty, own misconduct.

Fourth heading: *Discharge from hospital.*—Return to duty or United States. (In former case specify where sent.)

Fifth heading: *Transfer to other hospitals.*—(Give name of hospital to which transferred.)

Sixth heading: Such other information as is required by instructions on form.

(*b*) All cases falling under each heading are to be grouped under that heading. For example, in the case of a patient admitted and discharged on the same day, his admission will be grouped with other admissions, his discharge with other discharges.

(*c*) Diagnosis to be given for each case under each heading. It should be the first entry under column "Casualties and changes."

(*d*) Diagnosis will include nature of disease, injury, or wound.

VI. FIELD MEDICAL CARD (FORM 1, M. D., A. E. F.).

1. The purpose of the field medical card is to advise medical officers, under whose observation the wounded successively come, of the treatment previously given at the several points of relief, in the field or on the way to the rear, and to act as a transfer card. The clinical data called for should be brief and comprehensive.

2. It will be started at the dressing station, field hospital, evacuation hospital, camp hospital, base hospital, or general hospital, depending on to which one the patient was first admitted, and it will accompany the patient, attached to his clothing, until his case is finally disposed of.

3. When the field medical card is started, the diagnosis tag will be utilized to obtain any necessary information concerning name, rank, etc., of the patient, the diagnosis and other pertinent data with reference to previous treatment. If inaccurate or incomplete information is given on the tag, the proper modification will be made on the field medical card. Where circumstances preclude full diagnoses, and the patient is to be transferred to the rear, only brief diagnoses are required; with this exception, the diagnoses will conform to the nomenclature of disease and affections.

4. Each organization will take proper care to record correctly all data called for on the medical card. Where space is lacking for an entry under its designation, the entry may be made on the back of the field medical card, reference being made to it by an asterisk (*).

5. All entries made by medical officers should be authenticated by their signature at the bottom of the space. In cases where the full name appears once on the card initials may be used for subsequent entries.

6. Upon the completion of the case the field medical card, envelope, and diagnosis tag will be forwarded with a report card to the Chief Surgeon of the American Expeditionary Forces, in compliance with Section XI, except that for cases transferred to the United States field envelope and contents will accompany the patient.

7. History cards or sheets, laboratory and X-ray blanks that may be of importance, will be forwarded in the envelope with the field medical card.

VII. FIELD MEDICAL ENVELOPE (FORM NO. 2, M. D., A. E. F.).

1. The field medical envelope is an invoice sheet for the individual case. It should be accurately made out and should always be securely tied to the clothing of the patient over the sternum. In it will be placed all papers concerning the patient.

2. Motor ambulance convoys and hospital trains will take proper care to record special treatment, including the dose and time of administration of morphine, in the space allotted to such organizations.

3. Where space is lacking for any entry under its designation, the entry will be made on the back of the envelope, reference being made to it by an asterisk (*).

VIII. TRANSFER CARDS.

1. For cases actually delivered to transport surgeons for return to the United States, a transfer card identical with the report card, but having in addition the words "Transfer card" written across the top, will be sent with the patient.

IX. REGISTER INDEX CARD AND REPORT CARD (FORM NO. 52, M. D., U. S. A.).

1. Register index card (Form No. 52) will be made at all hospitals upon admission of the case, and will show the data entered on the field medical card.

2. In case the patient is transferred to another hospital, the register card as originally made out will be retained as a record and as an aid in tracing patients or answering inquiries.

3. A register index card will be made for every person admitted to the hospital for treatment, and for every officer and enlisted man with the command, not currently on the register, who dies.

4. The register index cards will be made day by day as the cases are admitted, and it is suggested that separate files be kept for patients still in hospital, for those transferred to other hospitals and for completed cases. The files should be arranged in dictionary order according to the surnames of the patients.

5. Alterations and additions to the register cards of completed cases will be authenticated by the medical officer making the alteration.

6. If the case is completed in the sense of paragraph 11 of this section, the register card will be completely filled in and a duplicate made which will be known as the "Report card."

7. Officers or enlisted personnel of the United States Navy or Marine Corps, members of the Army Nurse Corps, civilians attached to the American Expeditionary Forces, and prisoners of war, admitted to A. E. F. hospitals, shall be reported in the same manner as military patients from the American Expeditionary Forces. No report card to be made out for cases from the native civilian population or military patients of the allied forces.

8. The cards will be legibly written in indelible black ink, using the typewriter when practicable.

9. Entries must not be crowded. When the space provided on the front of the card under any heading is not sufficient to complete an entry, the record thereof will be continued on the back of the card, or, if still more space is required, upon an extension slip. The extension slip must be of the same size as the card, and be pasted to the lower margin of the back of the card, using about one-half an inch of the seam; this will place the seam at the top of the card when the latter is filled. When an entry is continued its two parts should be connected by cross references, using a small letter in parentheses, thus (a), so that the record can be readily followed.

10. Change of diagnosis will be made in the space "Complications, seq., etc.," giving the date of the change. The original diagnosis under "Cause of admission" will not be altered.

11. Report cards will be made at field hospitals, camp hospitals, base hospitals, general hospitals, and evacuation hospitals, for completed cases only—meaning cases returned to duty, retired, resigned, or discharged from the service, deserted, returned to the United States or died, or, in other words, all cases closed and not to be treated by other units of the A. E. F.

12. Such history and clinical records as may be necessary, including laboratory and X-ray blanks, will be made and retained as hospital records or forwarded with the patient on transfer to another hospital as indicated in Section VI, paragraph 7.

X. DIRECTIONS FOR PREPARING REGISTER CARDS.

1. *Name.*—The name should be correctly and legibly written, giving first name and surname in full; initial or abbreviation may be used for middle name only.

2. *Rank*, company and regiment or staff corps (for rank, etc., the usual abbreviations may be employed). Changes in the patient's rank, company, or regiment while his case is current on register will be recorded in this space, giving dates of changes.

3. Civilians and nurses should be designated as such under heading "Rank." Members of the naval and marine forces or prisoners of war, if patients, should be designated as such under the proper heading.

4. *Age, years.*—The age at birthday nearest to date admitted is required.

5. *Race.*—Use "W," "B," "Y," "R," "O," meaning "white," "black," "yellow," "red," and "others."

6. *Nativity.*—Place of birth; give State, if a native; country, if foreign. Usual abbreviation.

7. *Service, years.*—Give length of service to date of admission, in years and twelfths, whether continuous or not.

8. The register number will be omitted and the identification number of a soldier will be entered in its stead.

9. Under "Date of admission," give the day, month, and year which the data on the field medical card or diagnosis tag indicate was his first admission to a medical formation. This applies also to patients transferred to American hospitals from hospitals of the Allies.

10. *Cause of admission* (see Sec. XVII).—Give the name of the disease and its location if it is localized; or, in case of injury, its cause, location, character, and severity, with the attending circumstances, date of occurrence and nature of missile, weapon or other producing agent. When the patient has two or more diseases or injuries at the time of admission, each of them will be recorded under this head. Should the original disability, or, if there is more than one, should any of them, be cured before the final disposition of the patient, the fact and date of such cure will also be stated in this space.

11. The original diagnosis as set forth on diagnosis tag and field medical card should be used invariably, except where such terms as "not yet diagnosed" or "unknown" are used. In these cases the earliest definite diagnosis should be adopted. (For subsequent changes of diagnosis see Sec. IX, pars. 5 and 10.) The following exceptions to the provisions of the preceding paragraph must be made:

(*a*) When the original case has been completed, the patient discharged from hospital and is later readmitted for reconstruction, the word "reconstruction" should be entered in this space, stating definitely the defect.

(*b*) When the original admission is for operation to cure or correct a congenital or other defect, as, for example, hammer-toe or phimosis, the purpose to operate is the cause of admission and should be so recorded by the words "for operation," indicating the defect in brackets.

12. *In line of duty.*—Herein will be recorded, in the case of every officer or enlisted man on the active list, and of every officer and enlisted man on the retired list who is for the time serving under an assignment to active duty, the opinion of the medical officer, based on a full consideration of all the facts, as to whether the cause of admission was incurred in the line of duty, it being understood that the entry relates to the immediate cause of admission, and not to the remote cause. If the patient has two or more diseases or injuries at the time of admission, an opinion as to line of duty will be separately recorded for each. In forming and recording his opinion on this point the medical officer will be guided by the following instructions:

(*a*) All diseases or injuries from which an officer or enlisted man suffers while in the military service of the United States may be assumed to have occurred in the line of duty, unless the surgeon knows: First, that the disease or injury existed before entering the service; second, that it was contracted while absent from duty without permission; third, that it occurred in consequence of willful neglect or immoral conduct of the man himself; or, fourth, where the injury is self-inflicted. When the patient is admitted for an operation or procedure which is designed to improve his physical fitness or efficiency for the military service, such operation or procedure will be recorded as in the line of duty, without reference to the fact whether the condition to be remedied originated in the line of duty or not, provided that the primary cause is not the result of the patient's own misconduct.

(*b*) When a soldier is disabled while absent with leave, the question of line of duty must be determined by the circumstances attending the incurrence of the disability, but the fact of being so absent should be stated.

(*c*) When a medical officer expresses the opinion that an injury occurring during athletic sports, properly indulged in, was received in the line of duty, the opinion is accepted by the Surgeon General as satisfactory and final.

(*d*) In all cases in which the opinion is expressed by "no," and in cases of venereal diseases by "yes," the circumstances attending the incidence of the disability, and on which the opinion is based, should be stated under the diagnosis.

13. *Complications, seq., etc.*—Herein will be recorded complications and intercurrent diseases appearing subsequent to admission, surgical operations, and changes of diagnosis. The date will be given in each instance.

(*a*) When the intercurrent disability subsequently appearing is in no way dependent on the primary affection, the medical officer will record in this place his opinion as to whether it originated in the line of duty, with such explanatory remarks as may be necessary. Should it be cured before the final disposition of the patient the fact and date of cure will also be recorded here.

(*b*) Upon recording a change of diagnosis the medical officer will also record in this space his opinion whether the disability as diagnosed by him originated in the line of duty, with appropriate explanatory remarks when necessary.

(*c*) In recording a surgical operation its character will be briefly described, giving the commonly accepted name for it. The word "operation" alone is not sufficient. In every case note should be made of the anesthetic used, and of the time intervening between the onset of the disease, or the receipt of the injury, and the performance of the operation. If surgical shock preceded or followed operation, that fact should be stated.

14. *Disposition.*—Under "disposition," record the completion of the case by entry specifying the method of its completion. All cases are completed by return to duty, death, desertion, retirement, resignation, dismissal, discharge from the service, return to the United States, or by departure from the hospital on ordinary or sick leave or furlough.

(*a*) In the latter case a statement as to whether the cure was complete or not will be made on the card, and should the patient resume the status of sick upon return from leave or furlough the case will be registered anew.

(*b*) In case of death, the fact of death, and the result of the autopsy, if one was held, will be recorded in this space; also, if the death was due to the cause of admission, the general, determining and all contributing causes thereof, and a statement whether the cause of death originated in the service and in the line of duty, with an explanation of the circumstances upon which the opinion, if negative, is based. Should the cause of death in any case be unknown, a brief note of circumstances that throw light upon the subject will be entered. In case of suicide the cause or causes which led to the act will be stated.

(*c*) In case of retirement or discharge on account of wounds or disease, the fact of retirement or discharge on such account, and the degree of the disability will be recorded under this head; also, if the wound or disease for which retired or discharged was not the cause of admission, the same will be fully described and statement recorded whether it originated in the line of duty. When the opinion expressed is "no," the circumstances attending the incidence of the disability and on which the negative opinion is based should be recorded.

(*d*) The cases of patients who are retired from active service, or wholly retired or discharged from the service, by order, sentence, operation of law, or expiration of term, should be completed by entry specifying such fact; and a statement should be made of the degree of disability due to the complaint for which the individual was under treatment at the time of his separation from the service, unless it was unquestionably not received in the line of duty.

(*e*) The cases of officer patients who depart from the hospital or command in obedience to orders to proceed to the United States and await retirement will be completed upon such departure by recording the fact thereof and its date.

(*f*) When the disease or injury causiug death or discharge has been aggravated by the willful and persistent refusal of the patient to submit to such reasonable restrictions, methods of treatment, or surgical operations as would, in the opinion of the medical officer, have conduced to the cure or to the lessening of the disability, the fact should be noted.

(*g*) When a patient is returned to duty the entry, "duty," will suffice, the cure being assumed to be complete, unless a statement to the contrary is entered.

(*h*) Desertion is final disposition of the case, and the card should be completed accordingly. Should the deserter come again under military control and resume the status of sick, a new card will be made for him as for a new case, conformably to the general rule.

15. *Date of disposition.*—Give day, month, and year of disposition. Figures should not be used to designate months. In all cases returned to the United States for disposition on certificate of disability, the date of embarkation will be recorded.

16. *Name of hospital, etc.*—Enter in this space on every register card the designation of the hospital or medical formation to which the register pertains. Spaces 19 and 20 ("Sent with report of S. and W. for the month of ———" and "from") will not be filled out on the register card.

17. *Classification.*—Spaces 22, 23, 24, and 25, at the bottom of the face of the card are for the use of the Surgeon General's Office only, and will not be filled out on the register or report cards.

18. Space 26, "Days of treatment in current case," on back of card, will be filled out month by month on the register card, extending the table as may be necessary for cases remaining from one year to another. The day of admission will be counted as a day of treatment in every case. The day of completion of the case will *not* be counted as a day of treatment.

XI. REPORT OF SICK AND WOUNDED.

1. The report of sick and wounded will be composed of the nominal check list (Forms 51–A and 51–B), and report cards (Form 52), field envelope and contents, for all cases completed during the month in the sense of Section IX, paragraph 11, except for cases transferred to the United States. (See Sec. VIII.) Columns under headings. "Register No." and "Month completed" (Forms 51–A and 51–B) will not be made out. Entries under "Name" will be made in dictionary order.

2. The report will be submitted by all hospitals, and forwarded before the fifth day of the next succeeding month to the Chief Surgeon, A. E. F., direct.

3. Whenever practicable, courier service or other safe and rapid means should be used.

4. Great care will be exercised to see that the report is accurate in every detail.

5. The senior medical officer is responsible for the correctness and safe-keeping of the register. He will personally initial all report cards completed during the period of his responsibility, or he may designate one or more junior medical officers to initial them, preferably the officer in attendance.

* * * * * * *

XIV. A. E. F. PATIENTS TREATED IN FRENCH MEDICAL FORMATIONS.

1. For all patients of the A. E. F. received by A. E. F. hospitals from French medical formations, translation shall be made of the French records and the data entered on the regular A. E. F. forms. Thenceforth the case will be treated for the purpose of record and report as if it had already been in an American formation.

2. The French Service de Santé has been requested to evacuate all American patients to A. E. F. base hospitals as soon as transfer can be made without risk to the patient. If, for any reason, the transfer of such a patient necessitates the presence of a nurse or attendant, the surgeon of the American hospital will send the necessary attendants and transportation (ambulances) upon request of the médécin-chef of the French formation in order to insure the transfer in a satisfactory manner.

3. All clothes and other property of American soldiers who die in French sanitary formations or hospitals will be sent to the "Bureau de Pensions," who will transmit them to the nearest American effects depot.

XV. A. E. F. PATIENTS TREATED IN BRITISH HOSPITALS IN FRANCE.

1. For A. E. F. patients received from British medical formations the British field medical card and envelope will be utilized in place of the A. E. F. forms, and the case will be treated for record and report as if it had always been in A. E. F. formations. United States base hospital units serving with the British in France will forward the British field medical card, etc., together with the report card, for all A. E. F. cases completed in those units.

2. For cases transferred from United States base hospital units serving with the British to A. E. F. hospitals, the British field medical card, etc., will accompany the patient to such hospital. The same shall be true in the case of a patient transferred to British hospitals in France or England.

Paragraphs omitted deal with subjects not under consideration.

XVI. ALLIED PATIENTS IN A. E. F. HOSPITALS.

1. The procedure for cases of the Allies admitted to A. E. F. hospitals will be the same as that for our own patients, with the following exceptions:

(*a*) Where the patient has previously been handled by Allied formations, diagnosis tag, field medical card, etc., of the A. E. F. will not be substituted for the ones already used.

(*b*) Each month a report of casualties and changes will be sent to the Chief Surgeon's office, A. E. F., giving name, rank, organization, diagnosis, date of admission, and date of disposition, if any has been made.

2. French patients who may be hospitalized in American sanitary formations will be evacuated to the nearest French hospital as soon as their transfer can be made without risk. The evacuation will take place without any formalities, other than a previous understanding on the subject with the médécin-chef of the French hospital. If the case is evacuated, all medical and surgical documents which may be useful to the French will follow the patient.

3. All clothes and other property of French soldiers who die in American sanitary formations or hospitals will be sent to the "Bureau des Successions," 1 Rue Lacretelle, Paris.

4. If the case of a French soldier is completed in an A. E. F. base hospital, the medical data pertaining to the patient will be turned over to the French representative with the unit, or where no such representative has been appointed, will be sent to the Chief Surgeon's office, with the nominal roll.

XVII. NOMENCLATURE OF DISEASES AND AFFECTIONS AND RULES FOR RECORDING DISABILITIES.

1. Disease and injuries will, so far as practicable, be recorded on the register in accordance with the following table of diagnostic terms.[a] The table is not intended to prescribe a hard and fast rule, to be literally complied with in every particular, but rather to furnish a guide which in practice should be substantially followed. When diseases or injuries occur for which no terms are furnished in the table, or for which the terms furnished are general in character, they will be recorded under such scientific terms commonly applied to them by the profession as will briefly and accurately describe them.

(*a*) The letter L in parentheses following a term indicates that the *location* of the disability must be recorded; the letter C its *cause;* and the letter V its *variety*.

2. The following special requirements will be observed:

(*a*) Pathological lesions should be recorded rather than their symptoms.

(*b*) In all cases in which the cause of admission is a local manifestation of a general affection the character and locality of the one and the nature of the other should be stated.

(*c*) The organ or part affected should be specified when the name of the morbid condition fails to indicate it, as in paralysis, aneurysm, ulcer, herpes, etc.; also in inflammations, as adenitis, osteitis, arthritis, synovitis, etc.

(*d*) The term "heart disease" should not be recorded when the special affection can be determined.

(*e*) In pulmonary affections the lobe or lobes involved should be designated; also, in the case of diseases that are not always bilateral, whether the disease is confined to the right or left or extends to both lungs. The complications of pleurisy should be particularly noted.

(*f*) Diseases due to venereal contagion, to the abuse of stimulants or narcotics, or to immoral practices should be so recorded.

(*g*) Distinction should be made between inflammations of venereal origin and those of nonvenereal origin, as in cases of balanitis, orchitis, bubo, etc., specifying the nature of the venereal cause and the causation of the nonvenereal cases.

(*h*) Distinction should also be made between the venereal ulcer known as chancroid and the hard chancre of primary syphilis.

(*i*) The terms "venereal warts," "venereal bubo," etc., are indefinite and should not be used. The lesion should be recorded and its specific cause stated.

(*j*) Where a case is admitted to hospital for recurrence or relapse of a disease, or for an injury for which he has previously been treated, the word "old" will be set forth in parentheses after the diagnosis.

(*k*) In all cases of poisoning the name of the poison should be given.

(*l*) Special notes should be made of cases of malingering or feigned diseases and of the means employed for their detection.

[a] The list, which includes all diseases and injuries likely to be encountered, arranged according to system or part involved, is omitted.

(*m*) When no diagnosis can be reached, the fact should be stated, together with the condition which prevent the recognition of the disease or injury.

(*n*) The term "shell shock" will not be accepted as a diagnosis of disability or death. Conditions commonly referred to as "shell shock" should be reported under:

(*a*) Psychoneuroses (Section VI, "Nomenclature of Diseases").

(*b*) Concussion (Section XVIII, "Nomenclature of Diseases").

(*c*) Exhaustion (Section XVIII, "Nomenclature of Diseases").

* * * * * * *

XIX. APPROVED ABBREVIATIONS.

M.—Morphine.
A. T. S.—Antitetanic serum.
F. S.—Fracture simple.
F. C.—Fracture compound.
F. C. C.—Fracture compound comminuted.
G. S. W.—Wounds produced by flying missiles propelled by an explosive gas.
O.—Slight.
S.—Severe.
N. Y. D.—Not yet diagnosed, or undetermined.
F. U. O.—Fever of unknown origin.
D. A. H.—Disordered action of heart.
N. D. R.—Notifiable disease reported.

XX. DISCONTINUED FORMS.

Use of the following Medical Department forms will be discontinued in the A. E. F.: 51, 53; 83, 84, 85, 211.

Special attention of all organization surgeons is directed to the fact that, in the system authorized by this order, the carding of "Quarters" cases is not contemplated, nor will any cases, in the future, be "carded for record (or transfer) only," as formerly required by paragraphs 428 and 445 (b) M. M. D.

The foregoing will become effective on June 15, 1918.

For all patients remaining in hospital on that date the field medical card and envelope will be made out.

III. SICK AND WOUNDED FORMS.

DIAGNOSIS TAG

FRONT

Date, hour and station where tagged: Oct.10, 1918, 6 P.M.; Dressing Station No.10

Name Roe, Thomas A.

Rank and Regt. or Corps: Pvt. Co. A, 16th Infantry.

Diagnosis:

G.S.W. left femur and right humerus.

Treatment:

Morphine sulphate, .016.

A.T.S. 1500 units.

Signature:

T.L.K. Capt. M.C.

BACK

SUPPLEMENTAL RECORD:

Primary hemorrhage, left thigh, moderate. Pressure applied temporarily over femoral artery. First aid dressing.

INSTRUCTIONS

1. This form will be used, conformably to the provisions of the Manual for the Medical Department, for recording and reporting in time of war the sick and wounded with every mobile command in the theater of operations which is accompanied by a medical officer.

2. The cases will be entered on this list in the order of the dates on which they come under the observation or control of the sanitary personnel of the command; or, if separated from the command by death, discharge, departure on sick leave, etc., not being at the time on the list, according to the dates of such separation. Casualties suffered on a single day during an engagement, as shown by the duplicate diagnosis tags, will be entered in two groups, *first*, those among members of the command, *second*, those among members of other commands, each group in the following order: (1) killed; (2) wounded; (3) otherwise injured. In entering casualties incurred in action, only those should be included which have not been previously tagged by members of other organizations—except, first, that all cases which are retained by a field hospital for definitive treatment will be invariably entered on the list of each hospital, and, second, that all cases transferred to the line of communications will be entered on the list of the organization transferring them. The entries will be numbered from 1 upward consecutively in a single series beginning with the entrance of the command into the theater of operations.

3. Each case will be completed, conformably to the requirements of the Manual concerning the register of patients, by appropriate entry in the *Disposition* column. Cases of wounded who are sent from a station in advance to a station farther to the rear, but within the division, will be completed on the list as "sent to the rear." Cases turned over to the line of communications from a station within the division will be completed by indicating the fact of transfer and naming the sanitary formations to which they are transferred. Cases transferred from mobile sanitary formations on the line of communications will be completed in like manner. In the case of a patient who dies en route (as shown by the diagnosis tag) before reaching an evacuation or base hospital the additional entry "died en route" with the date of death, will be made on the list of the command to which the deceased belonged.

4. Cases which have not been completed with the command on or before the last day of the month (or which have not been disposed of at station for slightly wounded on the day they are first listed) will be recorded in the *Disposition* column as "remaining." They will be again recorded at the top of the list for the succeeding month (or day, at station for slightly wounded) under the heading "Remaining from the previous list" written across the face of the list, and will be separated from the current entries on the new list by a red line. In recording cases brought forward from the preceding list only the number, name, rank, organization, and disposition need be given; except that if the diagnosis is changed the new diagnosis will be given, with affirmative remark "Change of diagnosis."

5. All the sheets used will be fastened together at the end of the month (or day, at a station for slightly wounded) in the order of the serial numbers of the cases; the last sheet will be signed, the others initialed, by the proper officer; and the list disposed of as provided in the Manual.

6. An indelible pencil and carbon paper may be used in preparing the list. The original should be forwarded.

7. This form may be used, as provided in the Manual, for reporting casualties to the division surgeon and to the commander of the organization immediately after an engagement, and for involuntary or nominal lists of patients transferred from one command to another.

INSTRUCTIONS TO HOSPITALS FOR THE DAILY REPORT OF CASUALTIES AND CHANGES.

(A) This form to be used only for patients in hospitals or informants acting as such.

(B) All information to be arranged in the following order, writing the proper headings across the page.

1st Heading—Admission (Give "Source" of admission, "Line of Duty", "Own Misconduct". Note: "Line of Duty," or "Not in Line of Duty", use abbreviation "L" or "N".

2nd Heading—Change of diagnosis (Important changes only).

3rd Heading—Died (State whether from wounds in action, sickness, line of duty or own misconduct).

4th Heading—Discharge from hospital (Return to duty or United States; in former case specify where sent).

5th Heading—Transfer to other hospitals (Give name or number of hospital to which transferred).

6th Heading—A. W. O. L.—Give date and hour if possible.

7th Heading—Deserted—Give all information available.

8th Heading—Confinement—Give authority, particulars as to extent of.

9th Heading—Promotions and Demotions—Give authority and date of same.

10th Heading—A change of person to be notified in emergency, or change of address of person to be notified, must also be entered.

(C) All cases falling under each heading are to be found under that heading.

(D) Diagnosis to be given for each case under each heading; it should be the first entry under column "Casualties and Changes".

(E) Diagnosis will include nature of disease, injury or wound, also regional location, "better slight or severe ("G", or "S"), in action or accidently incurred. ("I. A." or "Acdt.").

(F) Any other information of vital or informative value respecting individual should be given, the particular fact in each instance being written out.

(G) Six copies to be made: three for Statistical Officer through which reports are forwarded; two for Chief Surgeon direct, A. E. F.; one to be retained.

FIG. 10.

REPORT SHEET
REPORT OF SICK AND WOUNDED
FORM 51
(ORIGINAL SIZE 8½" X 11½")
BACK

REMARKS:

Form 51
Medical Department, U. S. Army
(Revised Feb. 18, 1916)

INSTRUCTIONS

1. The Report of Sick and Wounded comprises the report sheet, Form 51, the nominal check list, Forms 52a and 52b, and the report cards.

2. The mean strength of the command for the period covered by the report should be used in computing the rates for the different tables. Divide the total number of man days of the period covered by the report by the number of days constituting the period. The nominal lists and reports of sick will be added together by heads or items (officers and men separately) and their sum is the total strength for the period. The nominal lists are the mean strength by items, and their sum is the total strength.

(a) The foregoing is the rule for commands which are intact. When, however, a part of the command is on field or detached service, regulations require a report of sick and wounded, appropriate deductions should be made in computing the strength at the main or permanent station of the troops not accompanied by a medical officer, which are in the vicinity of the command, but are not properly a part of it, are habitually attached to the command, and are included in the nominal lists.

(b) The mean strength of Medical Department organizations such as ambulance companies, hospital units, and hospital trains, will include the personnel of these organizations only; it will not include the sick and wounded patients in hospital trains and hospital ships, will include the personnel of the sanitary units, and will include the personnel transferred by transfer, or the strength of the commands from which such transferred cases came or to which they belong.

3. Write the number of the command in the upper right hand corner of the diagram on the third fold of this sheet, together with the number of cases of disease and injury among them. Officers and enlisted men should be separately reported. Include in the nominal lists, officers on duty, ex-officers, ex-soldiers, applicants for enlistment who have not been sworn in, and members of the organized militia not mustered for the purpose of this tabulation while with army commands.

4. The record of births will give the date of birth, the sex and name of the child, the name of the father, the name and maiden name of the mother, the occupation, the maiden name of the mother, and whether the child will be for second etc., of the marriage. The record of marriages will give the date of the marriage, the name, age, and birthplace of the groom, and the name, age, and birthplace of the bride. The record of death will show the date of the death, the name, age, and birthplace of the deceased, and the cause of death.

5. The report card will be a full and exact transcript of its register in chronological order of all cases on the last day covered by the report, except in cases in which the report card has been previously forwarded by the report. Space 20 will be filled out on report cards from mobile or field commands only. Any other than the word "from" will be regarded as the location of the hospital or other the word "from" will be regarded as the location if it is different from the location given in space 18; if, however, the word "same" will be entered in space 19. In space 14, the date filled out on the report cards from a hospital which is permanently attached to the command will be the date of the transfer forward from the preceding year card. The date of the transfer in that case during the current year card. The upper and lower should be left blank. The card, and the upper margin on the back, should be left blank.

6. Entries on the report sheet, nominal lists, and report cards should be made with pen and ink, or permanent black ink.

7. For mailing: With back of sheet up, fold forward from bottom with the designation of the hospital, city, and state on the outside.

NOMINAL CHECK LIST FOR REPORT OF SICK AND WOUNDED AT

Walter Reed General Hospital, Washington, D.C.

For July, *1919*

INSTRUCTIONS.—The list for January in each year will give in sequence of register numbers the names, etc., of all patients, military or civilian, remaining from the previous year, and of all registered during the month. The list for any subsequent month will give in like sequence the names, etc., of patients registered during the month, omitting the names of those remaining from the previous month. The column "Month Completed" will not be filled in at post on the list forwarded; but entry therein should be made on the retained list as cases are completed. In the case of civilian patients the word "Civilian" will be entered across the columns "Rank," "Co.," "Organization." A duplicate of the list will be retained with the medical records of the post or command

Abdomen and pelvis, admissions, deaths, and case fatality rates, battle injuries, by region and by military agent (poisonous gases excepted), single and multiple wounds, officers and enlisted men 1024

Abscess:
- admissions and deaths, enlisted men, United States and Europe 579
- admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
  - colored enlisted men in the United States 852, 854, 856, 876, 878, 880
  - white enlisted men in the United States 702, 704, 706, 732, 734, 736
- admissions, by countries, officers and enlisted men 98, 100, 122, 124
- admissions, by months—
  - colored enlisted men in Europe 482, 484, 492
  - colored enlisted men in the United States 450, 452, 466, 468
  - enlisted men, color not stated, in Europe 566
  - white enlisted men in Europe 306, 308, 322, 324
  - white enlisted men in the United States 274, 276, 290, 292
- concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 634, 636, 638, 640, 642, 644, 646, 648, 650
- days lost, by countries, officers and enlisted men 226, 228, 250, 252
- deaths and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 676
- deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
  - colored enlisted men in the United States 888, 890, 892, 900, 902, 904
  - white enlisted men in the United States 750, 752, 754, 768, 770, 772
  - deaths, by countries, officers and enlisted men 142, 144, 158, 160
- deaths, by months—
  - colored enlisted men in Europe 512, 516
  - colored enlisted men in the United States 498, 500, 506, 508
  - enlisted men, color not stated, in Europe 570
  - white enlisted men in Europe 358, 360, 370, 372
  - white enlisted men in the United States 334, 336, 346, 348
- discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
  - colored enlisted men in the United States 918, 920, 922, 942, 944, 946
  - white enlisted men in the United States 792, 794, 796, 822, 824, 826
- discharges for disability, by countries, officers and enlisted men 178, 180, 202, 204
- discharges for disability, by months—
  - colored enlisted men in Europe 552, 558
  - colored enlisted men in the United States 526, 528, 542, 544
  - white enlisted men in Europe 414, 416, 430, 432
  - white enlisted men in the United States 386, 388, 402, 404

Abscess, periapical, focal infection from:
- admissions and deaths, enlisted men, United States and Europe 578
- admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
  - colored enlisted men in the United States 846, 848, 850, 870, 872, 874
  - white enlisted men in the United States 696, 698, 700, 726, 728, 730
- admissions, by countries, officers and enlisted men 98, 100, 122, 124
- admissions, by months—
  - colored enlisted men in Europe 478, 480, 490
  - colored enlisted men in the United States 446, 448, 462, 464
  - enlisted men, color not stated, in Europe 564
  - white enlisted men in Europe 302, 304, 318, 320
  - white enlisted men in the United States 270, 272, 286, 288
- concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 616, 618, 620, 622, 624, 626, 628, 630, 632
- days lost, by countries, officers and enlisted men 226, 228, 250, 252
- deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 674
- discharges for disability by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 792, 794, 796, 822, 824, 826
- discharges for disability, by countries, officers and enlisted men 178, 180, 202, 204
- discharges for disability, by months, white enlisted men in the United States 382, 384, 398, 400

Page.
Abscess, perinephritic:
admissions and deaths, enlisted men, United States and Europe 579
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 852, 854, 856, 876, 878, 880
white enlisted men in the United States 696, 698, 700, 726, 728, 730
admissions, by countries, officers and enlisted men 98, 100, 122, 124
admissions by months—
colored enlisted men in Europe 482, 484, 492
colored enlisted men in the United States 450, 452, 466, 468
enlisted men, color not stated, in Europe 566
white enlisted men in Europe 306, 308, 322, 324
white enlisted men in the United States 274, 276, 290, 292
concurrent diseases, complications and sequelæ, enlisted men in the United States and Europe 634, 636, 638, 640, 642, 644, 646, 648, 650
days lost, by countries, officers and enlisted men 226, 228, 250, 252
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 676
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps) white enlisted men in the United States 750, 752, 754, 768, 770, 772
deaths, by countries, officers, and enlisted men 142, 144, 158, 160
deaths, by months—
colored enlisted men in Europe 512, 516
white enlisted men in Europe 358, 360, 370, 372
white enlisted men in the United States 334, 336, 346, 348
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 792, 794, 796, 822, 824, 826
discharges for disability, by countries, officers and enlisted men 178, 180, 202, 204
discharges for disability, by months—
white enlisted men in Europe 414, 416, 430, 432
white enlisted men in the United States 386, 388, 402, 404
Accidents:
railroad, nonbattle injury—
admissions, by countries, officers and enlisted men 106, 108, 130, 132
days lost, by countries, officers and enlisted men 234, 236, 258, 260
deaths, by countries, officers and enlisted men 146, 148, 162, 164
discharges for disability, by countries, officers and enlisted men 186, 188, 210, 212
street car, nonbattle injury—
admissions for, by countries, officers and enlisted men 106, 108, 130, 132
days lost, by countries, officers and enlisted men 234, 236, 258, 260
deaths, by countries, officers and enlisted men 146, 148, 162, 164
discharges for disability, by countries, officers and enlisted men 186, 188, 210, 212
Accidents and injuries, admissions and deaths, nonbattle injuries, total Army, absolute numbers, ratios per 1,000 strength, rate per 1,000 of total nonbattle injuries, and case fatality rates 1015
Accidents and other causes, died of, American Expeditionary Forces, North Russia and Siberia 1179
Acromegaly:
admissions and deaths, enlisted men, United States and Europe 576
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 834, 836, 838, 858, 860, 862
white enlisted men in the United States 678, 680, 682, 708, 710, 712
admissions, by countries, officers and enlisted men 90, 92, 114, 116
admissions, by months—
colored enlisted men in Europe 470, 472, 486
colored enlisted men in the United States 438, 440, 454, 456
enlisted men, color not stated, in Europe 560
white enlisted men in Europe 294, 296, 310, 312
white enlisted men in the United States 262, 264, 278, 280
concurrent diseases, complications, and sequelæ, enlisted men, in the United States and Europe 580, 582, 584, 586, 588, 590, 592, 594, 596
days lost, by countries, officers and enlisted men 218, 220, 242, 244
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 670
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 906, 908, 910, 930, 932, 934
white enlisted men in the United States 774, 776, 778, 804, 806, 808
discharges for disability, by countries, officers and enlisted men 166, 168, 190, 192

Acromegaly—Continued.
discharges for disability, by months— Page.
colored enlisted men in the United States 518, 520, 534, 536
enlisted men, color not stated, in Europe 572
white enlisted men in the United States 374, 376, 390, 392
Addison's disease:
admissions and deaths, enlisted men, United States and Europe 576
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 834, 836, 838, 858, 860, 862
white enlisted men in the United States 678, 680, 682, 708, 710, 712
admissions, by countries, officers and enlisted men 86, 88, 110, 112
admissions by months—
colored enlisted men in Europe 470, 472, 486
colored enlisted men in the United States 438, 440, 454, 456
white enlisted men in Europe 294, 296, 310, 312
white enlisted men in the United States 262, 264, 278, 280
concurrent diseases, complications, and sequelæ, enlisted men, in the United States and Europe 580, 582, 584, 586, 588, 590, 592, 594, 596
days lost, by countries, officers and enlisted men 214, 216, 238, 240
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 670
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 882, 884, 886, 894, 896, 898
white enlisted men in the United States 738, 740, 742, 756, 758, 760
deaths, by countries, officers and enlisted men 134, 136, 150, 152
deaths, by months—
colored enlisted men in Europe 510, 514
colored enlisted men in the United States 494, 496, 502, 504
white enlisted men in Europe 350, 352, 362, 364
Adenoids:
admissions and deaths, enlisted men, United States and Europe 577
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 864, 866, 868
white enlisted men in the United States 690, 692, 694, 720, 722, 724
admissions by countries, officers and enlisted men 94, 96, 118, 120
admissions by months—
colored enlisted men in Europe 474, 476, 488
colored enlisted men in the United States 442, 444, 458, 460
enlisted men, color not stated, in Europe 562
white enlisted men in Europe 298, 300, 314, 316
white enlisted men in the United States 266, 268, 282, 284
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 598, 600, 602, 604, 606, 608, 610, 612, 614
days lost, by countries, officers and enlisted men 222, 224, 246, 248
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 672
deaths, by countries, officers and enlisted men 138, 140, 154, 156
deaths by months, white enlisted men in Europe 354, 356, 366, 368
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 786, 788, 790, 816, 818, 820
discharges for disability, by countries, officers and enlisted men 174, 176, 198, 200
discharges for disability, by months, white enlisted men in the United States 378, 380, 394, 396
Adhesions, peritoneal:
admissions and deaths, enlisted men, United States and Europe 579
admissions by camps of occurrence and by State of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 852, 854, 856, 876, 878, 880
white enlisted men in the United States 696, 698, 700, 726, 728, 730
admissions by countries, officers and enlisted men 98, 100, 122, 124
admissions, by months—
colored enlisted men in Europe 482, 484, 490
colored enlisted men in the United States 450, 452, 466, 468
enlisted men, color not stated, in Europe 564
white enlisted men in Europe 306, 308, 322, 324
white enlisted men in the United States 274, 276, 290, 292
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 634, 636, 638, 640, 642, 644, 646, 648, 650

Adhesions, peritoneal—Continued. Page.
days lost, by countries, officers and enlisted men 226, 228, 250, 252
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 676
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 750, 752, 754, 768, 770, 772
deaths, by countries, officers and enlisted men 142, 144, 158, 160
deaths, by months—
colored enlisted men in Europe 512, 516
white, enlisted men in Europe 358, 360, 370, 372
white enlisted men in the United States 334, 336, 346, 348
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 918, 920, 922, 942, 944, 946
white enlisted men in the United States 792, 794, 796, 822, 824, 826
discharges for disability, by countries, officers and enlisted men 178, 180, 202, 204
discharges for disability, by months—
colored enlisted men in the United States 526, 528, 542, 544
white enlisted men in the United States 386, 388, 402, 404
Admissions:
battle injuries—
by arms of service, by months, total officers and enlisted men, absolute numbers and ratios per 1,000 1025
by military agents, officers, and enlisted men, absolute numbers, and ratios per 1,000 1019
officers and enlisted men, absolute numbers and ratios per 1,000 1017
by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States, absolute numbers 834–857
colored enlisted men in the United States, ratios per 1,000 858–881
white enlisted men in the United States, absolute numbers 678–707
white enlisted men in the United States, ratios per 1,000 708–737
by countries, including transports—
officers and enlisted men, absolute numbers 86–109
officers and enlisted men, ratios per 1,000 110–132
by months—
colored enlisted men in Europe, absolute numbers 470–485
colored enlisted men in Europe, annual ratios per 1,000 486–493
colored enlisted men in the United States, absolute numbers 438–453
colored enlisted men in the United States, annual ratios per 1,000 454–469
enlisted men, color not stated, in Europe, absolute numbers 560–567
white enlisted men in Europe, absolute numbers 294–309
white enlisted men in Europe, annual ratios per 1,000 310–325
white enlisted men in the United States, absolute numbers 262–277
white enlisted men, in the United States, annual ratios per 1,000 278–293
external causes of (excluding battle injuries) by countries, officers and enlisted men 102, 104, 126, 128
influenza and common respiratory diseases, measles, and the pneumonias, by camps of occurrence, by months—
colored enlisted men, United States, absolute numbers 994–1006
white enlisted men, United States absolute numbers 962–977
Admissions and deaths:
for battle injuries and killed in action, by arms of service, total officers and enlisted men, absolute numbers, ratios per 1,000, and case fatality rates 1028
for diseases, enlisted men, United States and Europe, absolute numbers, ratios per 1,000, and percentage rates 576–579
nonbattle injuries, total Army, absolute numbers, ratios per 1,000 strength, rate per 1,000 of total nonbattle injuries, and case fatality rates 1015
Admissions, deaths, and case fatality rates:
battle injuries—
by gunshot missiles, officers and enlisted men, absolute numbers and percentage rates 1023
by poisonous gases, officers and enlisted men, absolute numbers and percentage rates 1023
by region and by military agent, single and multiple wounds, officers and enlisted men 1024
Admissions, deaths, discharges for disability and days lost, including killed in action, total Army, excluding North Russia and Siberia, absolute numbers, ratios per 1,000 and percentages 1180
Admissions for diseases (all), by camps, by months, total enlisted men, United States, absolute numbers 954–955

Page.
Aërial bombing:
admissions, battle injuries, officers and enlisted men 1019
days lost in hospital, battle injuries, officers and enlisted men 1023
deaths, battle injuries, officers and enlisted men 1021
discharges for disability, battle injuries, officers and enlisted men 1022
Aerogenes capsulatus infection:
admissions and deaths, enlisted men, United States and Europe 576
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 678, 680, 682, 708, 710, 712
admissions by countries, officers and enlisted men 86, 88, 110, 112
admissions by months—
white enlisted men in Europe 294, 296, 310, 312
white enlisted men in the United States 262, 264, 278, 280
concurrent diseases, complications, and sequelæ, enlisted men, in the United States and Europe 580, 582, 584, 586, 588, 590, 592, 594, 596
days lost, by countries, officers and enlisted men 214, 216, 238, 240
Aëroplane, battle injuries by:
admissions, officers and enlisted men 1019
days lost in hospital, officers and enlisted men 1023
deaths, officers and enlisted men 1021
discharges for disability, officers and enlisted men 1022
Aëroplane, nonbattle injuries by:
admissions, by countries, officers and enlisted men 106, 108, 130, 132
days lost, by countries, officers and enlisted men 234, 236, 258, 260
deaths, by countries, officers and enlisted men 146, 148, 162, 164
discharges for disability, by countries, officers and enlisted men 186, 188, 210, 212
Age:
deaths, and discharges for disability, by total officers, and white and colored enlisted men in the United States and Europe, absolute numbers 670–677
strength by, officers and enlisted men, United States and Europe 25
Agent causing injury (excluding battle injuries):
admissions, by countries, officers and enlisted men 106, 108, 130, 132
deaths, by countries, officers and enlisted men 146, 148, 162, 164
Agent not stated:
admissions, battle injuries, officers and enlisted men 1019
days lost in hospital, battle injuries, officers and enlisted men 1023
deaths, battle injuries, officers and enlisted men 1021
discharges for disability, battle injuries, officers and enlisted men 1022
Agents, external, nonbattle injury by:
admissions, by countries, officers and enlisted men 106, 108, 130, 132
days lost, by countries, officers and enlisted men 234, 236, 258, 260
deaths, by countries, officers and enlisted men 146, 148, 162, 164
discharges for disability, by countries, officers and enlisted men 186, 188, 210, 212
Agents, military, battle injuries by:
admissions, officers and enlisted men, absolute numbers and ratios per 1,000 1019
deaths, officers and enlisted men, absolute numbers and ratios per 1,000 1021
days lost in hospital, officers and enlisted men, absolute numbers and ratios per 1,000 1023
discharges for disability, officers and enlisted men, absolute numbers and ratios per 1,000 1022
Agents, military (poisonous gases excepted); battle injuries, by region and by agent, admissions deaths, and case fatality rates, officers and enlisted men 1024
Agents, military, nonbattle injury by:
admissions by countries, officers and enlisted men 234, 236, 258, 260
days lost, by countries, officers and enlisted men 234, 236, 258, 260
deaths, by countries, officers and enlisted men 146, 148, 162, 164
discharges for disability, by countries, officers and enlisted men 186, 188, 210, 212
Air machines. (*See* Aëroplane.)
Alcoholism (acute or chronic):
admissions and deaths, enlisted men, United States and Europe 576
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 834, 836, 838, 858, 860, 862
white enlisted men in the United States 684, 686, 688, 714, 716, 718
admissions, by countries, officers and enlisted men 90, 92, 114, 116
admissions, by months—
colored enlisted men in Europe 470, 472, 486
colored enlisted men in the United States 438, 440, 454, 456

Alcoholism—Continued.
admissions, by months—Continued. Page.
enlisted men, color not stated, in Europe 560
white enlisted men in Europe 294, 296, 310, 312
white enlisted men in the United States 262, 264, 278, 280
concurrent diseases, complications, and sequelæ, enlisted men, in the United States and Europe 580, 582, 584, 586, 588, 590, 592, 594, 596
days lost, by countries, officers and enlisted men 218, 220, 242, 244
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 670
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 738, 740, 742, 756, 758, 760
deaths, by countries, officers and enlisted men 134, 136, 150, 152
deaths, by months—
enlisted men, color not stated, in Europe 568
white enlisted men in Europe 350, 352, 362, 364
white enlisted men in the United States 326, 328, 338, 340
discharges for disability, by camps of occurrence, and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 906, 908, 910, 930, 932, 934
white enlisted men in the United States 774, 776, 778, 804, 806, 808
discharges for disability, by countries, officers and enlisted men 170, 172, 194, 196
discharges for disability, by months—
colored enlisted men in the United States 518, 520, 534, 536
white enlisted men in Europe 406, 408, 422, 424
white enlisted men in the United States 374, 376, 390, 392
Amaurosis:
admissions and deaths, enlisted men, United States and Europe 577
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 840, 842, 844, 864, 866, 868
white enlisted men in the United States 684, 686, 688, 714, 716, 718
admissions, by countries, officers and enlisted men 90, 92, 114, 116
admissions, by months—
colored enlisted men in Europe 474, 476, 488
colored enlisted men in the United States 442, 444, 458, 460
enlisted men, color not stated, in Europe 562
white enlisted men in Europe 298, 300, 314, 316
white enlisted men in the United States 266, 268, 282, 284
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 598, 600, 602, 604, 606, 608, 610, 612, 614
days lost, by countries, officers and enlisted men 218, 220, 242, 244
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 672
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 912, 914, 916, 936, 938, 940
white enlisted men in the United States 780, 782, 784, 810, 812, 814
discharges for disability, by countries, officers and enlisted men 170, 172, 194, 196
discharges for disability, by months—
colored enlisted men in the United States 522, 524, 538, 540
enlisted men, color not stated, in Europe 572
white enlisted men in Europe 410 412, 426, 428
white enlisted men in the United States 378, 380, 394, 396
Amblyopia:
admissions and deaths, enlisted men, United States and Europe 577
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 840, 842, 844, 864, 866, 868
white enlisted men in the United States 684, 686, 688, 714, 716, 718
admissions by countries, officers and enlisted men 90, 92, 114, 116
admissions by months—
colored enlisted men in Europe 474, 476, 488
colored enlisted men in the United States 442, 444, 458, 460
enlisted men, color not stated, in Europe 562
white enlisted men in Europe 298, 300, 314, 316
white enlisted men in the United States 266, 268, 282, 284
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 598, 600, 602, 604, 606, 608, 610, 612, 614
days lost, by countries, officers and enlisted men 218, 220, 242, 244

Amblyopia—Continued. Page.
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 672
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 912, 914, 916, 936, 938, 940
white enlisted men in the United States 780, 782, 784, 810, 812, 814
discharges for disability, by countries, officers and enlisted men 170, 172, 194, 196
discharges for disability, by months—
colored enlisted men in the United States 522, 524, 538, 540
white enlisted men in Europe 410, 412, 426, 428

Appendicitis—Continued.
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 918, 920, 922, 942, 944, 946
white enlisted men in the United States 792, 794, 796, 822, 824, 826
discharges for disability, by countries, officers and enlisted men 178, 180, 202, 204
discharges for disability, by months—
colored enlisted men in Europe 552, 558
colored enlisted men in the United States 526, 528, 542, 544
enlisted men, color not stated, in Europe 574
white enlisted men in Europe 414, 416, 430, 432
white enlisted men in the United States 382, 384, 398, 400
Arms of service:
admissions and deaths by, battle injuries and killed in action, total officers and enlisted men, absolute numbers, ratios per 1,000, and case fatality rates 1028
admissions by, battle injuries, by months, total officers and enlisted men, absolute numbers, and ratios per 1,000 1025
deaths in hospital by, battle injuries, by months, total officers and enlisted men, absolute numbers and ratios per 1,000 1026
killed in action by, by months, total officers and enlisted men, absolute numbers and ratios per 1,000 1027
strength by, and by months, total officers and enlisted men, American Expeditionary Forces 82
Army, strength of, by months, United States and Europe 17
Army, total:
excluding North Russia and Siberia, admissions, deaths, discharges for disability and days lost, including killed in action, absolute numbers, ratios per 1,000 and percentages 1180
nonbattle injuries, admissions and deaths, absolute numbers, ratios per 1,000 strength, rate per 1,000 total nonbattle injuries and case fatality rates 1015
strength of, by months, all countries, officers and enlisted men, including white, colored, and native troops 15
Arrhythmias, cardiac. (*See* Cardiac arrhythmias.)
Arsine:
battle injuries by—
admissions, officers and enlisted men 1019
admissions, deaths, and case fatality rates, officers and enlisted men 1023
days lost in hospital, officers and enlisted men 1023
deaths, officers and enlisted men 1021
discharges for disability, officers and enlisted men 1022
Arteries, diseases of:
admissions and deaths, enlisted men, United States and Europe 578
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 846, 848, 850, 870, 872, 874
white enlisted men in the United States 690, 692, 694, 720, 722, 724
admissions by countries, officers and enlisted men 94, 96, 118, 120
admissions, by months—
colored enlisted men in the United States 446, 448, 462, 464
white enlisted men in Europe 302, 304, 318, 320
white enlisted men in the United States 270, 272, 286, 288
concurrent diseases, complications and sequelæ, enlisted men in the United States and Europe 616, 618, 620, 622, 624, 626, 628, 630, 632
days lost, by countries, officers and enlisted men 222, 224, 246, 248
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 744, 746, 748, 762, 764, 766
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 674
deaths, by countries, officers and enlisted men 138, 140, 154, 156
deaths, by months, white enlisted men in the United States 330, 332, 342, 344
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 912, 914, 916, 936, 938, 940
white enlisted men in the United States 786, 788, 790, 816, 818, 820
discharges for disability, by countries, officers and enlisted men 174, 176, 198, 200
discharges for disability by months—
colored enlisted men in the United States 522, 524, 538, 540
white enlisted men in the United States 382, 384, 398, 400
Arteriosclerosis and hypertension:
admissions and deaths, enlisted men, United States and Europe 578
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 846, 848, 850, 870, 872, 874
white enlisted men in the United States 690, 692, 694, 720, 722, 724

Arteriosclerosis and hypertension—Continued. Page.
admissions by countries, officers and enlisted men 94, 96, 118, 120
admissions by months—
colored enlisted men in Europe 478, 480, 490
colored enlisted men in the United States 446, 448, 462, 464
enlisted men, color not stated, in Europe 564
white enlisted men in Europe 302, 304, 318, 320
white enlisted men in the United States 270, 272, 286, 288
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 616, 618, 620, 622, 624, 626, 628, 630, 632
days lost, by countries, officers and enlisted men 222, 224, 246, 248
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 674
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 888, 890, 892, 900, 902, 904
white enlisted men in the United States 744, 746, 748, 762, 764, 766
deaths, by counties, officers and enlisted men 138, 140, 154, 156
deaths by months—
colored enlisted men in the United States 498, 500, 506, 508
enlisted men, color not stated, in Europe 568
white enlisted men in Europe 354, 356, 366, 368
white enlisted men in the United States 330, 332, 342, 344
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 912, 914, 916, 936, 938, 940
white enlisted men in the United States 786, 788, 790, 816, 818, 820
discharges for disability, by countries, officers and enlisted men 174, 176, 198, 200
discharges for disability, by months—
colored enlisted men in Europe 552, 558
colored enlisted men in the United States 522, 524, 538, 540
white enlisted men in Europe 410, 412, 426, 428
white enlisted men in the United States 382, 384, 398, 400
Arthritis:
admissions and deaths, enlisted men, United States and Europe 576
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 834, 836, 838, 858, 860, 862
white enlisted men in the United States 678, 680, 682, 708, 710, 712
admissions by countries, officers and enlisted men 86, 88, 110, 112
admissions, by months—
colored enlisted men in Europe 470, 472, 486
colored enlisted men in the United States 438, 440, 454, 456
enlisted men, color not stated, in Europe 560
white enlisted men in Europe 294, 296, 310, 312
white enlisted men in the United States 262, 264, 278, 280
concurrent diseases, complications and sequelæ, enlisted men in the United States and Europe 580, 582, 584, 586, 588, 590, 592, 594, 596
days lost, by countries, officers and enlisted men 214, 216, 238, 240
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 670
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 882, 884, 886, 894, 896, 898
white enlisted men in the United States 738, 740, 742, 756, 758, 760
deaths, by countries, officers and enlisted men 134, 136, 150, 152
deaths, by months—
colored enlisted men in Europe 510, 514
colored enlisted men in the United States 494, 496, 502, 504
enlisted men, color not stated, in Europe 568
white enlisted men in Europe 350, 352, 362, 364
white enlisted men in the United States 326, 328, 338, 340
discharges for disability, by countries, officers and enlisted men 166, 168, 190, 192
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 906, 908, 910, 930, 932, 934
white enlisted men in the United States 774, 776, 778, 804, 806, 808
discharges for disability, by months—
colored enlisted men in Europe 550, 556
colored enlisted men in the United States 518, 520, 534, 536
enlisted men, color not stated, in Europe 572

Arthritis—Continued.
discharges for disability, by months—Continued. Page.
white enlisted men in Europe 406, 408, 422, 424
white enlisted men in the United States 374, 376, 390, 392
Articular rheumatism, acute. (*See* Rheumatism, acute articular.)
Artillery:
admissions and deaths, battle injuries and killed in action, total officers and enlisted men 1028
admissions, battle injuries, by months, total officers and enlisted men 1025
deaths in hospital, battle injuries, by months, total officers and enlisted men 1026
killed in action, by months, total officers and enlisted men 1027
Artillery, Infantry, machine gun battalions, Engineers, and, wounds by gas and by gunshot missiles, and killed in action, by month and by day 1029–1177
Ascaris lumbricoides:
admissions and deaths, enlisted men, United States and Europe 578
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 846, 848, 850, 870, 872, 874
white enlisted men in the United States 696, 698, 700, 726, 728, 730
admissions by countries, officers and enlisted men 98, 100, 122, 124
admissions, by months—
colored enlisted men in Europe 478, 480, 490
colored enlisted men in the United States 446, 448, 462, 464
enlisted men, color not stated, in Europe 564

admissions and deaths, enlisted men, United States and Europe 578
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 846, 848, 850, 870, 872, 874
white enlisted men in the United States 690, 692, 694, 720, 722, 724
admissions by countries, officers and enlisted men 94, 96, 118, 120
admissions, by months—
colored enlisted men in the United States 446, 448, 462, 464
color not stated, in Europe 564
white enlisted men in Europe 302, 304, 318, 320
white enlisted men in the United States 270, 272, 286, 288
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 616, 618, 620, 622, 624, 626, 628, 630, 632
days lost, by countries, officers and enlisted men 222, 224, 246, 248
deaths, and discharges for disability, by age, total officers and white and colored enlisted men in the United States and Europe 674
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 912, 914, 916, 942, 944, 946
white enlisted men in the United States 786, 788, 790, 816, 818, 820
discharges for disability, by countries, officers and enlisted men 174, 176, 198, 200
discharges for disability, by months—
colored enlisted men in the United States 526, 528, 542, 544
white enlisted men in Europe 414, 416, 430, 432
white enlisted men in the United States 382, 384, 398, 400
Carriers:
admissions and deaths, enlisted men, United States and Europe 576
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 834, 836, 838, 858, 860, 862
white enlisted men in the United States 678, 680, 682, 708, 710, 712
admissions by countries, officers and enlisted men 86, 88, 110, 112
admissions, by months—
colored enlisted men in Europe 470, 472, 486
colored enlisted men in the United States 438, 440, 454, 456
enlisted men, color not stated, in Europe 560
white enlisted men in Europe 294, 296, 310, 312
white enlisted men in the United States 262, 264, 278, 280
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 580, 582, 584, 586, 588, 590, 592, 594, 596
days lost, by countries, officers and enlisted men 214, 216, 238, 240
deaths, and discharges for disability, by age, total officers and white and colored enlisted men in the United States and Europe 670
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 774, 776, 778, 804, 806, 808
discharges for disability, by countries, officers and enlisted men 166, 168, 190, 192
discharges for disability, by months—
enlisted men, color not stated, in Europe 572
white enlisted men in the United States 374, 376, 390, 392
Case fatality rates. (*See* Admissions, deaths, and case fatality rates.)

Page.
Cataract:
admissions and deaths, enlisted men, United States and Europe 577
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 840, 842, 844, 864, 866, 868
white enlisted men in the United States 684, 686, 688, 714, 716, 718
admissions by countries, officers and enlisted men 90, 92, 114, 116
admissions by months—
colored enlisted men in Europe 474, 476, 488
colored enlisted men in the United States 442, 444, 458, 460
enlisted men, color not stated, in Europe 562
white enlisted men in Europe 298, 300, 314, 316
white enlisted men in the United States 266, 268, 282, 284
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 598, 600, 602, 604, 606, 608, 610, 612, 614
days lost, by countries, officers, and enlisted men 218, 220, 242, 244
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 672
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 912, 914, 916, 936, 938, 940

colored enlisted men in the United States 438, 440, 454, 456
enlisted men, color not stated, in Europe 560
white enlisted men in Europe 294, 296, 310, 312
white enlisted men in the United States 262, 264, 278, 280
concurrent diseases, complications, and sequelæ, enlisted men, in the United States and Europe 580, 582, 584, 586, 588, 590, 592, 594, 596
days lost, by countries, officers and enlisted men 214, 216, 238, 240
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 670
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 738, 740, 742, 756, 758, 760
deaths, by countries, officers and enlisted men 134, 136, 150, 152
deaths, by months—
colored enlisted men in Europe 510, 514
enlisted men, color not stated, in Europe 568
white enlisted men in Europe 350, 352, 362, 364
white enlisted men in the United States 326, 328, 338, 340
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 906, 908, 910, 930, 932, 934
white enlisted men in the United States 774, 776, 778, 804, 806, 808
discharges for disability, by countries, officers and enlisted men 166, 168, 190, 192
discharges for disability, by months—
colored enlisted men in the United States 518, 520, 534, 536
white enlisted men in Europe 406, 408, 422, 424
white enlisted men in the United States 374, 376, 390, 392
Chicken-pox:
admissions and deaths, enlisted men, United States and Europe 576
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 834, 836, 838, 858, 860, 862
white enlisted men in the United States 678, 680, 682, 708, 710, 712
admissions by countries, officers and enlisted men 86, 88, 110, 112
admissions, by months—
colored enlisted men in Europe 470, 472, 486
colored enlisted men in the United States 438, 440, 454, 456
enlisted men, color not stated, in Europe 560
white enlisted men in Europe 294, 296, 310, 312
white enlisted men in the United States 262, 264, 278, 280

Chicken-pox—Continued. Page.
concurrent diseases, complications, and sequelæ, enlisted men, in the United States and Europe 580, 582, 584, 586, 588, 590, 592, 594, 596
days lost, by countries officers and enlisted men 214, 216, 238, 240
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 670
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 738, 740, 742, 756, 758, 760
deaths, by countries, officers and enlisted men 134, 136, 150, 152
deaths, by months, white enlisted men in the United States 326, 328, 338, 340
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 774, 776, 778, 804, 806, 808
discharges for disability, by countries, officers and enlisted men 166, 168, 190, 192
discharges for disability, by months, white enlisted men in the United States 374, 376, 390, 392

Chlorine, battle injuries by:
admissions, deaths, and case fatality rates, officers and enlisted men 1023
admissions, officers and enlisted men 1019
days lost in hospital, officers and enlisted men 1023
deaths, officers and enlisted men 1021
discharges for disability, officers and enlisted men 1022

Chlorosis. (*See* Anemia.)

Cholecystitis:
admissions and deaths, enlisted men, United States and Europe 579
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 846, 848, 850, 870, 872, 874
white enlisted men in the United States 696, 698, 700, 726, 728, 730
admissions, by countries, officers, and enlisted men 98, 100, 122, 124
admissions, by months—
colored enlisted men in Europe 478, 480, 490
colored enlisted men in the United States 446, 448, 462, 464
enlisted men, color not stated, in Europe 564
white enlisted men in Europe 306, 308, 322, 324
white enlisted men in the United States 270, 272, 290, 292
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 634, 636, 638, 640, 642, 644, 646, 648, 650
days lost, by countries, officers, and enlisted men 226, 228, 250, 252
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 676
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps), of white enlisted men in the United States 750, 752, 754, 768, 770, 772
deaths, by countries, officers and enlisted men 142, 144, 158, 160
deaths, by months—
colored enlisted men in Europe 512, 516
white enlisted men in Europe 358, 360, 370, 372
white enlisted men in the United States 334, 336, 346, 348
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 918, 920, 922, 942, 944, 946
white enlisted men in the United States 792, 794, 796, 822, 824, 826
discharges for disability, by countries, officers and enlisted men 178, 180, 202, 204
discharges for disability, by months—
colored enlisted men in Europe 552, 558
colored enlisted men in the United States 526, 528, 542, 544
white enlisted men in Europe 414, 416, 430, 432
white enlisted men in the United States 386, 388, 402, 404

Cholelithiasis:
admissions and deaths, enlisted men, United States and Europe 578
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 846, 848, 850, 870, 872, 874
white enlisted men in the United States 696, 698, 700, 726, 728, 730
admissions, by countries, officers and enlisted men 98, 100, 122, 124
admissions, by months—
colored enlisted men in Europe 478, 480, 490
colored enlisted men in the United States 446, 448, 462, 464
enlisted men, color not stated, in Europe 564
white enlisted men in Europe 306, 308, 322, 324
white enlisted men in the United States 274, 276, 290, 292

Cholelithiasis—Continued. Page.
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 634, 636, 638, 640, 642, 644, 646, 648, 650
days lost, by countries, officers and enlisted men 226, 228, 250, 252
deaths, and discharges for disability, by age, total officers and white and colored enlisted men in the United States and Europe 674
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 888, 890, 892, 900, 902, 904
white enlisted men in the United States 750, 752, 754, 768, 770, 772
deaths, by countries, officers and enlisted men 142, 144, 158, 160
deaths, by months—
colored enlisted men in the United States 498, 500, 506, 508
white enlisted men in Europe 358, 360, 370, 372
white enlisted men in the United States 334, 336, 346, 348
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 918, 920, 922, 942, 944, 946
white enlisted men in the United States 792, 794, 796, 822, 824, 826
discharges for disability, by countries, officers and enlisted men 178, 180, 202, 204
discharges for disability, by months—
colored enlisted men in the United States 526, 528, 542, 544
white enlisted men in the United States 386, 388, 402, 404
Cholera, Asiatic. (*See* Asiatic cholera.)
Chorea:
admissions and deaths, enlisted men, United States and Europe 577
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 840, 842, 844, 864, 866, 868

concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 616, 618, 620, 622, 624, 626, 628, 630, 632
days lost, by countries, officers, and enlisted men 222, 224, 246, 248
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 674
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 888, 890, 892, 900, 902, 904
white enlisted men in the United States 744, 746, 748, 762, 764, 766
deaths, by countries, officers and enlisted men 138, 140, 154, 156
deaths, by months—
colored enlisted men in Europe 512, 516
colored enlisted men in the United States 498, 500, 506, 508
enlisted men, color not stated, in Europe 568
white enlisted men in Europe 354, 356, 366, 368
white enlisted men in the United States 330, 332, 342, 344
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 912, 914, 916, 936, 938, 940
white enlisted men in the United States 786, 788, 790, 816, 818, 820
discharges for disability, by countries, officers and enlisted men 174, 176, 198, 200
discharges for disability, by months—
colored enlisted men in Europe 552, 558
colored enlisted men in the United States 522, 524, 538, 540
enlisted men, color not stated, in Europe 574
white enlisted men in Europe 410, 412, 426, 428
white enlisted men in the United States 382, 384, 398, 400
Cirrhosis of the liver:
admissions and deaths, enlisted men, United States and Europe 578
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 846, 848, 850, 870, 872, 874
white enlisted men in the United States 696, 698, 700, 726, 728, 730
admissions by countries, officers and enlisted men 98, 100, 122, 124
admissions by months—
colored enlisted men in Europe 478, 480, 490
colored enlisted men in the United States 446, 448, 462, 464
enlisted men, color not stated, in Europe 564
white enlisted men in Europe 306, 308, 322, 324
white enlisted men in the United States 274, 276, 290, 292
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 634, 636, 638, 640, 642, 644, 646, 648, 650
days lost, by countries, officers and enlisted men 226, 228, 250, 252
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 674

Cirrhosis of the liver—Continued. Page.
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 750, 752, 754, 768, 770, 772
deaths, by countries, officers and enlisted men 142, 144, 158, 160
deaths, by months—
colored enlisted men in Europe 512, 516
white enlisted men in Europe 358, 360, 370, 372
white enlisted men in the United States 334, 336, 346, 348
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 918, 920, 922, 942, 944, 946
white enlisted men in the United States 792, 794, 796, 822, 824, 826
discharges for disability, by countries, officers and enlisted men 178, 180, 202, 204
discharges for disability, by months—
colored enlisted men in Europe 552, 558
colored enlisted men in the United States 526, 528, 542, 544
white enlisted men in Europe 414, 416, 430, 432
white enlisted men in the United States 382, 384, 398, 400
Clavus:
admissions and deaths, enlisted men, United States and Europe 579
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 852, 854, 856, 876, 878, 880
white enlisted men in the United States 702, 704, 706, 732, 734, 736
admissions by countries, officers and enlisted men 98, 100, 122, 124
admissions by months—
colored enlisted men in Europe 482, 484, 492
colored enlisted men in the United States 450, 452, 466, 468
enlisted men, color not stated, in Europe 566
white enlisted men in Europe 306, 308, 322, 324
white enlisted men in the United States 274, 276, 290, 292
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 634, 636, 638, 640, 642, 644, 646, 648, 650
days lost, by countries, officers and enlisted men 226, 228, 250, 252
deaths, and discharge for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 676
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 792, 794, 796, 822, 824, 826
discharges for disability, by countries, officers, and enlisted men 178, 180, 202, 204
discharges for disability, by months, white enlisted men in the United States 386, 388, 402, 404
Cold, excessive, injury by:
admissions, by countries, officers and enlisted men 106, 108, 130, 132
days lost, by countries, officers and enlisted men 234, 236, 258, 260
deaths, by countries, officers and enlisted men 146, 148, 162, 164
discharges for disability, by countries, officers and enlisted men 186, 188, 210, 212
Colitis. (*See* Enteritis.)
Color blindness:
admissions and deaths, enlisted men, United States and Europe 577
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 684, 686, 688, 714, 716, 718
admissions, by countries, officers and enlisted men 90, 92, 114, 116
admissions, by months—
colored enlisted men in Europe 474, 476, 488
enlisted men, color not stated, in Europe 562
white enlisted men in Europe 298, 300, 314, 316
white enlisted men in the United States 266, 268, 282, 284
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 598, 600, 602, 604, 606, 608, 610, 612, 614
days lost, by countries, officers and enlisted men 218, 220, 242, 244
Colored enlisted men. (*See* Enlisted men, colored.)
Complications, concurrent diseases, and sequelæ, enlisted men in the United States and Europe, absolute numbers 580–669
Compression of brain, nonbattle injuries:
admissions and deaths, total Army 1015
admissions, by countries, officers and enlisted men 102, 104, 126, 128
days lost, by countries, officers and enlisted men 230, 232, 254, 256
deaths, by countries, officers and enlisted men 146, 148, 162, 164
discharges for disability, by countries, officers and enlisted men 182, 184, 206, 208

Page.
Concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe, absolute numbers 580–669
Concussion of brain, battle injuries:
admissions, officers and enlisted men 1017
days lost in hospital, officers and enlisted men 1018
deaths, officers and enlisted men 1017
discharges for disability, officers and enlisted men 1018
Concussion of brain, nonbattle injuries:
admissions and deaths, total Army 1015
admissions, by countries, officers and enlisted men 102, 104, 126, 128
days lost, by countries, officers and enlisted men 230, 232, 254, 256
deaths, by countries, officers and enlisted men 146, 148, 162, 164
discharges for disability, by countries, officers and enlisted men 182, 184, 206, 208
Conflagration, nonbattle injuries:
admissions, by countries, officers and enlisted men 106, 108, 130, 132
days lost, by countries, officers and enlisted men 234, 236, 258, 260
deaths, by countries, officers and enlisted men 146, 148, 162, 164
discharges for disability, by countries, officers and enlisted men 186, 188, 210, 212
Congenital malformations. (*See* Malformations, congenital.)
Conjunctivitis:
admissions and deaths, enlisted men, United States and Europe 577
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 840, 842, 844, 864, 866, 868
white enlisted men in the United States 684, 686, 688, 714, 716, 718
admissions, by countries, officers and enlisted men 90, 92, 114, 116
admissions, by months—
colored enlisted men in Europe 474, 476, 488
colored enlisted men in the United States 442, 444, 458, 460
enlisted men, color not stated, in Europe 562
white enlisted men in Europe 298, 300, 314, 316
white enlisted men in the United States 266, 268, 282, 284
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 598, 600, 602, 604, 606, 608, 610, 612, 614
days lost, by countries, officers and enlisted men 218, 220, 242, 244
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 672
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 912, 914, 916, 936, 938, 940
white enlisted men in the United States 780, 782, 784, 810, 812, 814
discharges for disability, by countries, officers and enlisted men 170, 172, 194, 196
discharges for disability, by months—
colored enlisted men in Europe 550, 556
colored enlisted men in the United States 522, 524, 538, 540
white enlisted men in Europe 410, 412, 426, 428
white enlisted men in the United States 378, 380, 394, 396
Constitutional psychopathic states. (*See* Psychopathic states, constitutional.)
Contusion, battle injuries:
admissions, officers and enlisted men 1017
days lost in hospital, officers and enlisted men 1018
deaths, officers and enlisted men 1017
discharges for disability, officers and enlisted men 1018
Contusions, nonbattle injuries:
admissions and deaths, total Army 1015
admissions, by countries, officers and enlisted men 102, 104, 126, 128
days lost, by countries, officers and enlisted men 230, 232, 254, 256
deaths, by countries, officers and enlisted men 146, 148, 162, 164
discharges for disability, by countries, officers and enlisted men 182, 184, 206, 208
Countries, including transports:
admissions by—
officers and enlisted men, absolute numbers 86–109
officers and enlisted men, ratios per 1,000 110–133
days lost by—
officers, and enlisted men, absolute numbers 214–237
officers and enlisted men, ratios per 1,000 238–261
deaths by—
officers and enlisted men, absolute numbers 134–149
officers and enlisted men, ratios per 1,000 150–165

Countries, including transports—Continued. Page.
discharges for disability by—
officers and enlisted men, absolute numbers 166–189
officers and enlisted men, ratios per 1,000 190–213
Cretinism and myxedema:
admissions and deaths, enlisted men, United States and Europe 576
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps), for white enlisted men in the United States 678, 680, 682, 708, 710, 712
admissions by countries, officers and enlisted men 86, 88, 110, 112
admissions by months—
white enlisted men in Europe 294, 296, 310, 312
white enlisted men in the United States 262, 264, 278, 280
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 580, 582, 584, 586, 588, 590, 592, 594, 596
days lost, by countries, officers and enlisted men 214, 216, 238, 240
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 670
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 774, 776, 778, 804, 806, 808
discharges for disability, by countries, officers and enlisted men 166, 168, 190, 192
discharges for disability, by months, white enlisted men in the United States 374, 376, 390, 392
Crushing, battle injuries:
admissions, officers and enlisted men 1017
days lost in hospital, officers and enlisted men 1018
deaths, officers and enlisted men 1017
discharges for disability, officers and enlisted men 1018
Crushing, battle injuries, by military agents:
admissions, officers and enlisted men 1019
days lost in hospital, officers and enlisted men 1023
deaths, officers and enlisted men 1021
discharges for disability, officers and enlisted men 1022
Crushing, nonbattle injuries:
admissions by countries, officers and enlisted men 102, 104, 106, 108, 126, 128, 130, 132
days lost, by countries, officers and enlisted men 230, 232, 234, 236, 254, 256, 258, 260
deaths by countries, officers and enlisted men 146, 148, 162, 164
discharges for disability, by countries, officers and enlisted men 182, 184, 186, 188, 206, 208, 210, 212
Cutting and piercing instruments, battle injuries by:
admissions, officers and enlisted men 1019
days lost in hospital, officers and enlisted men 1023
deaths, officers and enlisted men 1021
discharges for disability, officers and enlisted men 1022
Cutting and piercing instruments, nonbattle injuries by:
admissions by countries, officers and enlisted men 106, 108, 130, 132
days lost, by countries, officers and enlisted men 234, 236, 258, 260
deaths, by countries, officers and enlisted men 146, 148, 162, 164
discharges for disability, by countries, officers and enlisted men 186, 188, 210, 212
Cystitis:
admissions and deaths, enlisted men, United States and Europe 579
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 852, 854, 856, 876, 878, 880
white enlisted men in the United States 696, 698, 700, 726, 728, 730
admissions by countries, officers and enlisted men 98, 100, 122, 124
admissions, by months—
colored enlisted men in Europe 482, 484, 492
colored enlisted men in the United States 450, 452, 466, 468
enlisted men, color not stated, in Europe 566
white enlisted men in Europe 306, 308, 322, 324
white enlisted men in the United States 274, 276, 290, 292
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 634, 636, 638, 640, 642, 644, 646, 648, 650
days lost, by countries, officers and enlisted men 226, 228, 250, 252
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 676
deaths, by countries, officers and enlisted men 142, 144, 158, 160
deaths, by months, white enlisted men in Europe 358, 360, 370, 372

Cystitis—Continued. Page.
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps—
colored enlisted men in the United States 918, 920, 922, 942, 944, 946
white enlisted men in the United States 792, 794, 796, 822, 824, 826
discharges for disability, by countries, officers and enlisted men 178, 180, 202, 204
discharges for disability, by months—
colored enlisted men in the United States 526, 528, 542, 544
white enlisted men in Europe 414, 416, 430, 432
white enlisted men in the United States 386, 388, 402, 404
Days lost:
by countries, including transports—
officers and enlisted men, absolute numbers 214–237
officers and enlisted men, ratios per 1,000 238–261
discharges for disability, admissions, deaths and, including killed in action, total Army, excluding North Russia and Siberia, absolute numbers, ratios per 1,000 and percentages 1180
for diseases (all), by camps, by months, total enlisted men, United States, absolute numbers 960–961
in hospital, battle injuries—
officers and enlisted men, absolute numbers and ratios per 1,000 1018
by military agents, officers and enlisted men, absolute numbers and ratios per 1,000 1023
Deaths:
battle injuries, officers and enlisted men, absolute numbers and ratios per 1,000 1017
battle injuries, by military agents, officers and enlisted men, absolute numbers and ratios per 1,000 1021
by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States, absolute numbers 882–893
colored enlisted men in the United States, ratios per 1,000 894–905
white enlisted men in the United States, absolute numbers 738–755
white enlisted men in the United States, ratios per 1,000 756–773
by countries, including transports—
officers and enlisted men, absolute numbers 134–149
officers and enlisted men, ratios per 1,000 150–165
by months—
colored enlisted men in Europe, absolute numbers 510–513
colored enlisted men in Europe, annual ratios per 1,000 514–517
colored enlisted men in the United States, absolute numbers 494–501
colored enlisted men in the United States, annual ratios per 1,000 502–509
enlisted men, color not stated, in Europe, absolute numbers 568–571
white enlisted men in Europe, absolute numbers 350–361
white enlisted men in Europe, annual ratios per 1,000 362–373
white enlisted men in the United States, absolute numbers 326–337
white enlisted men in the United States, annual ratios per 1,000 338–349
for diseases (all), by camps, by months, total enlisted men, United States, absolute numbers 956–957
in hospital, battle injuries, by arms of service, by months, total officers and enlisted men, absolute numbers and ratios per 1,000 1026
influenza and common respiratory diseases, measles, and the pneumonias, by camps of occurrence, by months—
colored enlisted men, United States, absolute numbers 1007–1014
white enlisted men, United States, absolute numbers 978–993
Deaths, admissions and:
battle injuries and killed in action, by arms of service, total officers and enlisted men, absolute numbers, ratios per 1,000, and case fatality rates 1028
for diseases, enlisted men, United States and Europe, absolute numbers, ratios per 1,000 and percentage rates 576–579
nonbattle injuries, total Army, absolute numbers, ratios per 1,000 strength, rate per 1,000 of total nonbattle injuries, and case fatality rates 1015
Deaths, admissions, and case fatality rates:
battle injuries, by gunshot missiles, officers and enlisted men, absolute numbers and percentage rates 1023
battle injuries by poisonous gases, officers and enlisted men, absolute numbers and percentage rates 1023
battle injuries, by region and by military agent (poisonous gases excepted), single and multiple wounds, officers and enlisted men 1024
Deaths, admissions, discharges for disability and days lost, including killed in action, total Army, excluding North Russia and Siberia, absolute numbers, ratios per 1,000 and percentages 1180

Page.
Deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe, absolute numbers 670–677
Deaths and wounded, American Expeditionary Forces, North Russia and Siberia, absolute numbers 1179
Decapitation, battle injuries:
admissions, officers and enlisted men, absolute numbers and ratios per 1,000 1017
deaths, officers and enlisted men, absolute numbers and ratios per 1,000 1017
Defective vision. (*See* Refractive errors.)
Dementia præcox:
admissions and deaths, enlisted men, United States and Europe 577
admissions by camps of occurrence, and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 840, 842, 844, 864, 866, 868
white enlisted men in the United States 684, 686, 688, 714, 716, 718
admissions by countries, officers and enlisted 90, 92, 114, 116
admissions by months—
colored enlisted men in Europe 474, 476, 488
colored enlisted men in the United States 442, 444, 458, 460
enlisted men, color not stated, in Europe 562
white enlisted men in Europe 298, 300, 314, 316
white enlisted men in the United States 266, 268, 282, 284
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 598, 600, 602, 604, 606, 608, 610, 612, 614
days lost, by countries, officers and enlisted men 218, 220, 242, 244
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 672
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 886, 894, 896, 898
white enlisted men in the United States 744, 746, 748, 762, 764, 766
deaths, by countries, officers and enlisted men 138, 140, 154, 156
deaths, by months—
colored enlisted men in Europe 510, 514
colored enlisted men in the United States 494, 496, 502, 504
white enlisted men in Europe 350, 352, 362, 364
white enlisted men in the United States 326, 328, 338, 340
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 906, 908, 910, 936, 938, 940
white enlisted men in the United States 780, 782, 784, 810, 812, 814
discharges for disability, by countries, officers and enlisted men 170, 172, 194, 196
discharges for disability, by months—
colored enlisted men in Europe 550–556
colored enlisted men in the United States 522, 524, 538, 540
enlisted men, color not stated, in Europe 572
white enlisted men in Europe 410, 412, 426, 428
white enlisted men in the United States 378, 380, 394, 396
Dermatitis:
admissions and deaths, enlisted men, United States and Europe 579
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 852, 854, 856, 876, 878, 880
white enlisted men in the United States 702, 704, 706, 732, 734, 736
admissions by countries, officers and enlisted men 98, 100, 122, 124
admissions, by months—
colored enlisted men in Europe 482, 484, 492
colored enlisted men in the United States 450, 452, 466, 468
enlisted men, color not stated, in Europe 566
white enlisted men in the United States 274, 276, 290, 292
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 634, 636, 638, 640, 642, 644, 646, 648, 650
days lost, by countries, officers and enlisted men 226, 228, 250, 252
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 676
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 918, 920, 922, 942, 944, 946
white enlisted men in the United States 792, 794, 796, 822, 824, 826
discharges for disability, by countries, officers and enlisted men 178, 180, 202, 204

discharges for disability, by countries, officers and enlisted men 182, 184, 206, 208
discharges for disability, by months—
colored enlisted men in the United States 530, 532, 546, 548
white enlisted men in Europe 418, 420, 434, 436
white enlisted men in the United States 386, 388, 402, 404
Foreign bodies, nonbattle injuries by:
admissions by countries, officers and enlisted men 102, 104, 126, 128
days lost, by countries, officers and enlisted men 230, 232, 254, 256
deaths, by countries, officers and enlisted men 146, 148, 162, 164
discharges for disability, by countries, officers and enlisted men 182, 184, 206, 208
Foreign bodies, traumatic, battle injuries by:
admissions, officers and enlisted men 1017
days lost, in hospital, officers and enlisted men 1018
deaths, officers and enlisted men 1017
Forms, sick and wounded 1202–1217

Fossæ, nasal, diseases of. (*See* Nasal fossæ, diseases of.)
Fracture, nonbattle injury, faulty union of: Page.
admissions by countries, officers and enlisted men 102, 104, 126, 128
days lost, by countries, officers and enlisted men 230, 232, 254, 256
deaths, by countries, officers and enlisted men 146, 148, 162, 164
discharges for disability, by countries, officers and enlisted men 182, 184, 206, 208
Fractures (all), nonbattle injuries, admissions and deaths, total Army 1015
Fractures, battle injuries:
admissions and deaths, enlisted men, United States and Europe 579
admissions, officers and enlisted men 1017
days lost in hospital, officers and enlisted men 1018
deaths, officers and enlisted men 1017
discharges for disability, officers and enlisted men 1018
Fractures, compound, nonbattle injuries:
admissions and deaths, total Army 1015
admissions by countries, officers and enlisted men 102, 104, 126, 128
days lost, by countries, officers and enlisted men 230, 232, 254, 256
discharges for disability, by countries, officers and enlisted men 182, 184, 206, 208
discharges for disability, by countries, officers and enlisted men 182, 184, 206, 208
Fractures, faulty union of:
admissions by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 852, 854, 856, 876, 878, 880
white enlisted men in the United States 702, 704, 706, 732, 734, 736
admissions, by countries, officers and enlisted men 102, 104, 126, 128
admissions, by months—
colored enlisted men, in Europe 482, 484, 492
colored enlisted men in the United States 450, 452, 466, 468
enlisted men, color not stated, in Europe 566
white enlisted men in Europe 306, 308, 322, 324
white enlisted men in the United States 274, 276, 290, 292
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 634, 636, 638, 640, 642, 644, 646, 648, 650
days lost, by countries, officers and enlisted men 230, 232, 254, 256
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 676
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 750, 752, 754, 768, 770, 772
deaths, by countries, officers and enlisted men 142, 144, 158, 160
deaths, by months—
white enlisted men in Europe 358, 360, 370, 372
white enlisted men in the United States 334, 336, 346, 348
discharges for disability, by camps of occurrence, and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 924, 926, 928, 948, 950, 952
white enlisted men in the United States 798, 800, 802, 828, 830, 832
discharges for disability, by months—
colored enlisted men in Europe 554, 558
colored enlisted men in the United States 530, 532, 546, 548
enlisted men, color not stated, in Europe 574
white enlisted men in Europe 418, 420, 434, 436
white enlisted men in the United States 386, 388, 402, 404
Fractures, simple, nonbattle injuries:
admissions and deaths, total Army 1015
admissions, by countries, officers and enlisted men 102, 104, 126, 128
days lost, by countries, officers and enlisted men 230, 232, 254, 256
deaths, by countries, officers and enlisted men 146, 148, 162, 164
discharges for disability, by countries, officers and enlisted men 182, 184, 206, 208
Furuncle:
admissions and deaths, enlisted men, United States and Europe 579
admissions by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 852, 854, 856, 876, 878, 880
white enlisted men in the United States 702, 704, 706, 732, 734, 736
admissions by countries, officers and enlisted men 98, 100, 122, 124
admissions, by months—
colored enlisted men in Europe 482, 484, 492
colored enlisted men in the United States 450, 452, 466, 468
enlisted men, color not stated, in Europe 566
white enlisted men in Europe 306, 308, 322, 324
white enlisted men in the United States 274, 276, 290, 292

Furuncle—Continued. Page.
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 634, 636, 638, 640, 642, 644, 646, 648, 650
days lost, by countries, officers and enlisted men 226, 228, 250, 252
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 676
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 750, 752, 754, 768, 770, 772
deaths, by countries, officers and enlisted men 142, 144, 158, 160
deaths, by months—
enlisted men, color not stated, in Europe 570
white enlisted men in Europe 358, 360, 370, 372
white enlisted men in the United States 334, 336, 346, 348
discharges for disability, by camps of occurrence, and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 918, 920, 922, 942, 944, 946
white enlisted men in the United States 792, 794, 796, 822, 824, 826
discharges for disability, by countries, officers and enlisted men 178, 180, 202, 204
discharges for disability, by months—
colored enlisted men in the United States 526, 528, 542, 544
white enlisted men in Europe 414, 416, 430, 432
white enlisted men in the United States 386, 388, 402, 404

Gall-bladder and bile-duct, diseases of:
admissions and deaths, enlisted men, United States and Europe 579
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 846, 848, 850, 870, 872, 874
white enlisted men in the United States 696, 698, 700, 726, 728, 630
admissions by countries, officers and enlisted men 98, 100, 122, 124
admissions, by months—

General diseases. (*See* Diseases, general.)
General paralysis of the insane. (*See* Paralysis, general, of the insane.)
Genital organs, admissions, deaths, and case fatality rates, battle injuries, by region and by military agent (poisonous gases excepted), single and multiple wounds, officers and enlisted men 1024
Genitourinary system, diseases of (nonvenereal):
admissions and deaths, enlisted men, United States and Europe 579
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps—
colored enlisted men in the United States 852, 854, 856, 876, 878, 880
white enlisted men in the United States 696, 698, 700, 726, 728, 730
admissions by countries, officers and enlisted men 98, 100, 122, 124
admissions by months—
colored enlisted men in Europe 482, 484, 492
colored enlisted men in the United States 450, 452, 466, 468
enlisted men, color not stated, in Europe 566
white enlisted men in Europe 306, 308, 322, 324
white enlisted men in the United States 274, 276, 290, 292
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 634, 636, 638, 640, 642, 644, 646, 648, 650
days lost, by countries, officers and enlisted men 226, 228, 250, 252
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 676
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 888, 890, 892, 900, 902, 904
white enlisted men in the United States 750, 752, 754, 768, 770, 772
deaths, by countries, officers and enlisted men 142, 144, 158, 160
deaths, by months—
colored enlisted men in Europe 512, 516
colored enlisted men in the United States 498, 500, 506, 508
enlisted men, color not stated, in Europe 570
white enlisted men in Europe 358, 360, 370, 372
white enlisted men in the United States 334, 336, 346, 348
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 918, 920, 922, 942, 944, 946
white enlisted men in the United States 792, 794, 796, 822, 824, 826
discharges for disability, by countries, officers and enlisted men 178, 180, 202, 204
discharges for disability, by months—
colored enlisted men in Europe 552, 558
colored enlisted men in the United States 526, 528, 542, 544
enlisted men, color not stated, in Europe 574
white enlisted men in Europe 414, 416, 430, 432
white enlisted men in the United States 386, 388, 402, 404
German measles. (*See* Measles, German.)
Glands, ductless. (*See* Ductless glands, diseases of.)
Glaucoma:
admissions and deaths, enlisted men, United States and Europe 577
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 840, 842, 844, 864, 866, 868
white enlisted men in the United States 684, 686, 688, 714, 716, 718

Glaucoma—Continued. Page.
admissions, by countries, officers and enlisted men 90, 92, 114, 116
admissions, by months—
colored enlisted men in Europe 474, 476, 488
colored enlisted men in the United States 442, 444, 458, 460
enlisted men, color not stated, in Europe 562
white enlisted men in Europe 298, 300, 314, 316
white enlisted men in the United States 266, 268, 282, 284
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 598, 600, 602, 604, 606, 608, 610, 612, 614
days lost, by countries, officers and enlisted men 218, 220, 242, 244
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 672
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 912, 914, 916, 936, 938, 940
white enlisted men in the United States 780, 782, 784, 810, 812, 814
discharges for disability, by countries, officers and enlisted men 170, 172, 194, 196
discharges for disability, by months—
colored enlisted men in Europe 550, 556
colored enlisted men in the United States 522, 524, 538, 540
white enlisted men in Europe 410, 412, 426, 428
white enlisted men in the United States 378, 380, 394, 396
Goiter, exophthalmic (hyperthyroidism):
admissions and deaths, enlisted men, United States and Europe 576
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 834, 836, 838, 858, 860, 862
white enlisted men in the United States 678, 680, 682, 708, 710, 712
admissions, by months—
colored men enlisted in Europe 470, 472, 486
colored enlisted men in the United States 438, 440, 454, 456
enlisted men, color not stated, in Europe 560
white enlisted men in Europe 294, 296, 310, 312
white enlisted men in the United States 262, 264, 278, 280
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 580, 582, 584, 586, 588, 590, 592, 594, 596
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 670
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 738, 740, 742, 756, 758, 760
deaths, by countries, officers and enlisted men 134, 136, 150, 152
deaths, by months—
white enlisted men in Europe 350, 352, 362, 364
white enlisted men in the United States 326, 328, 338, 340
discharges for disability, by camps of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 906, 908, 910, 930, 932, 934
white enlisted men in the United States 774, 776, 778, 804, 806, 808
discharges for disability, by countries, officers and enlisted men 166, 168, 190, 192
discharges for disability by months—
colored enlisted men in Europe 550, 556
colored enlisted men in the United States 518, 520, 534, 536
enlisted men, color not stated, in Europe 572
white enlisted men in Europe 406, 408, 422, 424
white enlisted men in the United States 374, 376, 390, 392
Goiter, simple:
admissions and deaths, enlisted men, United States and Europe 576
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 834, 836, 838, 858, 860, 862
white enlisted men in the United States 678, 680, 682, 708, 710, 712
admissions by countries, officers and enlisted men 90, 92, 114, 116
admissions, by months—
colored enlisted men in Europe 470, 472, 486
colored enlisted men in the United States 438, 440, 454, 456
enlisted men, color not stated, in Europe 560
white enlisted men in Europe 294, 296, 310, 312
white enlisted men in the United States 262, 264, 278, 280

Goiter, simple—Continued. Page.
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 580, 582, 584, 586, 588, 590, 592, 594, 596
days lost, by countries, officers and enlisted men 218, 220, 242, 244
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 670
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 906, 908, 910, 930, 932, 934
white enlisted men in the United States 774, 776, 778, 804, 806, 808
discharges for disability, by countries, officers and enlisted men 170, 172, 194, 196
discharges for disability, by months—
colored enlisted men in the United States 518, 520, 534, 536
white enlisted men in Europe 406, 408, 422, 424
white enlisted men in the United States 374, 376, 390, 392
Gonococcus infection:
admissions and deaths, enlisted men, United States and Europe 576
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 834, 836, 838, 858, 860, 862
white enlisted men in the United States 678, 680, 682, 708, 710, 712
admissions by countries officers and enlisted men 86, 88, 110, 112
admissions, by months—
colored enlisted men in Europe 470, 472, 486
colored enlisted men in the United States 438, 440, 454, 456
enlisted men, color not stated, in Europe 560
white enlisted men in Europe 294, 296, 310, 312
white enlisted men in the United States 262, 264, 278, 280
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 580, 582, 584, 586, 588, 590, 592, 594, 596
days lost, by countries, officers and enlisted men 214, 216, 238, 240
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 670
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 834, 836, 838, 858, 860, 862
white enlisted men in the United States 738, 740, 742, 756, 758, 760
deaths, by countries, officers and enlisted men 134, 136, 150, 152
deaths, by months—
colored enlisted men in the United States 494, 496, 502, 504
white enlisted men in Europe 350, 352, 362, 364
white enlisted men in the United States 326, 328, 338, 340
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 906, 908, 910, 930, 932, 934
white enlisted men in the United States 774, 776, 778, 804, 806, 808
discharges for disability, by countries, officers and enlisted men 166, 168, 190, 192
discharges for disability, by months—
colored enlisted men in Europe 550–556

deaths, by countries, officers and enlisted men 142, 144, 158, 160
deaths, by months, white enlisted men in the United States 334, 336, 346, 348
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 792, 794, 796, 822, 824, 826
discharges for disability, by countries, officers and enlisted men 178, 180, 202, 204
discharges for disability, by months—
white enlisted men in Europe 414, 416, 430, 432
white enlisted men in the United States 386, 388, 402, 404
Hyperopia. (*See* Refractive errors.)
Hypertension (*See* Arteriosclerosis.)
Hyperthyroidism. (*See* Goiter, exophthalmic.)
Hysteria and results (psychoses excepted):
admissions and deaths, enlisted men, United States and Europe 577
admissions by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 840, 842, 844, 864, 866, 868
white enlisted men in the United States 684, 686, 688, 714, 716, 718
admissions by countries, officers and enlisted men 90, 92, 114, 116
admissions, by months—
colored enlisted men in Europe 474, 476, 488
colored enlisted men in the United States 442, 444, 458, 460
enlisted men, color not stated, in Europe 562
white enlisted men in Europe 298, 300, 314, 316
white enlisted men in the United States 266, 268, 282, 284
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 598, 600, 602, 604, 606, 608, 610, 612, 614
days lost, by countries, officers and enlisted men 218, 220, 243, 244
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 672
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 906, 908, 910, 930, 932, 934
white enlisted men in the United States 780, 782, 784, 810, 812, 814
discharges for disability, by countries, officers and enlisted men 170, 172, 194, 196
discharges for disability, by months—
colored enlisted men in Europe 550–556
colored enlisted men in the United States 518, 520, 534, 536
enlisted men, color not stated, in Europe 572
white enlisted men in Europe 406, 408, 422, 424
white enlisted men in the United States 378, 380, 394, 396

Impetigo:
admissions and deaths, enlisted men, United States and Europe 579
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 852, 854, 856, 876, 878, 880
white enlisted men in the United States 702, 704, 706, 732, 734, 736
admissions, by countries, officers and enlisted men 98, 100, 122, 124
admissions, by months—
colored enlisted men in Europe 482, 484, 492
colored enlisted men in the United States 450, 452, 466, 468
enlisted men, color not stated, in Europe 566

Impetigo—Continued.
admissions, by months—Continued. Page.
white enlisted men in Europe 306, 308, 322, 324
white enlisted men in the United States 274, 276, 290, 292
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 634, 636, 638, 640, 642, 644, 646, 648, 650
days lost, by countries, officers and enlisted men 226, 228, 250, 252
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 676
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 918, 920, 922, 942, 944, 946
white enlisted men in the United States 792, 794, 796, 822, 824, 826
discharges for disability, by countries, officers and enlisted men 178, 180, 202, 204
discharges for disability, by months—
colored enlisted men in the United States 526, 528, 542, 544
white enlisted men in the United States 386, 388, 402, 404
Indirect result of military agent, battle injuries:
admissions, officers and enlisted men 1019
deaths, officers and enlisted men 1021
days lost in hospital, officers and enlisted men 1023
discharges for disability, officers and enlisted men 1022
Infantry:
admissions and deaths for battle injuries, and killed in action, total officers and enlisted men 1028
admissions, battle injuries, by months 1025
Artillery, Machine Gun Battalions, Engineers and, wounds by gas and by gunshot missiles, and killed in action, by month and by day 1029–1177
deaths in hospital, battle injuries, by months 1026
killed in action, by months 1027
Infection, focal. (*See* Abscess, periapical, focal infection from.)
Infectious diseases (excluding tuberculosis and venereal):
admissions and deaths, enlisted men, United States and Europe 576
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 834, 836, 838, 858, 860, 862

white enlisted men in the United States 798, 800, 802, 828, 830, 832
discharges for disability, by countries, officers and enlisted men 182, 184, 206, 208

Myositis—Continued.
discharges for disability, by months— Page.
colored enlisted men in Europe 554, 558
colored enlisted men in the United States 530, 532, 546, 548
white enlisted men in Europe 418, 420, 434, 436
white enlisted men in the United States 386, 388, 402, 404
Myxedema. (*See* Cretinism and myxedema.)

Nævus:
admissions and deaths, enlisted men, United States and Europe 579
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 852, 854, 856, 876, 878, 880
white enlisted men in the United States 702, 704, 706, 732, 734, 736
admissions by countries, officers and enlisted men 98, 100, 122, 124
admissions, by months—
colored enlisted men in Europe 482, 484, 492
colored enlisted men in the United States 450, 452, 466, 468
enlisted men, color not stated, in Europe 566
white enlisted men in Europe 306, 308, 322, 324
white enlisted men in the United States 274, 276, 290, 292
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 634, 636, 638, 640, 642, 644, 646, 648, 650
days lost, by countries, officers and enlisted men 226, 228, 250, 252
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 676
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 792, 794, 796, 822, 824, 826
discharges for disability, by countries, officers and enlisted men 178, 180, 202, 204
discharges for disability, by months, white enlisted men in the United States 386, 388, 402, 404

Nails, defects and diseases of:
admissions and deaths, enlisted men, United States and Europe 579
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 852, 854, 856, 876, 878, 880
white enlisted men in the United States 702, 704, 706, 732, 734, 736
admissions by countries, officers, and enlisted men 98, 100, 122, 124
admissions, by months—
colored enlisted men in Europe 482, 484, 492
colored enlisted men in the United States 450, 452, 466, 468
enlisted men, color not stated, in Europe 566
white enlisted men in Europe 306, 308, 322, 324
white enlisted men in the United States 274, 276, 290, 292
concurrent diseases, complications, and sequelæ; enlisted men in the United States and Europe 634, 636, 638, 640, 642, 644, 646, 648, 650
days lost, by countries, officers and enlisted men 226, 228, 250, 252
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 676
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 918, 920, 922, 942, 944, 946
white enlisted men in the United States 792, 794, 796, 822, 824, 826
discharges for disability, by countries, officers and enlisted men 178, 180, 202, 204
discharges for disability, by months—
colored enlisted men in the United States 526, 528, 542, 544
white enlisted men in Europe 414, 416, 430, 432
white enlisted men in the United States 386, 388, 402, 404
Nasal fossæ, diseases of:
admissions and deaths, enlisted men, United States and Europe 577
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 840, 842, 844, 864, 866, 868
white enlisted men in the United States 690, 692, 694, 720, 722, 724
admissions by countries, officers and enlisted men 94, 96, 118, 120
admissions, by months—
colored enlisted men in Europe 474, 476, 488
colored enlisted men in the United States 442, 444, 458, 460
enlisted men, color not stated, in Europe 562

Nasal fossæ, diseases of—Continued.
admissions, by months—Continued. Page.
white enlisted men in Europe 298, 300, 314, 316
white enlisted men in the United States 266, 268, 282, 284
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 598, 600, 602, 604, 606, 608, 610, 612, 614
days lost, by countries, officers and enlisted men 222, 224, 246, 248
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 672
diseases of, deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 882, 884, 886, 894, 896, 898
white enlisted men in the United States 744, 746, 748, 762, 764, 766
deaths, by countries, officers and enlisted men 138, 140, 154, 156
deaths, by months—
colored enlisted men in the United States 494, 496, 502, 504
white enlisted men in Europe 354, 356, 366, 368
white enlisted men in the United States 330, 332, 342, 344
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 912, 914, 916, 936, 938, 940
white enlisted men in the United States 786, 788, 790, 816, 818, 820
discharges for disability, by countries, officers and enlisted men 174, 176, 198, 200
discharges for disability, by months—
colored enlisted men in Europe 552, 558
colored enlisted men in the United States 522, 524, 538, 540
enlisted men, color not stated, in Europe 572
white enlisted men in Europe 410, 412, 426, 428

discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)— Page.
colored enlisted men in the United States 906, 908, 910, 930, 932, 934
white enlisted men in the United States 780, 782, 784, 810, 812, 814
discharges for disability, by countries, officers and enlisted men 170, 172, 194, 196
discharges for disability, by months—
colored enlisted men in Europe 550, 556
colored enlisted men in the United States 518, 520, 534, 536
enlisted men, color not stated, in Europe 572
white enlisted men in Europe 406, 408, 422, 424
white enlisted men in the United States 378, 380, 394, 396
Neuritis:
admissions and deaths, enlisted men, United States and Europe 577
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 840, 842, 844, 864, 866, 868
white enlisted men in the United States 684, 686, 688, 714, 716, 718
admissions by countries, officers and enlisted men 90, 92, 114, 116
admissions, by months—
colored enlisted men in Europe 474, 476, 488
colored enlisted men in the United States 442, 444, 458, 460
enlisted men, color not stated, in Europe 562
white enlisted men in Europe 298, 300, 314, 316
white enlisted men in the United States 266, 268, 282, 284
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 598, 600, 602, 604, 606, 608, 610, 612, 614
days lost, by countries, officers and enlisted men 218, 220, 242, 244
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 672
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 906, 908, 910, 930, 932, 934
white enlisted men in the United States 780, 782, 784, 810, 812, 814
discharges for disability, by countries, officers and enlisted men 170, 172, 194, 196
discharges for disability, by months—
colored enlisted men in Europe 550, 556
colored enlisted men in the United States 518, 520, 534, 536
enlisted men, color not stated, in Europe 572
white enlisted men in Europe 406, 408, 422, 424
white enlisted men in the United States 378, 380, 394, 396
Neuro-circulatory asthenia (disordered action of the heart):
admissions and deaths, enlisted men, United States and Europe 577
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 840, 842, 844, 864, 866, 868
white enlisted men in the United States 684, 686, 688, 714, 716, 718
admissions by countries, officers and enlisted men 90, 92, 114, 116
admissions, by months—
colored enlisted men in Europe 474, 476, 488
colored enlisted men in the United States 442, 444, 458, 460
enlisted men, color not stated, in Europe 562
white enlisted men in Europe 298, 300, 314, 316
white enlisted men in the United States 266, 268, 282, 284
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 598, 600, 602, 604, 606, 608, 610, 612, 614
days lost, by countries, officers and enlisted men 218, 220, 242, 244
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 672
deaths, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 882, 884, 886, 894, 896, 898
white enlisted in the United States 738, 740, 742, 756, 758, 760
deaths, by countries, officers and enlisted men 138, 140, 154, 156
deaths, by months—
colored enlisted men in the United States 494, 496, 502, 504
white enlisted men in Europe 350, 352, 362, 364
white enlisted men in the United States 326, 328, 338, 340

Neuro-circulatory asthenia—Continued.
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)— Page.
colored enlisted men in the United States 906, 908, 910, 930, 932, 934
white enlisted men in the United States 780, 782, 784, 810, 812, 814
discharges for disability, by countries, officers and enlisted men 170, 172, 194, 196
discharges for disability, by months—
colored enlisted men in Europe 550, 556
colored enlisted men in the United States 518, 520, 534, 536
white enlisted men in Europe 406, 408, 422, 424
white enlisted men in the United States 378, 380, 394, 396
Neurosis:
admissions and deaths, enlisted men, United States and Europe 577
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 840, 842, 844, 864, 866, 868
white enlisted men in the United States 684, 686, 688, 714, 716, 718
admissions by countries, officers and enlisted men 90, 92, 114, 116
admissions, by months—
colored enlisted men in Europe 474, 476, 488
colored enlisted men in the United States 442, 444, 458, 460
enlisted men, color not stated, in Europe 562
white enlisted men in Europe 298, 300, 314, 316
white enlisted men in the United States 266, 268, 282, 284
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 598, 600, 602, 604, 606, 608, 610, 612, 614
days lost, by countries, officers and enlisted men 218, 220, 242, 244
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 672
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 906, 908, 910, 930, 932, 934
white enlisted men in the United States 780, 782, 784, 810, 812, 814
discharges for disability, by countries, officers and enlisted men 170, 172, 194, 196
discharges for disability, by months—
colored enlisted men in the United States 518, 520, 534, 536
white enlisted men in Europe 406, 408, 422, 424
white enlisted men in the United States 378, 380, 394, 396
Nonbattle injuries. (*See* Injuries, nonbattle.)
North Russia. (*See* Russia, North.)
Nose, external deformity of:
admissions and deaths, enlisted men, United States and Europe 577
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
white enlisted men in the United States 690, 692, 694, 720, 722, 724
admissions by countries, officers and enlisted men 94, 96, 118, 120
admissions, by months—
white enlisted men in Europe 298, 300, 314, 316
white enlisted men, in the United States 266, 268, 282, 284
concurrent diseases, complications, and sequelæ enlisted men in the United States and Europe 598, 600, 602, 604, 606, 608, 610, 612, 614
days lost, by countries, officers and enlisted men 222, 224, 246, 248
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 672
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps), white enlisted men in the United States 786, 788, 790, 816, 818, 820
discharges for disability, by countries, officers and enlisted men 174, 176, 198, 200
discharges for disability, by months, white enlisted men in Europe 380, 396, 410, 412, 426, 428
Nystagmus:
admissions and deaths, enlisted men, United States and Europe 577
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 840, 842, 844, 864, 866, 868
white enlisted men in the United States 684, 686, 688, 714, 716, 718
admissions by countries, officers and enlisted men 90, 92, 114, 116
admissions, by months—
colored enlisted men in Europe 474, 476, 488
colored enlisted men in the United States 442, 444, 458, 460
white enlisted men in Europe 298, 300, 314, 316
white enlisted men in the United States 266, 268, 282, 284

Nystagmus—Continued. Page.
concurrent diseases, complications, and sequelæ, enlisted men in the United States and Europe 598, 600, 602, 604, 606, 608, 610, 612, 614
days lost, by countries, officers, and enlisted men 218, 220, 242, 244
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 672
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 912, 914, 916, 936, 938, 940
white enlisted men in the United States 780, 782, 784, 810, 812, 814
discharges for disability, by countries, officers and enlisted men 170, 172, 194, 196
discharges for disability, by months—
colored enlisted men in the United States 522, 524, 538, 540
white enlisted men in Europe 410, 412, 426, 428
white enlisted men in the United States 378, 380, 394, 396

Obesity:
admissions and deaths, for diseases, enlisted men, United States and Europe 576
admissions, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 834, 836, 838, 858, 860, 862
white enlisted men in the United States 678, 680, 682, 714, 716, 718
admissions by countries, officers and enlisted men 90, 92, 114, 116
admissions, by months—
colored enlisted men in the United States 438, 440, 454, 456
white enlisted men in Europe 294, 296, 310, 312
white enlisted men in the United States 262, 264, 278, 280
concurrent diseases, complications, and sequelæ, enlisted men, in the United States and Europe 580, 582, 584, 586, 588, 590, 592, 594, 596
days lost by countries, officers and enlisted men 218, 220, 242, 244
deaths, and discharges for disability, by age, total officers, and white and colored enlisted men in the United States and Europe 670
discharges for disability, by camps of occurrence and by States of occurrence (excluding troops in specified camps)—
colored enlisted men in the United States 906, 908, 910, 930, 932, 934
white enlisted men in the United States 774, 776, 778, 804, 806, 808
discharges for disability, by countries, officers and enlisted men 170, 172, 194, 196
discharges for disability, by months—
colored enlisted men in the United States 518, 520, 634, 636
white enlisted men in the United States 374, 376, 390, 392
Obstruction, intestinal. (*See* Intestinal obstruction.)
Officers and enlisted men:
admissions—
battle injuries, absolute numbers and ratios per 1,000 1017
by countries, absolute numbers 86–109
by military agents, absolute numbers and ratios per 1,000 1019
admissions, deaths, and case fatality rates, battle injuries—
by gunshot missiles, absolute numbers and percentage rates 1023
by poisonous gases, absolute numbers and percentage rates 1023
by region and by military agent (poisonous gases excepted), single and multiple wounds 1024
days lost by countries, absolute numbers 214–237
days lost by countries, ratios per 1,000 238–261
days lost in hospital, battle injuries—
absolute numbers and ratios per 1,000 1018
by military agents, absolute numbers and ratios per 1,000 1023
deaths, battle injuries—
absolute numbers and ratios per 1,000 1017
by military agents, absolute numbers and ratios per 1,000 1021
deaths, by countries—
absolute numbers 134–149
ratios per 1,000 150–165
discharges, for disability, battle injuries—
absolute numbers and ratios per 1,000 1018
by military agents, absolute numbers and ratios per 1,000 1022
by countries, absolute numbers 166–189
by countries, ratios per 1,000 190–213
strength—
by age, United States and Europe 25
by camps and by States (other camps and posts), by months 25
by months, all countries 15

Page.
Officers and enlisted men, total:
admissions and deaths, battle injuries and killed in action, by arms of service, absolute numbers and ratios per 1,000 and case fatality rates 1028
admissions, battle injuries, by arms of service, by months, absolute numbers, and ratios per 1,000 1025
American Expeditionary Forces, strength by arms of service and by months 82
days lost, by countries, absolute numbers 214–237
days lost, by countries, ratios per 1,000 238–261
deaths in hospital, battle injuries, by arms of service, by months, absolute numbers and ratios per 1,000 1026
killed in action, by arms of service, by months, absolute numbers and ratios per 1,000 1027
